DOTWConnect Main Menu

HOMEPAGE

The DOTWConnect Homepage will be the first thing that will be accessed once a team member login to the platform. The middle part of the site will show a user the Bookings Info, Products Info and Customers Info reports. These reports are used by the Sales, Contracting and Management teams. Access to these reports will depend on the granted access level.

MAIN MENU DESCRIPTIONS

At the top part of the page will be the Main Menu options. Each main menu option will give a CS team member access to different sections and functionalities available in DOTWConnect, such as the:

USERS TAB: allows the searching and viewing of a profile of a DOTWConnect MyAdmin user and the accesses that the user was given.

FINANCE TAB: allows access to the conversion rate logs and buffers that are used in DOTWConnect for its bookings.

PRODUCTS TAB: allows the searching and viewing of lists of DOTWConnect suppliers for Accommodation, Transfer and Tours. The Products tab will also give access to view the supplier's profile and information, contracts, and services they offer.

CUSTOMERS TAB: allows the searching and viewing of lists of DOTWConnect clients and pull up the clients' profile and information.

MARKUP TAB: allows access to the customer and network mark-ups that are added for a specific client or hotel territory.

OPERATIONS TAB: allows the search, viewing and action of existing DOTWConnect bookings. Creation of new or additional bookings, as well as running reports for existing bookings, can also be done in this tab/section.

REPORTS TAB: allows for a set of reports to be pulled up on DOTWConnect bookings, such as reports about Cancellation Deadlines, Forward bookings, etc. Access to this section will depend on the given access level.

FINANCE TAB

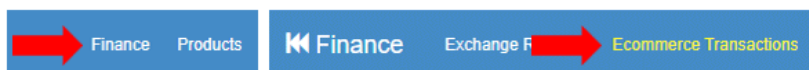

The Finance Tab will grant access to the conversion rate logs and buffers that are used in DOTWConnect for its bookings. If access is granted, it will also allow for a report for Ecommerce Transactions to be pulled out.

E-COMMERCE TRANSACTIONS

The Ecommerce transaction report will allow a user to pull out a list of failed booking due to credit card issues. This report is only granted access to team members who are handling B2B2C clients in their regions.

HOW TO PULL UP THE E-COMMERCE TRANSACTIONS REPORT

To pull out the Ecommerce Transactions Report, one would need to click on the Finance Tab. Once the additional links are shown, the Ecommerce Transactions link will need to be clicked.

This will lead to the Ecommerce Transactions report filters to load, where one will give the ability to filter the report based on the available or necessary information. The most common filters used to generate the report, would include the:

CUSTOMER NAME: allows the filtering of search results to bookings from a specific customer/client.

Customer Name  

AMOUNT BETWEEN: allows the filtering of search results based on the specific amount the customer/client has advised they pay. This section allows for an amount range to be filtered.

Amount Between and

CARD STATUS: allows the filtering of search results based on the card transaction statuses. This section can allow the filtering of results to only show bookings with issues or authorization failures. For reports re: card failures, below card status choices are recommended to be chosen.

Card Status	☐ Authorised	☒ Challenge Pending	☐ Captured
	☐ Cancelled	☐ Refunded	☒ Fraud - Block Transaction
	☒ Fraud - Block Customer	☒ Failure - Transaction Error	☒ Failure - System Error
	☐ General system error	☐ Settled	☒ Additional data pending

FILTER DATES BY: allows the filtering of search results based on what type of dates will be sought, whether it is via Travel Dates, Booking Dates or Payment Dates. For reports re: card failures, it is recommended to search via Payment Date.

Filter Dates By

te

PAYMENT DATE RANGE: allows the filtering of search results, based on a specific date range. For reports re: card failures, it is recommended to search for a date range starting from 1 day before and 1 day after the date which the customer mentioned they were charged.

Travel Date *

From

May 30, 2024

To and including

June 06, 2024

Once the respective filters have been filled out, one will have a choice to either **VIEW REPORT** or **VIEW IN EXCEL**. The **VIEW REPORT** option will give the option to show the search results in the DOTWConnect page. The **VIEW IN EXCEL** option will give the option for the search results to be exported in an Excel file.

If the **VIEW REPORT** option is chosen, below is an example of how the list of bookings will show in the lowest part of the page. The report will indicate when the payment was authorized. Most importantly, to know what is the error that caused the failed charge, the **STATUS** and **TRANSACTION ID** columns will give more information on the reason why the charge declined.

Branch Name	Booking Number	Customer Name	Hotel Name	Booking Status	Travel Dates	Cancellation Deadline	Booking Amount	Paid	Payment Authorization Date	Captured Amount from CC	Internal Credit Used	Order Code	Card Scheme	Status	Payment Channel	Payment On	Transaction ID / Error details
-	n/a	TravelPass Group MOR B2C	n/a	n/a	n/a	n/a	n/a	No		1036.4300 USD	-	16474725	MASTERCARD		Ecommerce	1004 - FRSERR - Cannot process your card. Please contact your issuer bank or try another card	REJECT - REJECT

 Revocation of authorization order
 Revocation of all authorizations order

There are several possible errors for card failures in the Ecommerce transactions report. One can see the common card errors that may be encountered, in the left part of this section.

The error that can be seen in the report is named slightly different than the one in the list. One can look for the nearest one available.

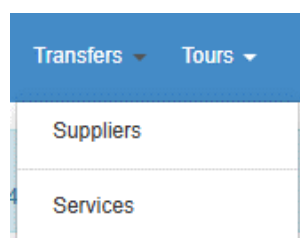

PRODUCTS TAB

The Products Tab will grant access to search for and view the profiles of suppliers for the core DOTWConnect products (Accommodation, Transfers and Tours) and view their contract, contract, and payment information. After the Products Link in DOTWConnect is clicked, the platform will give an option to choose which product one would like to view supplier information on.

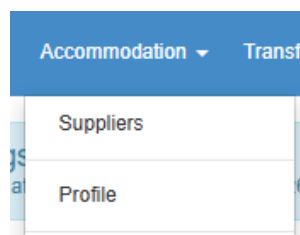

A DOTWConnect user can pull up supplier information for:

- Accommodation Products
- Transfers Products; and
- Tours Products.

For Tours and Transfer products, a DOTWConnect user can search for suppliers via their:

- Supplier profiles; or
- Services offered.

For Accommodation products, a DOTWConnect user can search for suppliers via the:

- Supplier Lists; or
- Supplier Profile.

Most DOTWConnect users prefer to search via the Supplier Profile of accommodation suppliers.

ACCOMMODATION SUPPLIERS

FILTERING ACCOMMODATION SUPPLIER PROFILES

There are several fields that can be used to filter the Accommodation Supplier profiles in DOTWConnect. The most used fields to filter are:

Branch	-- All Branches --	▼
Country	-- All Countries --	▼
City	Start typing a city name	⚡
Chain	-- All Chains --	▼
Brand	-- All Brands --	▼
Supplier	Start typing a Supplier name	⚡
Accommodation Status	Live	▼
Accommodation Unit Name	Contains	▼
	Start typing an accommodation name	⚡

- **Via Country** - Country where the supplier is located
- **Via City** - City where the supplier is located
- **Via Chain** – The hotel chain which the hotel is part of
- **Via Brand** – The hotel brand
- **Via Accommodation Status** - Status whether the supplier is Live (or Active) or Non-Live (or Non-Active)
- **Via Accommodation Unit Name** - Name of the specific hotel

Once the filter choices are filled out, the Filter Accommodation Units button can be clicked to load the search results.

GENERAL INFORMATION

Once an accommodation's profile is loaded, the first section that will be seen would be the General Information Section. This section will present the general information regarding the specific accommodation supplier.

STATUS

Once in this page, the first thing a user will see is the accommodation's status, which will indicate if the supplier is **ACTIVE**, **NON-ACTIVE** or **TEMPORARY CLOSED**. This section will also indicate the other booking channels, which the supplier is open to be sold on.

Status

Status *	Active	Temporary Closed (All Channels) *	No	Dynamic Only *	No
Offline Contracts Open					
Offline Contracts Open			On		
Direct & Dynamic Channels Open			On		
Third Party Channels Open			On		

PROPERTY SET-UP

In the middle of the page will be the PROPERTY SETUP section, where the following information can be seen:

- **CITY and COUNTRY Fields:** shows the city and country where the accommodation is located.
- **ACCOUNT MANAGER Field:** shows the WebBeds Contracts Manager handling the accommodation.
- **PROPERTY NAME Field:** shows the name of the accommodation.
- **PROPERTY TYPE Field:** defines whether the accommodation is a hotel or a serviced apartment.
- **DEFAULT CURRENCY Field:** shows the currency the accommodation uses for their requested payments from WebBeds.
- **CHAIR (or AFFILIATE) and BRAND:** shows the Hotel Chair or Brand that the accommodation is connected to.

Branch *	WebBeds FZ LLC

SUPPLIER TYPE (DC, DMC, DYNAMIC/HOTEL CHAIN, CHANNEL MANAGER, THIRD PARTY)

Booking Channel (Mapped channels)

- Offline Channels: DOTW
- Direct Channels: AccorOBCWbConnect
- Third Party Channels: Hotelbeds, GTA Travel, Expedia, Traveltino 2, Dida Travels, DIDA Travels 2, Total Stay2, Infinite Hotels Gekko, Lots Of Hotels Chains, Metglobal, Expedia Rapid, Special Tours 2, Agoda, AIC Travel Group, HotelBedsWbConnect, EPSNonSensitiveWbConnect, SunHotels2, EPSNonSensitiveHotelOnlyWbConnect, HotelBedsRetailWbConnect, TBOWbConnect, Lots Of Hotels TBO, HotelBedsSensitiveWbConnect, EPSNonSensitiveAPACWbConnect, DidaTravelWbConnect, Expedia Rapid Marriott, AgodaSensitiveWbConnect, TBORetailWbConnect, RestelWbConnect, RestelRetailWbConnect, Miki, AdonisWbConnect, BookingWbConnect, RezliveWbConnect, EPSRetailWbConnect, BookingSensitiveWbConnect

One can also see which suppliers/types of suppliers offer the specific hotel by looking at the Booking Channel section of the property information. It would specify in this section which supplier types offer the hotel, such as:

- **OFFLINE CHANNELS:** for Direct Contract (DC) or Local Suppliers/DMC, will show "DOTW" at the end,
- **DIRECT CHANNELS:** for Dynamic / Hotel Chains, will list the Dynamic connections used by the hotel,
- **THIRD PARTY CHANNELS:** for third party suppliers, will list the Third Party and Intercompany suppliers offering the hotel; and
- **CHANNEL MANAGERS:** for Channel Managers, will list the Channel Manager connections offering the hotel.

HOTEL DESCRIPTION & GENERAL NOTES

The lowest part of the Hotel General Information section will show a summary of the Hotel Description and General Notes. These would be the same information that would show in the hotel's profile during booking (for the Hotel Description) and in the tariff notes (for the General Notes).

Hotel Description

English *

Experience luxury living, shopping pleasures and the comfort of business only at Joy~Nostal Center Manila. Ideal for business travelers and families on leisure, this 5 star hotel has the most expansive living space within the metro with a mix of studio executive rooms and suites ranging from 41 sqm to 182 sqm. All rooms are equipped with state-of-the-art entertainment system, top of the line kitchen facilities, a shower stall that doubles as a steam room and a washer and dryer among other modern conveniences.

General Notes

No show and early departure will be subjected to 100% charge. No date, name and room change allowed. Bookings including children will be based on sharing parents bedding, no separate bed for children is provided unless otherwise stated.

Please limit to maximum 2000 characters - written: 237

CONTACT DETAILS

The Contact Detail section will show the contact details of a hotel if the hotel has an active Direct Contract with WebBeds. The available contact information is taken from the signed contract of the hotel with WebBeds.

The available contact details would include the:

- **Main Contact Reservation field:** shows the email address and phone number of the Reservation Department, which is also used for the sending of the LPO to the supplier.
- **Constant Contact field:** shows the email and phone number (if available) of WebBeds' main contact with the hotel.
- **Finance field:** shows the email and phone number (if available) of WebBeds' contact with the hotel for any finance related issues.
- **Hotel Web Site field:** shows the URL of hotel's direct website.

Contact Details	Email	Telephone		Fax

PAYMENTS

The Payments section will give information regarding the payment policy of the supplier with WebBeds, as per contract. Information in this section affects how the market/nationality specific rates are set-up and how Virtual Credit Card/VCC payments are sent and are payable to the hotel.

The available information would include the:

- Policy for market specific rates: which details where market/nationality specific rates will be based on, whether it would be based on the guest's nationality, guest's country of residence or client's location.
- Use VCC: which details if the hotel is payable via VCC or not.
- Allow multiple payment methods: which details if the hotel allows both VCC and monthly invoice.
- Loading Time: which details when the VCC is set up to be loaded the full amount, as per contract.
- Send Credit Card details by: which details how the VCC information will be sent to the hotel. With the recent change in the DOTW platform, suppliers can only access the VCC details via the Extranet, using MFA security.

Policy for market specific rates ☐ Based on Travel Agent Location ☐ Based on Passenger Residency ☒ Based on Passenger Nationality

☒ Use VCC

☒ Allow multiple payment methods

☒ Loading time ☐ Check-In ☐ Check-Out ☐ Booking

Notice
Setting of 3 options are disabled. The VCC clear card information is no longer displayed in an email. The email contains a link to supplier extranet. The supplier has to login to supplier extranet using MFA, to retrieve VCC card details.

Send Credit Card details by * ☒ Email ☐ Links ☐ Supplier Extranet ☒ Enrolled in MFA & allowed to view VCC details in Supplier Extranet

NOTES AND DOCUMENTATION SECTION

CONTRACTS & SPECIAL OFFERS

If a hotel has a Direct Contract with WebBeds, the signed contracts between WebBeds and the hotel can be found in the Notes and Documentation section. The contracts loaded in this section are chronologically arranged from the most recent contract. Clicking on the Download button will allow the download of the signed contract that was loaded by the contracting team.

Supplier Documentation

Date	User Name	Branch	Subject	Note	Actions
Sep 14, 2023 08:12:54	Prisca Yuspandi	WebBeds FZ LLC	Promotion - 795904	APAC-Q42023-MIC RO Imm - 15 Dec 2023	Download
Sep 12, 2023 10:52:29	Prisca Yuspandi	WebBeds FZ LLC	Promotion - 795904	APAC-Q42023-MIC Imm - 15 Dec 2023	Download

The downloaded file format will be dependent on what was uploaded by the contracting team. This could either be the actual email sent by the hotel inclusive of the contract, or just the PDF file of the contract itself.

Here is an example of how a contract of a hotel with WebBeds would look like, in the DOTWConnect platform.

ROOM RATES			
RESIDENCE TYPE	Room Allocation	CONTRACTED RATES	
		Room Only	With breakfast
STUDIO EXECUTIVE	Free sale	PHP 5,800.00	PHP 6,300.00
ONE-BEDROOM SUITE	Free sale	PHP 6,800.00	PHP 7,300.00
TWO-BEDROOM SUITE	subject to availability	PHP11,500.00	
THREE-BEDROOM SUITE	subject to availability	PHP14,000.00	

Above Contracted Rates are:

- ☐ INCLUSIVE of Government Taxes, Service Charge.
- ☐ Applicable for new bookings only;
- ☐ Net/non-commissionable.
- ☐ Applicable to FIT leisure business only and will not apply to commercial business, corporate accounts, trade delegations, conventions, incentives or conferences;
- ☐ Not valid for group bookings. A group consists of 10 or more paid rooms. A separate group rate proposal along with group terms & conditions will be quoted on an ad hoc basis;

In addition to viewing the yearly contract with the hotel, any additional special offers that the hotel has given WebBeds can also be viewed here, if these are uploaded into this section. A user can differentiate if the file is for the contract or the special offer by looking at the “Subject” column.

Supplier Documentation

Date	User Name	Branch	Subject	Note	Actions

OTHER SECTIONS OF THE ACCOMMODATION SUPPLIER PROFILE

The remaining section tabs of the accommodation supplier profile allows you to view additional information about the hotel, which can also be seen once you view the hotel’s profile in the New Booking module.

[Transportation & Directions](#) [Amenities](#) [Business Features](#) [Leisures & Sports](#) [Messages](#)

Transportation & Direction tab: gives information regarding the distance of the hotel from nearby transportation areas or ports.

Amenities tab: shows a list of amenities that the hotel advised they have available.

Business Features tab: shows the list of business amenities and equipment that the hotel offers.

Leisure & Sports tab: shows the list of leisure and sport amenities that the hotel offers.

Messages tab: shows internal messages documented by the loading/content team regarding the hotel.

TRANSFER AND TOUR SUPPLIERS

TOUR AND TRANSFER SUPPLIER PROFILES

FILTERING TRANSFER AND TOUR SUPPLIER PROFILES

There are several fields that can be used to filter the Transfer or Tour Supplier profiles in DOTWConnect. The most used fields to filter are:

Branch	-- All Branches --		▼
Country	-- All Countries --		▼
City	Start typing a city name		⚡
Status	-- All --		▼
Supplier Name	Contains ▼	Start typing a tour supplier name	⚡

- **Via Country** - Country where the supplier is located
- **Via City** - City where the supplier is located
- **Via Status** - Status whether the supplier is Live (or Active) or Non-Live (or Non-Active)
- **Via Supplier Name** - Name of the specific supplier, whether it is through transfers or tours

GENERAL INFORMATION

Once an tour or transfer supplier's profile is loaded, the first section that will be seen would be the General Information Section. This section will present the general information regarding the specific accommodation supplier.

Supplier Name *	BLUE HORIZONS TRAVEL AND TOURS		
Company/Management Name *	BLUE HORIZONS TRAVEL AND TOURS		
WebBeds Contract Type *	Direct ▼		
Supplier Is *	3rd Party ▼		
Preferred *	No ▼

Password *	Pbdk1064		
Confirm Password *	Pbdk1064 Send Me and Password		
Currency *	USD - US Dollars		
Account Manager *	Supara Kongthongsamut (Ms.) - Supara Kongthongsamut - WebBeds FZ LLC		

This section will allow you to view the:

- Physical address of the supplier
- The main currency the supplier accepts as form of payment
- The WebBeds' contracts manager handling the supplier

INTERNAL INFORMATION

The internal information section gives you access to the name, contact details and email address of WebBeds' main contact directly with the supplier.

General Manager First Name *	Gregor	
Direct Telephone *	2	89885032
	(City Code)	(Number)

General Manager Last Name *	Zajc	
Direct Fax *	2	89885001
	(City Code)	(Number)

PAYMENTS SECTION

The payments section gives you access to the form of payment that the supplier accepts for their booking.

- If the supplier accepts VCC, the Use VCC icon will show Yes.
- If the supplier accepts bank transfer, the Use VCC icon will show No.

Payments

Use VCC ☐ No ☒

DOTW COMMUNICATION

The DOTW communication section gives you access to the email address of the supplier where any LPOs to the supplier will be sent. If there are any other email address that need to be cc'd in the LPOs sent, these will be indicated in this section, as well.

Reservations Email *

Reconfirm Email: *

TOUR AND TRANSFER SERVICES

FILTERING TRANSFER AND TOUR SERVICES

There are several fields that can be used to filter the services offered by Transfer or Tour suppliers in DOTWConnect. The most used fields to filter are:

Branch

Country

City

Status

Supplier Name

- **Via Country** - Country where the service is located
- **Via City** - City where the service is located
- **Via Status** - Status whether the supplier is Live (or Active) or Non-Live (or Non-Active)
- **Via Supplier Name** - Name of the specific supplier, whether it is through transfers or tours

If you have searched via the Country or City, the system will first give you a list of suppliers for that location. The suppliers who are live in the system will show first on the list, followed by the suppliers who are non-live in the system.

Click on the Service button to show the list of services that the supplier offers.

Status	Name	Country	City	Action
Live	BLUE HORIZONS TRAVEL AND TOURS	PHILIPPINES	MANILA	Services
Live	UNI ORIENT TRAVEL	PHILIPPINES	ORTIGAS	Services

If you have searched via a name of the supplier or one you have clicked the services button (if you had initially searched via location), the platform would show you the list of available services.

Status	Transfer Name	Type	Starting Country	Starting City	Action	Rates
Live	PRIVATE STANDARD CAR SERVICE - 2 PAX	Private	PHILIPPINES	MANILA	View	Rates
Live	PRIVATE STANDARD CAR SERVICE - 2 PAX	Private	PHILIPPINES	MANILA	View	Rates

VIEW AND RATES BUTTON:

Clicking on the “VIEW” button: gives you access to view a summary of the service, without going through the new booking section.

Clicking on the “RATES” button: gives you access to check on the rates of the service for a particular date, without going through the new booking section.

CUSTOMERS TAB

The Customers Tab will allow for the search for and viewing of the profiles and information of live customers of DOTWConnect.

SEARCHING FOR CLIENT PROFILES

The most common way that a client profile is pulled up in DOTWConnect is via searching for the Company Name option. However, there are also other options available to pull up client profiles, including searching:

- Via Country:** Country where the customer/client is located.
- Via City:** City is where the customer/client is located.
- Via Account Manager:** A user can search for a list of customers handled by a specific WebBeds Sales Manager/Business Development Manager.

CUSTOMER SETUP TAB

The Customer Setup tab gives access to specific information of the customer/client via the following sections.

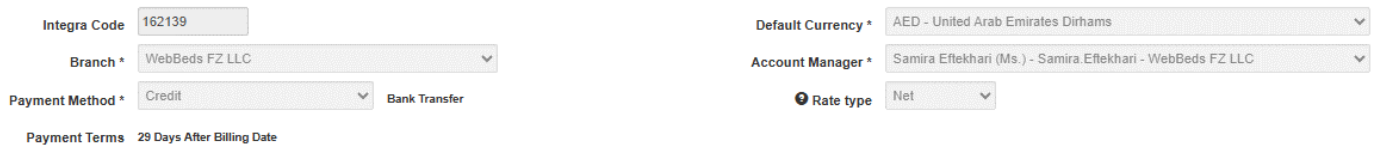

COMPANY DETAILS

This top-most section of this tab gives information regarding the office address of the client, website, and nature of business, etc.

CUSTOMER ACCOUNT MANAGEMENT

This section gives information to three very important information about the client, namely:

- Default Currency:** the main, default currency the client uses to pay WebBeds for their bookings.
- Payment Method:** the agreed payment method of the client to WebBeds for their bookings (ex: Pre-pay, Credit, Credit Card).
- Account Manager:** The WebBeds Sales Manager who is handling the client/customer.

The screenshot shows a form with the following fields:

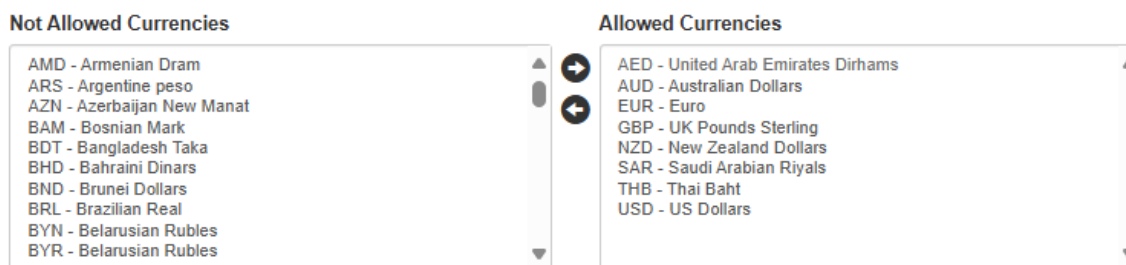

- Integra Code:** 162139
- Branch:** WebBeds FZ LLC
- Payment Method:** Credit (selected), Bank Transfer
- Payment Terms:** 29 Days After Billing Date
- Default Currency:** AED - United Arab Emirates Dirhams
- Account Manager:** Samira Eftekhari (Ms.) - Samira.Eftekhari - WebBeds FZ LLC
- Rate type:** Net

CREDIT LINE DETAILS

This section gives information regarding the Client's Credit Line, Available Credit and Billing limit. This section would only be available if the payment method of the client to WebBeds is through credit facility.

ALLOWED CURRENCIES

This section gives access to the currencies that the client can use (other than the default currency) and are not able to use to pay for their bookings. By default, clients pay for their bookings via their set default currency. They have an option, however, to choose to pay using another currency available to them.

The screenshot shows two columns of currencies:

- Not Allowed Currencies:**
 - AMD - Armenian Dram
 - ARS - Argentine peso
 - AZN - Azerbaijan New Manat
 - BAM - Bosnian Mark
 - BDT - Bangladesh Taka
 - BHD - Bahraini Dinars
 - BND - Brunei Dollars
 - BRL - Brazilian Real
 - BYN - Belarusian Rubles
 - BYR - Belarusian Rubles
 - CAD - Canadian Dollars
- Allowed Currencies:**
 - AED - United Arab Emirates Dirhams
 - AUD - Australian Dollars
 - EUR - Euro
 - GBP - UK Pounds Sterling
 - NZD - New Zealand Dollars
 - SAR - Saudi Arabian Riyals
 - THB - Thai Baht
 - USD - US Dollars

THE MAIN USER INFORMATION

The main user information is the tab where the contact information of the client's main user can be seen. While it has a contact information available such as a phone number and email address, this should not be what is used to contact them. Rather, the email address or contact information available in Freshdesk should be used.

ACCOMMODATION BOOKING SETUP

The Accommodation Booking Setup section will give information on the specifications and restrictions a client has whenever they are booking an accommodation booking with DOTWConnect. This section will give a user access to:

ACCOMMODATION BOOKING SETUP

This section gives access to information whether the system will return availability to the client, even if their travel dates is lower than the minimum night stay requirement of the hotel. This section will also tell if the client is required to give the guest nationality and/or country of residence, at the time of booking.

☒ On minimum stay

Guest Nationality / residence requirement *

ACCOMMODATION BOOKING CHANNELS

This section gives access to information regarding the booking channels/suppliers that the client can get availability from. This is managed by the Sales Manager handling the client.

Allowed Booking Channels

AKUCtripSensitiveWbConnect
 AKUCtripWbConnect
 AccorOBCWbConnect
 AccorOBCWbConnect - Accor Hotels
 ActiveMetrics

Not Allowed Booking Channels

AKUChinaTPSWbConnect
 AKUDCWbConnect
 AKUHKDLWbConnect
 AKUTPSWbConnect
 AOT

RESTRICTED RATES

This section gives access to information regarding which kinds of restricted rates can the customer/client book. This is managed by the Sales Manager handling the client.

Restricted Rates

☒ Is this Customer allowed to book APR bookings?

Is this customer allowed to book APR bookings without credit card?

☒ Is this customer allowed to book Non-Refundable bookings?

MARK UP & DISCOUNTS

This section gives access to information regarding any additional mark-ups or discounts that the customer is given, for what services, and what travel period it is valid. If there is none that applies for the customer/client, then these sections would show blank.

ADDITIONAL MARKUPS EXAMPLE

Additional markups

Travel Period	Markup	Services
May 8, 2022 - May 31, 2022	1.00%	Hotel Transfer Apartment Tour
Apr 7, 2022 - Apr 24, 2022	0.50%	Hotel Transfer Apartment Tour

DISCOUNTS EXAMPLE

Discounts

Travel Period	Discount	Services
Jan 10, 2022 - Jan 25, 2022	1.00%	Hotel Transfer Apartment Tour
Dec 1, 2021 - Dec 31, 2021	0.50%	Hotel Transfer Apartment Tour

XML ACCESS

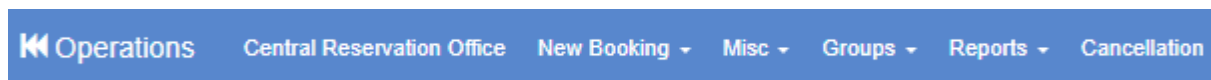

This section gives access to view and confirm if a specific customer/client profile is connected to use through XML connectivity/documentation. We can see this on the first row, indicating "Access to XML Documentation," where if it says YES, then the specific customer profile is connected to DOTWConnect through XML connectivity.

XML Access

Access to XML Documentation	☐	No
Has XML Access to DEMO Server?	☐	No
Has XML Access to LIVE Server?	☒	Yes

OPERATIONS TAB

The Operations Tab is the most used section of DOTWConnect, as this is where existing bookings are viewed and actioned, new bookings are made and reports regarding bookings can be run. Clicking on the Operations Link will give access to the different functionalities available, such as:

Central Reservations Office: gives access to view, modify and action existing accommodation, transfer, and tour bookings in DOTWConnect, as well as adding additional bookings to an existing itinerary for a client, if requested.

New Booking: gives access to create new Accommodation, Tour and Transfer bookings for a client.

Misc: gives access to create a new Miscellaneous booking, as well as amend or cancel an existing Miscellaneous booking. You can also view the available list of Miscellaneous suppliers, in this section.

Reports: gives access to pull up reports about existing DOTWConnect booking, based on their travel date, booking status, hotel/supplier name, among others. This report is used when there is a need to run a report of bookings with pending hotel confirmation numbers or bookings with issues.

Cancellation: gives access to run the Manual Cancellation functionality. Access to this functionality is dependent on the access level granted.

Groups: accessed only by the groups department, which allow the Online Groups team to create a new group request or booking.

BOOKING SEARCH

Clicking on the Central Reservations Office will give access to the booking search functionality of DOTWConnect. While you can use any of the search filters available to pull up a list of bookings, we will focus on the most common ways to search for a booking in DOTWConnect.

SEARCH VIA DOTW REFERENCE NUMBER

The most used way to search for a booking in DOTWConnect would be via the DOTW Reference number, where you can use either the DOTW Itinerary Number or DOTW Booking Reference Number in this search function.

Clicking on the Central Reservations Office link will lead to the Simple Filter Fields. In the right most column, a user will see a green highlighted box. This is where the DOTW Ref # can input, then one can press Enter or the Search button to pull out the booking.

The screenshot shows the DOTWConnect booking search interface. The 'From Date' is set to July 23, 2024, and the 'To Date' is set to July 30, 2024. The 'Filter Dates By' dropdown is set to 'Travel Date'. The 'Product Type' is set to 'All Booking Types', 'Booked From' is 'All Booking Sources', 'Customer Type' is 'All Customer Types', 'Paid Status' is 'All Bookings', 'Branch' is '-- All Branches --', 'Booking Status' is 'All Bookings', 'Source Type' is 'All Source Types', 'Pax First Name' is empty, 'Pax Last Name' is empty, and 'Service Name' is 'Search by Hotel, Tour or Transfer name'. On the right side, the 'Bookings Need Action' dropdown is set to 'All Bookings', and the 'DOTW Ref #' field is highlighted in green. The 'Rate Type' dropdown is set to 'All Rates', and the 'Booking Channel' is set to 'All'.

SEARCH VIA GUEST NAMES & TRAVEL DATES

The next most common way to search for a booking in DOTWConnect would be via the Guest's First Names and Travel Dates.

Once in the Central Reservations Office, the travel dates can be entered in their respective FROM DATE and TO DATE fields in the topmost row. If the exact travel date of the guest is not available, an appropriate date range may be used.

Afterwards, the guests' names can be entered in the PAX FIRST NAME and PAX LAST NAME fields, located in the second to the lowest row. Pressing on Enter or the Search button will pull out the booking.

The screenshot shows the DOTWConnect booking search interface. The 'From Date' is set to November 3, 2024, and the 'To Date' is set to November 16, 2024. The 'Filter Dates By' dropdown is set to 'Travel Date'. The 'Product Type' is set to 'All Booking Types', 'Booked From' is 'All Booking Sources', 'Customer Type' is 'All Customer Types', 'Paid Status' is 'All Bookings', 'Branch' is '-- All Branches --', 'Booking Status' is 'All Bookings', 'Source Type' is 'All Source Types', 'Pax First Name' is 'Marcel', 'Pax Last Name' is 'Oilean', and 'Service Name' is 'Search by Hotel, Tour or Transfer name'. On the right side, the 'Bookings Need Action' dropdown is set to 'All Bookings', the 'DOTW Ref #' field is highlighted in green, the 'Rate Type' dropdown is set to 'All Rates', and the 'Booking Channel' is set to 'All'. Red arrows point to the 'From Date', 'To Date', 'Pax First Name', and 'Pax Last Name' fields.

SEARCHING VIA SUPPLIER REFERENCE or CUSTOMER REFERENCE NUMBER

Another way to search for a booking in DOTWConnect would be searching either via the Supplier Reference or Customer Reference numbers, depending on what information you would have available.

To do this, the travel dates would need to be entered in the FROM DATE and TO DATE fields. Otherwise, an appropriate date range may be used.

Once the travel dates are input, the Advanced Filters link in the top right part of the page needs to be clicked to expand the additional search fields.

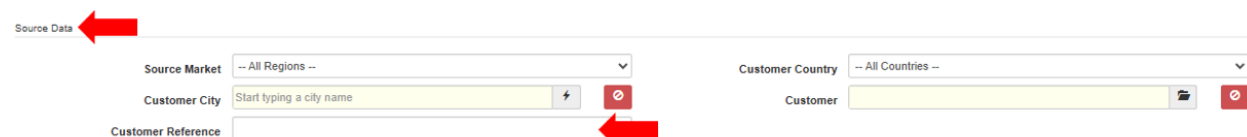

SEARCHING VIA SUPPLIER REF

If you have the Supplier Reference number available, you would need to scroll down the page until the Service Data section is seen. On the last row in the right would be the Supplier Reference box, where the Reference number can be input.

SEARCHING VIA CUSTOMER REF

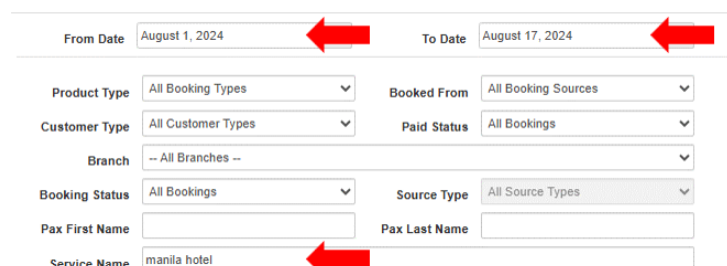

If you have the Customer Reference number available, you would need to scroll down the page until the Source Data section is seen. On the last row in the left would be the Customer Reference box, where the Customer reference number can be input. Once these are done, pressing enter or the Search button will pull out the booking.

SEARCHING VIA TRAVEL DATES AND HOTEL NAME

A new feature recently added is the ability to search for a DOTW booking, using the travel dates and the hotel's name. To do this, the travel dates would need to be entered in the FROM DATE and TO DATE fields. Otherwise, an appropriate date range may be used.

Afterwards, the hotel's name can be entered in the Service Name box. Pressing on Enter or the Search button will pull out the list of bookings for that specific hotel, for this specific travel dates.

SEARCHING VIA TRAVEL DATES AND BOOKING STATUS

From Date: July 23, 2024 To Date: July 30, 2024

Product Type: All Booking Types Booked From: All Booking Sources

Customer Type: All Customer Types Paid Status: All Bookings

Branch: -- All Branches --

Booking Status: All Bookings Source Type: All Source Types

Pax First Name: Pax Last Name:

Service Name:

Home

You can also search for a list of bookings via the travel dates and the booking status. Once you have input the travel dates in the FROM DATE and TO DATE fields,

Click on the Booking Status field to show the drop-down list of the available booking statuses. Choose the booking status you would like to search and click on Enter or the Search button to pull out the list of bookings.

SEARCHING VIA TRAVEL DATES AND BOOKING CHANNELS (Kinds of Supplier)

You can also search for a list of bookings via the travel dates and a specific booking channel. You must start first with inputting the travel dates in the FROM DATE and TO DATE fields.

Afterwards, choose the specific booking channel that you would like to search a list of bookings for. By default, all booking channel types are being filtered.

If you would like to limit your search to a specific booking channel, you can click on the drop-down arrow beside the Booking Channel row (located in the lower right part of CRO) and choose the specific booking channel you would like to search for. Click on Enter or the Search button to pull out the list of bookings for that specific booking channel chosen.

From Date: July 23, 2024 To Date: July 30, 2024 Filter Dates By: Travel Date

Product Type: All Booking Types Booked From: All Booking Sources Bookings Need Action: All Bookings

Customer Type: All Customer Types Paid Status: All Bookings DOTW Ref #

Branch: -- All Branches --

Booking Status: All Bookings Source Type: All Source Types Rate Type: All Rates

Pax First Name: Pax Last Name: Booking Channel: All

Channel Managers:

- AvailproConnect
- AxisRooms
- BoccoGroup
- Bookandlink

You also have the ability to filter the booking channels to the specific supplier (if booking channel is either Dynamic, Channel Manager, or Third Party.) You can do this by expanding the list of that specific booking channel and choosing only the specific supplier.

NEW BOOKING CREATION

In DOTWConnect, there are two types of bookings that can be created for a client: New Bookings and Offline Bookings.

New Booking Misc

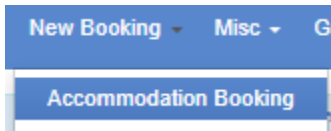

New Booking creation allows the creation of a booking for a client by a WebBeds Admin user via the different availabilities with our different suppliers available in the platform, like how a client makes a booking in their P.O.S. (Point of Sale).

Offline booking creation via the MISC booking functionality, on the other hand, allows the creation of a manual booking, based on the rates and availability that are manually coordinated or taken from a hotel or supplier.

NEW BOOKING

ACCOMMODATION BOOKING PROCESS

To create a New Accommodation Booking, the NEW BOOKING link in the Operations section would need to be clicked. This will pull down a drop-down list, showing the available services to book. A user would need to click on ACCOMMODATION BOOKING.

This will load the next page, where the customer's profile would need to be input. To do this, the client's name needs to be encoded in the COMPANY NAME field and the correct customer profile needs to be chosen from the list of the customers that would pop up. Once the correct profile is found, the FILTER CUSTOMERS button can be clicked.

Company Name  

Cash - Aphrodite Travel Training Test Agent AA123 - DUBAI 

Filtering the customers profile would allow one to see all the DOTWConnect user profiles the client has with us. Clients would usually have multiple user profiles under their accounts.

If the client has a specific preference under which account the booking is to be placed, the specific user account mentioned should be the one chosen. On the other hand, if the client did not specify which user account to use, the profile tagged as MAIN USER can be chosen.

		Consultant Name	Consultant Email	XML Access	Payment Type	Actions
Main User		 John Smith - 5%	agasco@robiquity.com	NA	Prepay	 
Internal		 Marina Sharp	JT_travel-agent.training@webbeds.com	NA	Prepay	

Once the client's profile has been chosen, the next page will allow one to input the search filters for the accommodation booking requested. The first row will allow for the DESTINATION for the booking to be input.

Destination  

Destination

Check-In Date

Number Of Nights

Children

The DESTINATION filter will allow for the search via a Specific Destination, Hotel Name, Location or Landmark.

Subsequently, if a specific destination is input, the DOTWConnect platform will present recommendations, such as:

- Similar named cities,
- Recommended hotels, and
- Recommended landmarks in the destination.

One may choose from the recommendation given by the system or search for a specific destination.

The row below Destination would allow to input the CHECK-IN and CHECK-OUT dates for the booking searched. The check-out date can be changed automatically, by adjusting the Number of Nights from the drop-down list.

Check-In Date  Check-Out Date 
 Number Of Nights

Adults	Children	Children Ages					
2	0	3	3	3	3	3	3
		3	3	3	3	3	3

The next information that can be adjusted would be the OCCUPANCY of a booking. By default, a DOTWConnect new booking search would initially be for double occupancy but can be changed accordingly to the actual occupancy that needs to be booked.

If there are children included in the booking, the exact ages of the children, at the time of the stay, will be required to be input. DOTWConnect will automatically give the appropriate rates, based on the children's age as well as the hotel's contract with us.

Board Basis

The next information that can be filtered would be the BOARD BASIS or Meal Plan requested for the booking.

By default, a DOTWConnect new booking search initially would place the Board Basis under Best Available (or all available meal plans). This, however, can be changed accordingly to the actual meal plan requested by the client.

Passenger Residence	Passenger Nationality
PHILIPPINES	PHILIPPINES

The next information that can be filtered would be the PASSENGER'S COUNTRY OF RESIDENCE & NATIONALITY. This needs to be accurately requested from the client, to ensure the accurate market-specific rates are given during booking.

Clicking on this BLUE BUTTON would allow for the searching of multiple rooms within the same destination. The DOTWConnect platform would add an additional row in the filter, allowing the input of the occupancy, board basis and guest nationality & residence for the additional rooms.

Adults	Children	Children Ages	Board Basis	Passenger Residence	Passenger Nationality	
2	0	3 3 3 3 3	Best Available	PHILIPPINES	PHILIPPINES	+
2	0	3 3 3 3 3	Best Available	PHILIPPINES	PHILIPPINES	x

A limitation of this type of multiple room search is that both rooms would need to be made in the same hotel and for the same travel dates. In the event a client would like to book multiple hotel rooms but in different hotels or dates, multiple individual bookings in an itinerary would need to be created.

Above the Search button gives a user option to filter booking results based on:

Star Rating	All	A.	STAR RATING
Price Currency	AED - United Arab Emirates Dirhams	B.	PRICE CURRENCY
Booking Channel	All	C.	BOOKING CHANNEL (Supplier Type)

By default, the PRICE CURRENCY would be the main currency that the client has chosen to pay for their WebBeds bookings. However, if the client would like to pay for the booking using a different currency, the drop-down box for Price Currency can be clicked to see what the available currencies are to change to.

It is only feasible to change the currency for the Selling Price at the time of the booking. Once it has been booked, the selling price can no longer be changed.

Availabilities from ALL kinds of booking channels/suppliers are shown in DOTWConnect, by default, when searching for a new booking. It is possible to search for specific availabilities only when making a new booking.

Options to filter the BOOKING CHANNEL/Suppliers are:

Booking Channel ▼ ☐ All

- ▶ ☐ Offline Contracts
- ▶ ☐ Direct & Dynamic Channels
- ▶ ☐ Third Party Channels
- ▶ ☐ Channel Managers

▼ ☐ **Direct & Dynamic Channels**

- ▶ ☐ Dhisco
- ☐ H10WbConnect
- ▶ ☐ HBSi
- ☐ HiltonOBCWbConnect

A. Offline Contracts: DC and DMC

B. Direct & Dynamic: Dynamic (Hotel Chain)

C. Third Party: Third Party Suppliers and Intercompany

D. Channel Managers

Further, clicking on the arrows beside the Booking Channel will expand the list, allowing the ability to filter down to the specific Supplier Name during Booking Search.

This functionality is most useful when searching for availabilities for other hotels during relocation tickets.

Once all appropriate booking search filters have been adjusted and input, the Search button may be clicked. The DOTWConnect system will display, in the lower part of the page, the results based on the information filtered.

Viewing 1 - 10 of 315 Accommodation Unit(s) [returned in 15.43 seconds]

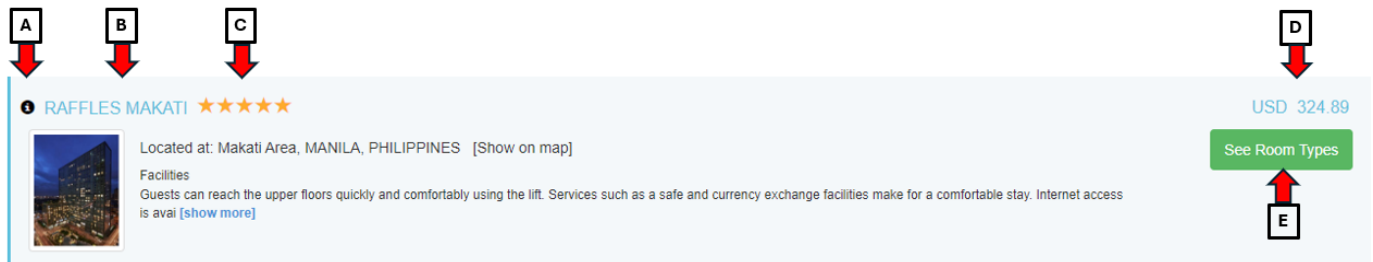

DOTWConnect will, by default, chronologically sort the results first based any hotels in preferred status, followed by the hotels with lowest nightly selling price, as of real-time. If needed, the results can further be sorted via:

▲ Star Rating ▼
▲ Accommodation Name ▼
▲ Preferred ▼
▲ Suites ▼
▲ Price ▼
▲ Luxury ▼

- Star Rating: sorts the results by the star rating of the hotels
- Accommodation Name: sorts the results by the name of the hotels
- Preferred: sorts the results by showing the preferred hotels first
- Suites: sorts the results by showing the hotels that offer suites as availability
- Price: sorts the results via the nightly rate of the hotels, whether from lowest or highest nightly rate
- Luxury: sorts the results based on the luxury of the hotels

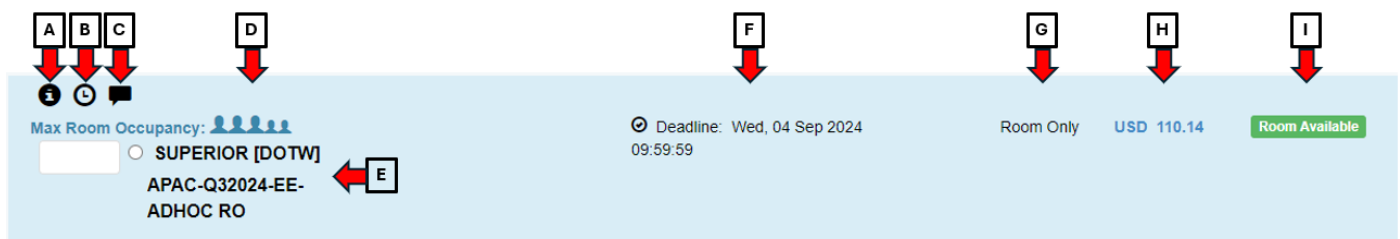

Accommodation search results would present a summary of the hotel and its availability. The information given would include the:

- A. Accommodation Info, which shows information and pictures of the hotel
- B. Hotel Name
- C. Hotel's Star Rating
- D. Lowest Nightly Selling Price for the specific hotel
- E. See Room Types button, which allows the available room types and total selling prices to be seen

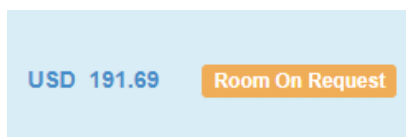

When a WebBeds user is quoting a client, it is very important that our team member does not give the lowest nightly selling price as this is not indicative of the number of nights and chosen room type of the client. The team member would need to click on the SEE ROOM TYPES button first, search for the requested room type and it will show the total selling price for the whole stay.

Clicking on the See Room Types button will allow DOTWConnect to show the available rooms for the hotel, their cancellation deadlines, and the total selling price. A team member will have access to this information, when looking at the room availability:

- Room Information:** gives access to the room information given by the hotel/supplier. The information is mostly basic information only. Thus, it's best to check in the hotel's website or with the supplier on the specific hotel room's specification. This section will also show the maximum adults, children, and occupants in the room.
- Cancellation & Amendment Policies:** gives access to the cancellation/amendment deadline and penalties that apply for the booking. Dates and times in the policy are in the client's time zone.
- Rate Notes:** gives access to the hotel's rate or tariff notes.
- Max Room Occupancy:** gives information regarding the maximum room occupancy of a room. This may or may not show in this section, depending on which supplier the rate and availability was taken from.
- Room Name and Type:** gives information about the room name and the supplier the booking was booked from.
- Cancellation Deadline:** gives information regarding the cancellation deadline for a booking. For prepaid-cash clients, this would also be the payment deadline for the booking.
- Board Basis:** gives information regarding the board basis/meal plan included in the booking.
- Total Selling Price:** gives information regarding the total selling price for the booking, inclusive of all nights, taxes, and fees.
- Room Availability:** gives information if the ROOM is AVAILABLE or if the ROOM is ON REQUEST.

If a room is showing as ROOM ON REQUEST, it is important to check first with the hotel if they can accommodate the booking. If the client insists to make the booking, the client needs to be clearly informed that the room is on- request, and the hotel may or may not accept the booking.

Once a user has found the room that would like to be booked, the tick circle beside the room name would need to be clicked. Afterwards, the PROCEED TO BOOKING button, at the end of the availability, would need to be clicked.

1st room - STUDIO ROOM 1 BED [DOTW]

A pop-up box will show, wherein the names of the guests, their bedding preference, and special requests (if any) would need to be input. The number of guest names that will need to be input depends on the kind of supplier. Some suppliers require only the lead guest's name, while others require all guests' names.

A user will need to ensure that only English characters are used. There should be no special characters used and that there should be no spaces at the beginning or end of the names.

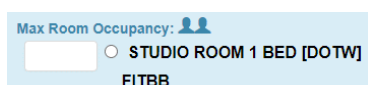

Any special requests noted at the time of the booking will be forwarded to the hotel via the LPO. However, as with any special request, these are subject to availability, at the time of the check-in.

Once all the guest names and preferences are correctly input, and the terms and conditions are read, the green BOOK ROOMS button can now be clicked.

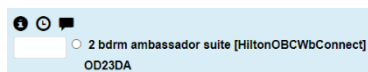

It will lead DOTWConnect to make the booking itself. Once the booking is created, it will bring the user to the full booking summary.

HOW TO KNOW SUPPLIER TYPES WHEN MAKING A NEW BOOKING

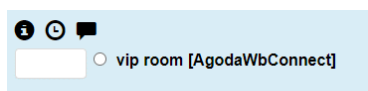

At the time of the booking search, MyAdmin will show what supplier the booking's availability and rate were taken from. The supplier type and supplier name can be known by looking what follows the room name.

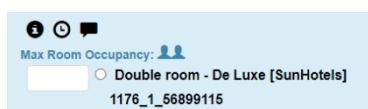

DIRECT CONTRACT WITH HOTEL: Room name only shows the room name itself.

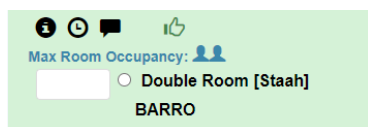

DYNAMIC/HOTEL CHAIN: Room name is followed with the hotel chain's dynamic system in brackets.

THIRD PARTY: Room name is followed with the third party's name in brackets.

INTERCOMPANY: Room name is followed by the Intercompany's brand name in Brackets

CHANNEL MANAGER: Room name is followed by the Channel Manager's name in brackets

HOW TO KNOW IF BOOKING IS RESTRICTIVE OR AFTER DEADLINE

A WebBeds user can know, prior to booking, if a room or rate is before deadline, after deadline or restrictive. This can be seen by looking at Cancellation Deadline information, seen in the middle part of the room availability. The dates and time in the Cancellation Deadline section are in the client time zone.

A room is BEFORE DEADLINE if a WebBeds team member can still see the cancellation/amendment deadline in the middle section of the room availability.

A room is AFTER DEADLINE if a WebBeds team member can see a red WITHIN DEADLINE message in the middle section of the room availability. This means that if the booking is made, cancellation penalty and charges will apply. The actual cancellation deadline and penalty can be seen by clicking on the CANCELLATION & AMENDMENT POLICIES icon in the top left.

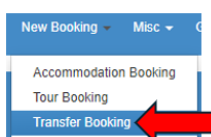

A room is RESTRICTED if a WebBeds team member can see a full red box in the middle, saying either STRICTLY NON-REFUNDABLE or RESTRICTED RATES. When a rate is restricted, once booked, no cancellation or amendments are allowed. Currently, to limit possible issues to our CS team members, Restricted Rates can only be booked by clients on their direct system. WebBeds Team members are unable to make booking with Restricted Rates.

TRANSFER BOOKING PROCESS

To create a New TRANSFER Booking, the NEW BOOKING link in the Operations section would need to be clicked. This will pull down a drop-down list, showing the available services to book. The user would need to click on TRANSFER BOOKING.

This will load the next page, where the customer's profile would need to be input. To do this, the user would need to encode the client's name in the COMPANY NAME field and choose the correct customer profile from the list of the customers that would pop up. Once the correct profile is found, one can now click on the FILTER CUSTOMERS button.

Company Name  

Cash - Aphrodite Travel Training Test Agent AA123 - DUBAI

Filtering the customers profile would allow one to see all the DOTWConnect user profiles the client has with us. Clients would usually have multiple user profiles under their accounts.

If the client has a specific preference under which account the booking is to be placed, the specific user account mentioned should be the one chosen. On the other hand, if the client did not specify which user account to use, the profile tagged as MAIN USER can be chosen.

		Consultant Name	Consultant Email	XML Access	Payment Type	Actions
Main User	Live	John Smith - 5%	agasco@robiquity.com	NA	Prepay	Choose
Internal	Live	almira aquino - 5%	almira.aquino@webbeds.com	NA	Prepay	Choose

Once the client's profile has been chosen, the next page will allow a WebBeds user to input the search filters for the transfer booking needed to be booked. The first row will allow for the PICKUP FROM and DROP OFF TO Information to be input.

Pickup From The information indicated in the Pickup from and DropOff To will allow DOTWConnect to automate which transfer availability to offer.

DropOff To

If an arrival transfer needs to be booked, then:

Pickup From: should be from the name of the Airport the guest will be arriving in; while
DropOff To: should be the name of the hotel the guest will be staying at.

Pickup From

DropOff To

Subsequently, if it is a departure transfer that needs to be booked, then:

Pickup From: should be the name of the hotel the guest is staying at; while
DropOff To: should be the name of the airport that the guest will be departing from.

Pickup From

DropOff To

Once the Pickup From and DropOff To Fields are filled out, the filters in the lower part of the page will automatically adjust, depending on what kind of transfer is being booked.

If it is an ARRIVAL TRANSFER that is being booked, a WebBeds user will be requested to input the FLIGHT ARRIVAL DATE and TIME, together with the TOTAL # OF TRAVELLERS.

Flight Arrival Date Arrival Time

Number Of Adults Number Of Children

On the other hand, if it is a DEPARTURE TRANSFER that is being booked, a WebBeds user will be requested to input the FLIGHT DEPARTURE DATE and TIME, together with the TOTAL # OF TRAVELLERS. The Flight Arrival or Departure Time that would need to be input should be based on the flight itinerary of the guests.

Flight Departure Date

Departure Time

Number Of Adults Number Of Children

Transfer Type

Price Currency

Scheduled

Private

Meet and Greet

Package

If the client specified a specific type of transfer that the guest would like to book, it is possible to filter the results via the Transfer Type filter. A WebBeds user can filter for Scheduled (Group), Private, Meet and Greet or Package transfers.

If there is no preference mentioned, ALL TRANSFER TYPES can be chosen.

By default, the PRICE CURRENCY would be the main currency that the client has chosen to pay for their WebBeds bookings. However, if the client would like to pay for the booking using a different currency, a WebBeds user can click on the drop-down box for Price Currency to see what the available currencies are to change to.

It is only possible to change the currency for Selling Price during the time of the booking. Once it has been booked, it is not possible to be changed.

Once all appropriate booking search filters have been adjusted and input, the Search button may be clicked. The DOTWConnect system will display, in the lower part of the page, the results based on the information filtered. The search results can also be sorted chronologically by price.

Price

Viewing 1 - 1 of 1 Transfer(s)

Transfer search results would first present a summary of the service and its availability, which includes the:

- Transfer Information - gives a user access to the important information about the transfer, such as Maximum Supplier Wait Time, Baggage Allowance, Transfer meeting point and cancellation policy, among others.
- Transfer Service Name
- Transfer Type
- Lowest selling price available for the service
- Get Transfers button, which will expand and present all types of automobiles available for the service.

Get Transfers

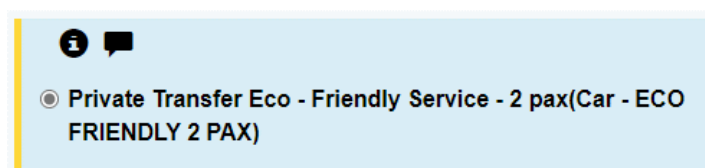

Clicking on the GET TRANSFERS button will allow DOTWConnect to show the available automobiles for the transfer service, their cancellation deadlines, and the total selling price. A team member will have access to this information, when looking at the transfer availability:

- Transfer Information: gives a user access to the information about the service, including the maximum capacity of the automobile and allowed luggage/baggage capacity.
- Rate/Tariff Notes: gives a user access to the cancellation/amendment deadline and penalties that apply for the booking. In addition, additional important policies from the supplier, such as baggage allowance, extra luggage accepted and required documents for the transfer are noted here, as well.
- Transfer Name and Type: gives a user information about the transfer's name and type.
- Cancellation Deadline: gives a user information regarding the cancellation deadline for a transfer booking, which is in the client's time zone.
- Total Selling Price: gives a user information the total selling price for the transfer booking, inclusive of all taxes and fees.
- Service Availability: gives a user information if the transfer is AVAILABLE or ON REQUEST.

If a transfer is showing as ON REQUEST, it is important to inform the client needs to be these needs to be coordinated first with the transfer supplier if this can be confirmed, prior to booking. Most suppliers may confirm the booking but require specific information about the transfer prior to confirming.

Once a team member has found the transfer that would like to be booked, the tick circle beside the transfer's name would need to be clicked. Afterwards, the PROCEED TO BOOKING button, at the end of the availability, would need to be clicked.

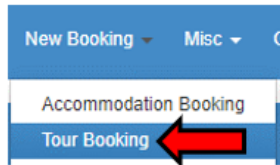

A pop-up box will show, wherein the user will need to input the names of the guests, their pickup and drop off details, and any special requests for the transfer, if any. Depending on how many guests are being booked and the transfer's maximum occupancy, a team member may be allowed to book multiple vehicles for the guests.

The number of guest names that will need to be input depends on the kind of supplier. Some suppliers require only the lead guest's name, while others require all guests' names. A team member needs to ensure to use English characters only, no special characters used and that there are no spaces at the beginning or end of the names.

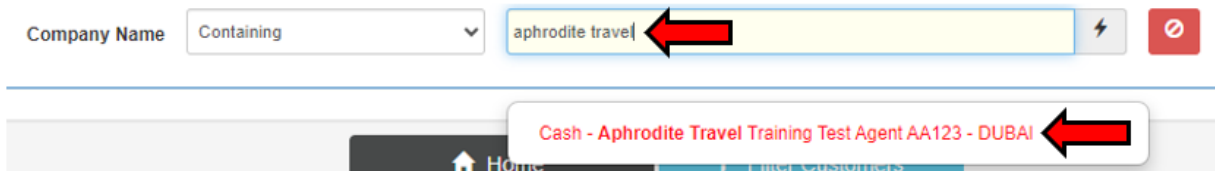

Once all the guest names, pick up and drop off information and preferences are correctly input, and the terms and conditions are read, the green BOOK TRANSFERS button can now be clicked. It will lead DOTWConnect to make the booking itself. Once the booking is created, it will bring the user to the full booking summary.

TOUR BOOKING PROCESS

To create a New TOUR Booking, a user would need to click on the NEW BOOKING link in the Operations section. This will pull down a drop-down list, showing the available services to book. The team member would need to click on TOUR BOOKING.

This will load the next page, where the customer's profile would need to be input. To do this, the user would need to encode the client's name in the COMPANY NAME field and choose the correct customer profile from the list of the customers that would pop up. Once the correct profile is found, the user can now click on the FILTER CUSTOMERS button.

Filtering the customers profile would allow a user to see all the DOTWConnect user profiles the client has with us. Clients would usually have multiple user profiles under their accounts.

If the client has a specific preference under which account the booking is to be placed, the specific user account mentioned should be the one chosen. On the other hand, if the client did not specify which user account to use, the profile tagged as MAIN USER can be chosen.

		Consultant Name	Consultant Email	XML Access	Payment Type	Actions
Main User	Live	John Smith - 5%	agasco@robiquity.com	NA	Prepay	Choose
Internal	Live	almira aquino - 5%	almira.aquino@webbeds.com	NA	Prepay	Choose

Once the client's profile has been chosen, the next page will allow a WebBeds user to input the search filters for the tour booking needed to be booked. The first rows will allow for the DESTINATION CITY or the TOUR NAME Information to be input. Any of the two search filters can be used to search for tours, depending on what information the client gave in their request.

Destination City

Tour Name

Once the DESTINATION CITY OR TOUR NAME fields are filled out, the next information requested to be filled out would be the DATE OF THE TOUR and the TOTAL NUMBER OF TRAVELLERS.

Tour Date

Number Of Adults

Number Of Children

Tour Type All tour types 

Price Currency All tour types
Scheduled
Private

If the client specified a specific tour type that the guest would like to book, it is possible to filter the results via the Tour Type filter, whether a SCHEDULED or PRIVATE Tour is requested. If there is no preference mentioned, ALL TOUR TYPES can be chosen.

By default, the PRICE CURRENCY would be the main currency that the client has chosen to pay for their WebBeds bookings. However, if the client would like to pay for the booking using a different currency, a WebBeds user can click on the drop-down box for Price Currency to see what the available currencies are to change to.

It is only possible to change the currency for Selling Price during the time of the booking. Once it has been booked, it is not possible to be changed.

Once all appropriate booking search filters have been adjusted and input, the Search button may be clicked. The DOTWConnect system will display, in the lower part of the page, the results based on the information filtered. The search results can also be sorted chronologically by price.

Price 

Viewing 1 - 10 of 42 Tour(s)

Tour search results would first present a summary of the service and its availability, which includes the:

- Tour Information - gives a user access to the important information about the tour, such as the tour description and operating hours, transfer meeting point (if included) and emergency numbers, among others.
- Tour Service Name
- Tour Type
- Lowest selling price available for the service
- Get Tours button, which will expand all available options for this service

Clicking on the GET TOURS button will allow DOTWConnect to show the available options for the tour service, their cancellation deadlines, and the total selling price. A team member will have access to this information, when looking at the tour availability:

A **B** **C** **E** **F** **G**

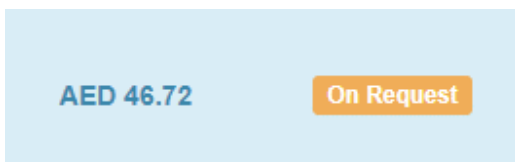

Operating On Request All The Day **E** **F** **G**

Free cancellation up to: Fri, 16 Aug 2024 10:59:59 AED 46.72 Available

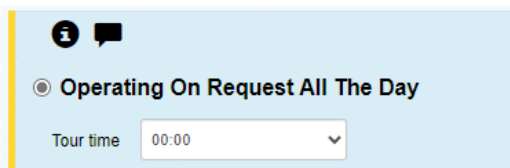

Tour time 00:00 **D**

- Tour Information: gives a user access to the information about the service, including the meeting point for the tour.

- b) Rate/Tariff Notes: gives a user access to the cancellation/amendment deadline and penalties that apply for the booking. In addition, the supplier's emergency number can be seen here.
- c) Transfer Name and Type: gives a user information about the tour's name and type
- d) Tour Time: gives a user the ability to choose a specific tour time to book, for tours which have specific times for their service.
- e) Cancellation Deadline: gives a user information regarding the cancellation deadline for a tour booking, which is in the client's time zone
- f) Total Selling Price: gives a user information the total selling price for the tour booking, inclusive of all taxes and fees
- g) Room Availability: gives a user information if the transfer is AVAILABLE or ON REQUEST.

If a transfer is showing as ON REQUEST, it is important to inform the client needs to be these needs to be coordinated first with the transfer supplier if this can be confirmed, prior to booking. Most suppliers may confirm the booking but require specific information about the transfer prior to confirming.

Once a team member has found the tour that would like to be booked, the tick circle beside the tour's name would need to be clicked and tour time to be chosen, if applicable. Afterwards, the PROCEED TO BOOKING button, at the end of the availability, would need to be clicked.

A pop-up box will show, wherein the user will need to input the names of the guests, their pick up and drop off details, and any special requests for the transfer, if any.

The number of guest names that will need to be input depends on the kind of supplier. Some suppliers require only the lead guest's name, while others require all guests' names. A team member needs to ensure to use English characters only, no special characters used and that there are no spaces at the beginning or end of the names.

Prior to confirming the Tour booking, a user may be asked for a Pick-Up location. This will need to fill out with a specific hotel name if the tour booked includes round trip transfer from and to the hotel. If the tour booked does not include any transfer, then "N/A" can be placed in the pick-up location.

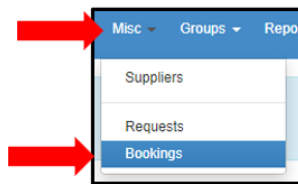

Once all the guest names, and preferences are correctly input, and the terms and conditions are read, the green BOOK TOURS button can now be clicked. It will lead DOTWConnect to make the booking itself. Once the booking is created, it will bring the user to the full booking summary.

OFFLINE BOOKING FUNCTIONALITY

MISCELLANEOUS BOOKING

A miscellaneous booking is used by WebBeds staff to make a manual booking in DOTWConnect, based on rates and availability that are manually coordinated or taken from a hotel or supplier. A miscellaneous booking can be done for any service that a WebBeds user is unable to book online via the New Booking Function or unable to amend using the Amend Booking or Amend Offline function.

Lastly, the Miscellaneous booking can be used for Accommodation, Transfer and Tour bookings. The same process of creating a miscellaneous booking applies to all services.

To create a MISCELLANEOUS Booking, a user would need to click on the MISC link in the Operations section. This will pull down a drop-down list, showing the available services to book. The team member would need to click on BOOKINGS.

This will load the next page, where the customer's profile would need to be input. To do this, the user would need to encode the client's name in the COMPANY NAME field and choose the correct customer profile from the list of the customers that would pop up. Afterwards, the user would need to indicate how many units of the Miscellaneous booking needs to be created.

Company Name

* Number of units

Once the correct profile is found, the user can now click on the FILTER CUSTOMERS button. Doing this would allow a user to see all the DOTWConnect user profiles the client has with us. Clients would usually have multiple user profiles under their accounts.

If the client has a specific preference under which account the booking is to be placed, the specific user account mentioned should be the one chosen. On the other hand, if the client did not specify which user account to use, the profile tagged as MAIN USER can be chosen.

		Consultant Name	Consultant Email	XML Access	Payment Type	Actions
Main User	Live	John Smith - 5%	agasco@robiquity.com	NA	Prepay	Choose
Internal	Live	almira aquino - 5%	almira.aquino@webbeds.com	NA	Prepay	Choose

Once the client's profile has been chosen, the next page will allow a WebBeds user to input the information about the offline booking being created. In this section, the user will need to fill out the necessary information requested for each section.

The first thing that will be asked would be the Service Name for the Miscellaneous booking. As this will be sent to the hotel/supplier, it is best to indicate here the reason for the Miscellaneous creation and the related DOTW Reference number, if any.

* Please give us a name for this service (e.g. tickets)

The second thing that will be asked would be the Country and City Name, wherein the City and Country where the service is located at needs to be input.

*Country Name

*City Name

The next thing that would need to be input would be a short detail about what would need to be booked. For simple requests, inputting the reason for the Miscellaneous is sufficient. In cases wherein the client has additional specific requests, this can be added here. There is, however, a 255-character limit for what can be input here.

*Please tell us what would you like us to book for you

Payment Takeover for Booking HTL-WBD-549746235

of rooms: 1

Room Type: Double Elegant Sea View

Meal Plan: Breakfast

(please limit to maximum 255 characters - written: 115)

The next that would need to be input the total number of occupants in the booking.

Please tell us the number of persons:

*How many adults? 2

*How many children between the age of 3 - 18 ? 0

Next thing that will need to be input would be the name of the main guests, our internal reference, as well as for the travel dates for the booking. For Miscellaneous bookings, there is no need to place the names of all guests in the booking. Preferred times may be asked as well, in this area. A user may input N/A for the preferred time.

For the internal reference, the name of the client's consultant one is working with/requested the Miscellaneous can be input.

* Please define the leading passenger name:

*Salutation Mr.

*First Name Marcel

*Last Name O'leary

*Your internal reference N/A

In case you are creating a relocation booking you must add the word **Relocation into the Agent reference field.*

* Please tell us the period you need this service for

From August 23, 2024

To and including August 25, 2024

Preferred Times N/A

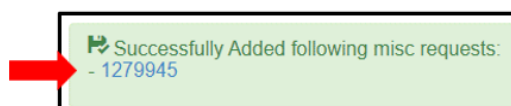

In cases where there is a need to create multiple miscellaneous bookings for a client, clicking on ADD NEW MISCELLANEOUS will allow one to create another MISC in the same screen.

[+ Add New Miscellaneous](#)

Once all requested information in the page has been input, the WebBeds user can click on the SAVE button.

[Save](#)

Once the Miscellaneous booking is saved, the page will update and bring to the user to the top-most part of the page. DOTWConnect will present a user a message that the MISC has been successfully added and will show a clickable Miscellaneous Number.

Clicking on this Miscellaneous number will open another tab, wherein a WebBeds user would need to input the supplier and rate information for the miscellaneous being created. The page can be scrolled down, until the PLEASE ATTACH THE SUPPLIER row can be seen.

Once can click on the row to open a pop-up box, which would allow a user to input the name of the supplier for the Miscellaneous.

* Please attach the supplier:

-- Choose One --

the manila

THE MANILA HOTEL

Please Define the Markup:

If the name of the hotel/supplier is not in the list, this needs to be raised with your leaders to have the name of the supplier added. If one has access to MISC supplier creation, one may do so, as well.

Once the supplier has been chosen, one will notice that the supplier's payable currency will automatically to the profiled currency of the hotel/supplier. Unlike previous developments, the payable currency can no longer be changed or modified.

Payable Currency:

PHP - Philippines Pesos

Below the Payable Currency row, one will be asked for the Booking (Supplier) cost and if the rates that will be input in the booking would be Daily rates or Total rates for all nights. Once the tick box is chosen, an additional row will expand, where the net Booking Cost can be entered, inclusive of taxes and fees.

*Prices are?

☐ Per Room/Night
 ☒ Per Total Stay

Please enter the Price with fee and tax:

*Price for Total Stay:

5000

(format XX.XX)

Once the booking cost has been input, DOTWConnect will auto-calculate the selling place for the booking, taking into consideration real-time currency conversion and the customer's profiled mark-up %. Most of the time, this may be different to the amount than what was quoted to the customer. One can adjust the selling price to the amount quoted to the customer by clicking on the MARK UP CALCULATOR.

The Total for this Misc Payable rate:

5000

PHP - Philippines Pesos

The Total for this Misc NET amount:

347.95

AED - United Arab Emirates Dirha

Markup Calculator

The mark-up calculator would give two options, whether to re-calculate based on a specific mark-up % or based on a specific amount. One would need to choose the appropriate option and adjust the rates, accordingly, based on the information quoted to the client.

Calculation Parameters

☒ Calculate Net Amount based on Customer Markup
 ☐ Calculate Customer Markup based on Net Amount

Close

Calculate

Apply

Once adjusted, the orange CALCULATE button and green APPLY button will need to be clicked.

Once the selling price has been adjusted to the amount quoted to the customer, next thing that will be asked would be the cancellation deadline of the MISC booking and the % of the penalty charges once past the cancellation deadline. For this, the penalty charge % would need to be changed to 100.00%.

This booking can be cancelled until:

*Penalty charges type: ☒ Percent from booking total amount ☐ Fixed amount

*The penalty charges will be:

Next thing that will be asked will be the Supplier Reference # for the miscellaneous booking. If the miscellaneous has not be confirmed or accepted by the hotel/supplier yet, this section can be left blank, and user will need to press the SAVE FOR LATER button in the lower part of the page.

If the supplier has accepted the booking and has given a specific supplier reference or hotel confirmation number, it can be indicated in this row. If the supplier did not give a supplier reference # but accepted the booking on their end, one can just input "Confirmed" in the box, followed by the name and position of the person who accepted the booking in the supplier's end.

*Supplier Reference #:

The last thing that needs to be specified would be the Communication Settings for the Miscellaneous booking that you have created. Based on the need of your created booking, a user will be given to adjust:

Communication Settings

Customer Acceptance Needed: ☒ Yes ☐ No

Send email communication to customer: ☒ Yes ☐ No

Send email communication to supplier: ☒ Yes ☐ No

Customer Acceptance needed: choice if the customer would need to "Accept and Reconfirm" a booking once created, otherwise the booking will be auto cancelled. By default, the CS Operations team places this with a "NO," as the customer has already previously accepted the rates and booking details, prior to the MISC creation.

Send Email Communication to Customer: choice if the customer will be sent a copy of the LPO/Booking Form to the Customer, once the booking is created.

Send Email Communication to Supplier: choice if the supplier will be sent a copy of the LPO/Booking Form to the Supplier, once the booking is created.

MISCELLANEOUS SUMMARY

The cancellation deadline is the same as the default deadline (24h). Please make sure that this is intended.

The penalty charges are the same as the default charges (100%). Please make sure that this is intended.

- Customer Name: John Smith, DUBAI AE
- Service Name: Payment Takeover for Booking HTL-WBD-549748235
- Service City and Country: MANILA, PH
- Travel Dates: 21-08-2024 to 22-08-2024
- Number of Units: 1
- Number of Guests: 2A, 0C
- Main Passenger Name: Mr. Marcel Oltean
- Supplier Name: CTD - CENTRAL TRANSPORT DIVISION
- Cost Price for Total Stay: 500.00 AED
- Selling Price for Total Stay: 555.56 AED
- Mark-Up: 10.000%
- Cancellation Deadline: 20-08-2024 00:00
- Penalty Charges: 100%
- Customer Acceptance Needed: NO
- Send Email Communication to Customer: NO
- Send Email Communication to Supplier: NO

Acknowledge

Once everything has been input and confirmed with the supplier, the WebBeds user can click on the CONFIRM MISC button to complete the Miscellaneous booking.

Prior to final confirmation of the booking, the following pop-up box showing the summary of the Miscellaneous created will appear. This will allow the user to fully review the summary of the Miscellaneous booking details – prior to final confirmation.

If all booking details, upon review, is correct, the WebBeds user will need to click on the Acknowledge button to close the pop-up box properly.

Confirm Misc

Once the Miscellaneous booking summary has been acknowledged, the user can proceed to click on the Confirm Misc button once more. The page will update with a message saying that the booking has been confirmed.

Further, it will now allow the user to pull out and load the MISC booking in the Central Reservations Office.

ACCEPT AND RECONFIRM

Accept and Reconfirm is a functionally originally attached to Miscellaneous bookings, which allows a customer to review the Miscellaneous booking created, verify all details before clicking a button signifying that they are accepting the Miscellaneous booking created on their end. If this is not done, the booking will be automatically cancelled by the system as this would have signified that the customer did not accept the Misc booking created.

After several developments in the DOTWConnect platform, this action is no longer needed to be done by the customer, provided that during the Miscellaneous Booking creation, the option chosen for the “Customer Acceptance Needed” section is “NO.”

Communication Settings

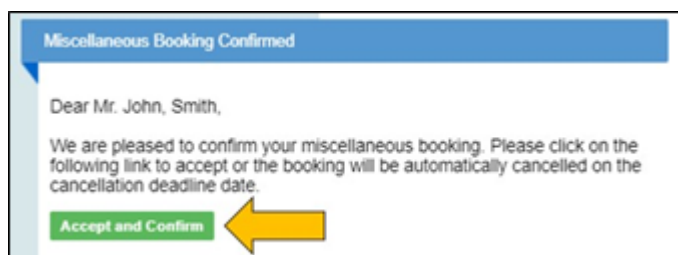

Customer Acceptance Needed: ☐ Yes ☒ No

Doing this would mean that the customer’s act of clicking the Accept & Reconfirm button is no longer needed and the booking will be considered accepted by the customer. This is in consideration with the fact that, prior to the Miscellaneous creation, the customer would have reviewed the booking details and rates for the Miscellaneous and would have given a written acceptance of these details, prior to creation.

If, however, the option for the “Customer Acceptance Needed” was Yes, this would require the customer to still manually accept and reconfirm a booking.

MANUALLY ACCEPTING & RECONFIRMING A BOOKING

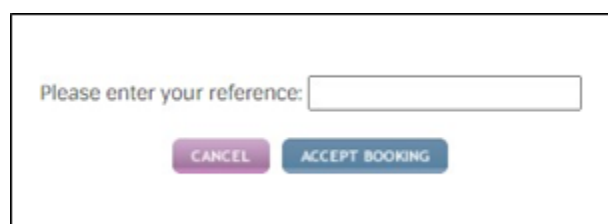

In these cases, a WebBeds user can accept and reconfirm the booking on one’s end. It is important this is done, as otherwise, the booking will be auto cancelled by the system.

To Accept and Reconfirm a booking, one must go to the Email Communication action box and load the LPO to the customer in DOTWConnect. Once the LPO is up, one will see the Accept and Confirm button in the top part of the LPO.

Clicking on this button will load another page, where the booking information will be shown. If all booking information about the Miscellaneous is correct, one can click the tick box to SELECT THIS BOOKING and after, click on the ACCEPT SELECTED BOOKINGS button.

This will cause a pop-up box to appear, asking one to ENTER YOUR REFERENCE. In this box, a WebBeds user would need input his/her name to note down that it was a WebBeds staff that accepted and reconfirmed the booking. Once the name has been input, the Accept Booking button can be now clicked.

The page will once more load and will show a message that the booking is accepted and reconfirmed. To proceed back to the booking itself, one needs to click on the back button in the browser to be led back to the actual Miscellaneous booking.

MISCELLANEOUS PAYMENT METHOD

Once the Miscellaneous booking has been created and accepted and reconfirmed, the last thing a WebBeds team member would need to ensure is that the appropriate payment method for the Miscellaneous booking is set up. The payment method of a Miscellaneous will be based on the profiled payment method of the supplier.

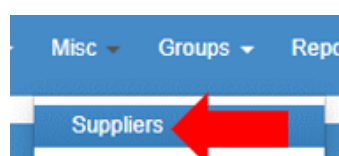

If the payment method of the supplier in the original booking is via VCC, thus one must need to contact the Finance team to request a VCC to be issued for the Miscellaneous.

If the payment method of the supplier in the original booking is via monthly invoice, no need to reach out to the Finance team as the booking will automatically be invoiced to the client.

MISCELLANEOUS SUPPLIER CREATION

PRIOR TO CREATING A NEW MISCELLANEOUS SUPPLIER PROFILE

Before creating a new Miscellaneous supplier profile in the WebBeds Suppliers' site, you would need to double check and ensure that there is no existing miscellaneous supplier profile for the hotel/supplier.

To do this, you would need to click on the MISC tab, within the Operations section of DOTWConnect. This will open a pop-up list of Miscellaneous related actions.

Choose SUPPLIERS. This will open the filter page for Miscellaneous suppliers in DOTWConnect.

Misc Supplier Name

Contains

benler hotel

Once the filter page loads, type in the name of the hotel/supplier in the **MISC SUPPLIER NAME** row. Once done, click on the **FILTER SUPPLIERS** button. This will allow DOTWConnect to check if there is a Miscellaneous supplier created already.

If there is already a miscellaneous supplier created, the Miscellaneous supplier profile will be loaded in DOTWConnect. However, if there is no miscellaneous supplier created, the below message will appear on the page. This would clear you to create the miscellaneous supplier in the WebBeds Supplier page.

All Suppliers
Misc Suppliers List

There are no suppliers for the selected criteria. Creating a Misc supplier can be made only through WebBeds Id Services. Please use the link <https://services.webbeds.com/suppliers/>

CREATING A MISCELLANEOUS SUPPLIER

To create a Miscellaneous Supplier, you will need to access <https://services.webbeds.com/suppliers/>. Once the page loads, you will be given different option box – which you would need to choose the CREATE SUPPLIER option.

Create Supplier

The Create Supplier functionality will load in the page. You will, first, be asked what Product Type you are trying to create a supplier profile for.

Product Type

Miscellaneous

For Customer Service team members, we only have access to create a Miscellaneous Supplier. Thus, please choose **MISCELLANEOUS** as the product type.

Contract Type

☒ DirectContract ☐ ThirdPartyContract

You will need to define, next, what type of contract is the Miscellaneous Supplier under. You will need to choose:

- **DIRECT CONTRACT:** if the supplier is a **hotel** (regardless if the original booking is DC, Dynamic or Channel Manager)
- **THIRD PARTY CONTRACT:** if the supplier is a **3P supplier** or a **DMC/Local Supplier**

Supplier Type

Miscellaneous

For the Supplier Type box, please choose **MISCELLANEOUS**.

Supplier Name*

Benler Hotel

For the **Supplier Name** box, please input the name of the hotel/supplier you are creating a Miscellaneous supplier profile for.

Reservation Email Address*

info@benlerotel.com

For the **Reservation Email Address**, please input the email address of the hotel/supplier.

No need to input the supplier's phone number, at this point.

Save Supplier

Once you have filled the above information, you can already **click the Save Supplier button**.

✓ Tue Jun 11 2024 3:00:32 PM Supplier successfully created with ID 109698! Click [here](#) to view it

Doing this will load a message that the Miscellaneous Supplier has been created. We will, next, need to fill in the inner information of the supplier profile. To do this, click on the “**HERE**” link on the message that pops-up.

The current miscellaneous supplier's profile will load. You will need to scroll down to the lowest part of the page and click on the **ADD SUPPLIER FIELD**.

Add Supplier Feed

A pop-up box will load to Add New Supplier Feed, which would allow you to fill in the Supplier Field information.

Add New Supplier Feed for Benler Hotel

SUPPLIER FEED NAME ROW: Input the name of the supplier you are creating a Miscellaneous Supplier for.

Supplier Feed Name*

Save DOTW Supplier

Once the above steps are done, please click on the “SAVE DOTW SUPPLIER” button.

✓ Tue Jun 11 2024 3:14:28 PM DOTW Supplier successfully created with ID 121025 !

This will fully save all the details and make the Miscellaneous Supplier available in the DOTWConnect MISC Supplier list. The following message will also show in the page.

The last step that you will need to do is to change the status of the Miscellaneous Profile to “LIVE” directly in DOTWConnect. To do this, in the Miscellaneous → Suppliers section in DOTWConnect, please search for the hotel name you placed in WebBeds supplier and click on “FILTER SUPPLIERS.”

Misc - Supplier

Filter Misc Suppliers

Branch -- All Branches --

BOOKING FOR PREPAY CASH CLIENTS

WebBeds offers clients who book through DOTWConnect an option to pre-pay via manual payment options, such as wire/money transfers or manual credit card authorizations. In the DOTWConnect platform, they are indicated as Prepay Cash clients.

If a client's form of payment to WebBeds is Prepay Cash, it is important that a client send the proof of payment for their booking request prior to the cancellation deadline, as this deadline serves as their payment deadline, as well. Clients will need to send this proof of payment to the appropriate Accounts Receivable team. Once the accounts team validates the payment sent by the client, they will update the booking and mark the booking paid in DOTWConnect.

If a client is unable to send the proof of payment for their booking before the payment deadline, the booking will be automatically cancelled by the system. The client will need to create a new booking again, based on the current rates.

If a client would like to book a booking and it is already past the payment deadline, only the CS team can make the booking for the client. This is, as, the client would need to send the proof of payment first to the Accounting team. The accounting team will validate the payment and once validated, they will give the CS team the go-signal to proceed with assisting the client in the booking. Once the booking is created, the CS team would need to notify the Accounting Team to mark the booking as paid.

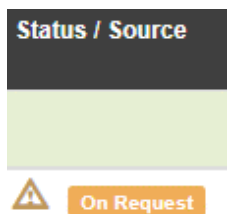

For prepay cash bookings that are past the payment deadline, it is critical that a CS team member does not make a booking until the Accounting Team receives and validates the payment. This is as, a booking for a prepay cash client that is after the payment deadline will not be auto cancelled by the system. Doing this will avoid the possibility of the service being given, even if the prepay payment has not been given.

BOOKING STATUSES

There are 6 different and possible booking statuses as DOTWConnect booking can have, depending on either the travel date or how the availability was taken. The status of a DOTWConnect booking can be seen in the short booking summary of a booking.

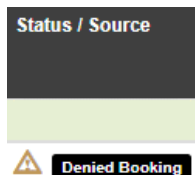

Status / Source Confirmed	CONFIRMED STATUS: This booking status applies for any pre-travel booking that is taken from a confirmed availability from our suppliers. When this status shows, one has the right to ask assistance from the hotel/suppliers for the booking or ask for the confirmation number. Lastly, when a booking is in Confirmed Status and the hotel rejects the booking, a WebBeds team member has the right to ask assistance or relocate the guest to another hotel.
---	---

Status / Source Amended Confirmed	Note: If a booking was successfully amended with confirmed availability, the Confirmed Status will be adjusted to AMENDED CONFIRMED.
--	---

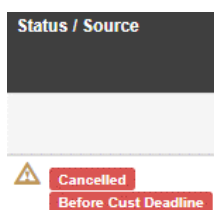

ON REQUEST STATUS: This booking status applies for any pre-travel booking that is taken above confirmed availability or allocation, or if the hotel/room type has been placed on stop sale.

When a booking is on a ON-REQUEST status, the hotel has the right to decline accepting the booking. We can, however, request the hotel if they can accept the booking on the same rate, higher room type or different rate, dependent on their decision. If a hotel is not able to accept an ON-REQUEST booking, the customer would need to create a new booking.

DENIED BOOKING STATUS: This booking status applies for any previous ON-REQUEST booking that has not been accepted by the hotel/supplier, whether on the same rate, higher or different room type or rate. A WebBeds user can change a status from On- Request to Denied booking, via the Enter Reference functionality.

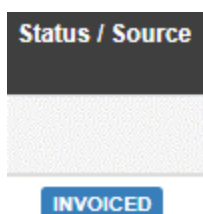

CANCELLED STATUS: This booking status applies for any booking that has been cancelled, prior to the travel date. A booking may either be:

1. Cancelled Before Customer Deadline (or without charges), or
2. Cancelled After Customer Deadline (or with cancellation charges). This will also be indicated in the booking status.

ABORTED STATUS: This booking status applies for bookings or services, wherein the customer/client attempted to book on their end. However, the booking was not completed due to technical reasons. This is equivalent to the Failed Booking status in other WebBeds platforms.

INVOICED STATUS: This is an old booking status in DOTWConnect that used to apply for any booking that is already past the check-in date/time and has not been previously cancelled. Due to these, the hotel/supplier already has the right to request for payment for the booking.

With the recent update of financial systems in DOTWConnect, this status is no longer used for bookings from 2023 onwards.

INDIVIDUAL ROOM BOOKINGS

SHORT BOOKING SUMMARY

Once a DOTW Reference number is searched for in the Central Reservations Office, the initial booking summary that would appear would be the Short Booking Summary. This booking summary would have majority of the important information regarding the booking, minus any rate, nationality, and cancellation policy information, among others.

The column headers of the short booking summary would help determine the available information, such as:

Service City	From Date	To Date
PHUKET (TH)	31 Jul 2024	04 Aug 2024

FROM DATE: shows the Check-In Date or Start of Travel Date

TO DATE: shows the Check-Out Date or End of Travel Date

SERVICE CITY: shows the city where the service booking is for. If the mouse is hovered to the two-letter code in parenthesis, it will show which country the hotel is located at

SERVICE DESCRIPTION column will give access to this information, in descending order:

Service Description

Choose an option first

Add service

Ramada By Wyndham Phuket Deevana

Room Name / Room Category:

DELUXE / 2 Adults

B&A E-Travel S.A, ATHENS, GREECE

on 10 Jan 2024 13:32:48 GMT

SERVICE NAME – Shows the name of the service (ex: Hotel, Transfer/Tours). If the service is an accommodation booking, it would also show the Room Type and Occupancy.

CUSTOMER INFORMATION – shows the Name and Location (City & Country) of the Customer/Client

BOOKING DATE AND TIME - This is in GMT time zone

CHANNEL/PAYMENT TYPE column will give access to this information, in descending order:

Channel / Payment type

DOTW

Credit

BOOKING CHANNEL – shows the kind of supplier/booking channel the service was taken from. The type of supplier can be better understood when seen in the full booking summary.

PAYMENT TYPE - shows the customer/client's payment type to WebBeds. These could be either CASH (Pre-Pay), CREDIT or CREDIT CARD.

STATUS / SOURCE column will give access to this information, in descending order:

Status / Source

Cancelled

Before Cust Deadline

ADMIN

BOOKING STATUS – shows the status of the booking currently. This is adjusted real-time, whenever any action is done in the booking

BOOKING SOURCE – shows how the booking was created. These could be either ADMIN (Booking by a WebBeds user), CI (Booked By Customer online in DOTW.com) and XML (Booked by Customer through their own system).

Passenger Name

Mr. Jerome Mendez

PASSENGER NAMES – shows the rooming list or list of guests that are input in the booking. To know the occupancy of the booking, it is best to refer to the Service Description column, as some suppliers allow just the lead guest names, even for multiple occupants.

DOTW Ref column will give access to this information, in descending order:

DOTW Ref	DOTW ITINERARY # - An internal reference number that indicates a set of bookings that are booking together and will be billed in one invoice.
ITN-WBD-522993555	DOTW REFERENCE # - An individual reference number created for every booking created.
HTL-WBD-522993605 Supp Ref: 244594 Client Ref: 5024464_1_1	SUPP REF - Would indicate the supplier reference number of a bookings. For bookings through a DIRECT CONTRACT hotel or some DYNAMIC (Hotel Chains) bookings, this will show the direct hotel confirmation number.

CLIENT REF - Would indicate the client's respective reference number for this booking, on their end. Usually, this is filled out if the client makes the booking through their system.

FULL BOOKING SUMMARY

To access the full booking summary of a booking, a WebBeds user would need to click anywhere in the middle of the short booking summary loaded. The page will load with the full booking summary of that specific booking. Unlike in other WebBeds platforms that multiple booking summaries can be opened, in DOTWConnect, only the booking summary for that specific booking opened can be loaded.

Information in the full booking summary is similar for all services (Hotel, Transfer, Tour, Misc), with some minor differences.

CUSTOMER INFORMATION

The top right of the Full Booking Summary will give one access to the CUSTOMER INFORMATION, which includes the following information:

[Credit] Flight Centre Travel Group New BRISBANE, AUSTRALIA <i>i</i> Customer Consultant: Glynn Pugh	A. The Customer/Client's Payment Type B. The Customer Name C. The Customer Location (City and Country)
--	--

Clicking on the "i" button beside the Customer Consultant will give one access to the main user contact information. However, if there is a need to contact the customer, it would be best to use the contact information found in Freshdesk.

BOOKING REFERENCE

The top left of the Full Booking Summary will give one access to the BOOKING REFERENCE information, which includes the:

HTL-WBD-522993605 Itinerary: 522993555 Status: Amended Confirmed [Offline Amended]	A. Booking Reference Number B. Itinerary Number C. Booking Status
---	---

Clicking on the Itinerary Number located at the Booking Reference section will bring a user back to the short booking summary, loading the full itinerary of the booking.

The booking status, on the other hand, will update itself after actions on the booking, provided the booking is not yet invoiced/past dated. If a booking is already invoiced or past dated, the status in the full booking summary will still show as Confirmed.

SUPPLIER PAYMENT INFORMATION

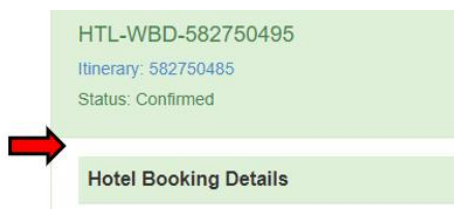

Below the Customer Information and Booking Reference sections of a booking is where one can determine the payment method of WebBeds to the hotel or supplier. There are two types of payment methods we have to hotels/suppliers: a. Monthly Invoice, and b. Virtual Credit Card or VCC.

PAYMENT VIA MONTHLY INVOICE

Monthly Invoice is a form of payment wherein hotels or supplier send WebBeds a monthly invoice for all used bookings for a particular month. This invoice is validated by the accounting team and once validated, payment is sent to the hotel or supplier.

Monthly Invoice is used for all WebBeds services, including Accommodation, Transfer, Tours and Miscellaneous.

One will know that a booking is payable to the supplier via Monthly Invoice, if there is no VCC Single Use Card information found in between the Booking Reference and Booking Details section.

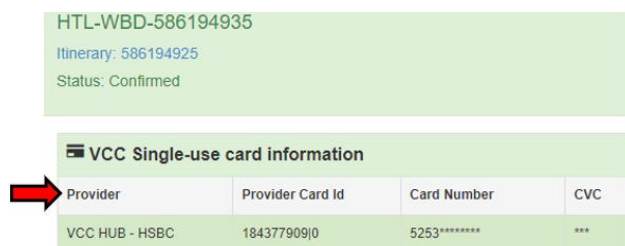

PAYMENT VIA VIRTUAL CREDIT CARD

Virtual Credit Card or VCC is a form of payment wherein hotels receive a virtual credit card information, at the time of the booking. In DOTWConnect, a Virtual Credit Card is created at the time of the booking, wherein a specific credit card number, security code and expiration date are sent to the hotel per booking.

Virtual Credit Card is mainly used for Accommodation and Miscellaneous bookings but can be requested for other services.

One will know that a booking is payable to the supplier via Virtual Credit Card if the VCC Single Use Card information section is found between the Booking Reference and Booking Details section.

The VCC Single Use Card information will give a user access to the following information:

Provider	Provider Card Id	Card Number	CVC	Expiry Date
VCC HUB - HSBC	184377909 0	5253*****	***	**/**

The first five columns will show a user information about the:

- a) Provider - which bank provider issued the Virtual Credit Card
- b) Card Number - when accessed by a WebBeds user, it will show the card number in an encrypted format. However, when viewed by the hotel through the Extranet, the full card information will show.
- c) CVV and Expiry Date - like the card number, it will show this information in an encrypted format. However, when viewed by the hotel through the Extranet, the full information will show.

Booking Amount	Loaded Amount	Settlement Amount	Card Status
14,552.10 GBP	14,554.00 GBP	0.00	created

The remaining four columns will show information about the:

- a) Booking Amount - The full booking cost/supplier rate for the booking, in the hotel's agreed currency
- b) Loaded Amount - The amount of money that the VCC is currently loaded in. By default, once a booking is made, the VCC is already loaded 1.00 of the supplier's agreed currency for the VCC. Once the hotel's agreed loading date/time has passed, the VCC will be loaded the remaining amount. For the example above, this would show that the VCC is already loaded the full amount.
- c) Settlement Amount - The amount that the VCC has been charged by the hotel. A hotel can charge the VCC multiple times if it does not go above the loaded amount of the VCC.
- d) Card Status - The status of the booking. If the VCC is still active, the status will show "Created." If the VCC is already deactivated or used, the status will show "Deleted."

SUPPLIER INFORMATION

In the center-left part of the full summary can be found the Booking Details column. The first three rows of the Booking Details column will give one visibility to the supplier and service information of the booking.

SERVICE SUPPLIER ROW: this row shows the name of the supplier whom the rates and availability were taken from. If the rates and availability are taken from a hotel, the name of hotel would show in this row. If it was taken from a supplier or intercompany platform, the name of the supplier/platform would show in this row.

The Service Supplier row will also be a guide to a team member on who to contact if any assistance is needed for the specific booking.

Service Supplier **WASHINGTON MAYFAIR HOTEL**

BOOKED SERVICE ROW: this row shows the name and location of the service booked. If it is an accommodation booking that was booked, the star rating of the hotel will appear in this row.

Booked Service ★ ★ ★ ★
THE WASHINGTON MAYFAIR
 LONDON, UNITED KINGDOM  

The “i” button beside the Booked Service row will show the phone number and email address of the supplier. In cases where the information is blank, it is best to check the contact number in the hotel’s website.

For Third Party supplier bookings, however, this is not the case as it will still show the contact information of the hotel. Thus, one will need to use the third-party supplier directory.

BOOKING CHANNEL ROW: this row shows the type of supplier/booking channel the availability was taken from.

Booking Channel	DOTW
-----------------	------

How to know if a booking is taken from Direct Contract (DC)

Service Supplier	Holiday Inn Bogota Airport
Booked Service	★ ★ ★ Holiday Inn Bogota Airport BOGOTA, COLOMBIA
Booking Channel	DOTW

A DOTWConnect booking is taken from a Direct Contract with a hotel, if the:

SERVICE SUPPLIER row: shows the name of the hotel itself; and

BOOKING CHANNEL row: shows "DOTW."

How to know if a booking is taken from DMC/Local Supplier

Service Supplier	Bed Bank Global (DMC)
Booked Service	★ ★ ★ Dream Water World MANAVGAT, TURKEY
Booking Channel	DOTW

A DOTWConnect booking is taken from a DMC or Local Supplier, if the:

SERVICE SUPPLIER row: shows the name of the DMC/LOCAL SUPPLIER, followed by the words DMC in parenthesis.

BOOKING CHANNEL - shows "DOTW"

How to know if a booking is taken from Dynamic/Hotel Chain

Service Supplier	HOME2 SUITES BY HILTON AZUSA
Booked Service	★ ★ HOME2 SUITES BY HILTON AZUSA AZUSA - CA, UNITED STATES OF AMERICA
Booking Channel	Direct Connect through HiltonOBCWbConnect

A DOTWConnect booking is taken from a Dynamic/Hotel chain connectivity, if the:

SERVICE SUPPLIER row: shows the name of the hotel, and

BOOKING CHANNEL row: starts with "DIRECT CONNECT THROUGH..." followed by the name of the hotel chain.

How to know if a booking is taken from a Channel Manager

Service Supplier	Palette Reflections Hotel
Booked Service	 Palette Reflections Hotel DUBAI, UNITED ARAB EMIRATES
Booking Channel	Rategain - OYO ROOMS

A DOTWConnect booking is taken from a Channel Manager connectivity, if the:

SERVICE SUPPLIER row: shows the name of the hotel itself; and

BOOKING CHANNEL row: shows "Name of Channel Manager", a dash, and "Name of Hotel or Hotel Chain"

How to know if a booking is taken from a Third-Party Supplier

Service Supplier	Viagens Abreu S.A - RoW Account
Booked Service	 Hotel Solverde Spa and Wellness Center PORTO, PORTUGAL
Booking Channel	XML through Abreu

A DOTWConnect booking is taken from a Third-Party supplier connectivity, if the:

SERVICE SUPPLIER row: shows the name of the third-party supplier; and

BOOKING CHANNEL row: starts with "XML Through" followed by the name of the third-party supplier.

How to know if a booking is taken from an Intercompany connectivity

Service Supplier	SunHotels Ltd
Booked Service	 VIP Executive Arts LISBON, PORTUGAL
Booking Channel	SunHotels

The SERVICE SUPPLIER and the BOOKING CHANNEL rows will show the name of the Intercompany platform.

To know what the actual kind of supplier is the booking was taken from, a WebBeds team member would need to pull out the end supplier in the Intercompany platform.

BOOKING CREATION AND SOURCE

BOOKING DATE ROW: this row shows the date and time that the booking was made. The date and time are based on GMT for all bookings.

Booking Date	25 Jun 2024 10:05:40 GMT
--------------	--------------------------

BOOKING SOURCE ROW: this row shows the manner how the booking was booked and the user whose access was used to make the booking. These could be either ADMIN (Booking by a WebBeds user), CI (Booked By Customer online in DOTW.com) and XML (Booked by Customer through their own system).

Booking Source	Sir/Madam Ni Li
----------------	-----------------

EXCLUDE BOOKING FROM WEBREV

WebRev is an automation running in DOTWConnect that allows us to maximize our profits with our bookings, while still charging the customer the same amount as what was originally booked. This is achieved through the system finding a better rate for the same booking details with another supplier.

Once a better rate is found, the system would create a new booking with a better booking cost, while keeping the selling price the same as what the customer originally agreed to. Meanwhile, the original booking is cancelled by the system. As all this is happening, the customer will not be advised of the changes and they will see on their system the new booking, as their current booking.

There are certain scenarios or customers, however, who are excluded from the WebRev automation, including customers considered as VIPs.

If a booking is excluded from WebRev, this row would show YES. However, if the booking is participating in the WebRev automation, this row would show NO.

Exclude Booking from WebRev	☐	☒ No
-----------------------------	--------------------------	--

SUPPLIER AND CLIENT REFERENCE

SUPPLIER REFERENCE ROW: this row shows the supplier reference number for the booking. Dependent on what kind of supplier the booking was taken from, the supplier reference number is also the direct hotel confirmation number.

Supplier Reference	14430
--------------------	-------

For DIRECT CONTRACT and DYNAMIC / HOTEL CHAIN (limited to Hilton, IHG, HBSi and Marriott hotel chains), the supplier reference number is the direct hotel confirmation number. For all other types of suppliers, one would need to contact the hotel or supplier to reconfirm the direct hotel confirmation number.

CLIENT REFERENCE ROW: this row shows the client's respective reference number for this booking, on their system. If the client is an Intercompany client, the client reference number can be used to pull out the booking in the Intercompany platform.

Client Reference	5422586_10_1
------------------	--------------

CANCELLATION DEADLINE

In DOTWConnect, there are two cancellation deadlines which will appear in the full booking summary, the Supplier, or the Customer cancellation deadlines.

Supplier CXL Deadline	07 May 2024 05:25:33 Supplier Time Zone
Customer CXI Deadline	07 May 2024 13:25:33 Customer Time Zone

SUPPLIER CXL DEADLINE row: shows the booking's cancellation deadline, per contract, in the supplier's time zone.

CUSTOMER CXL DEADLINE row: shows the booking's cancellation deadline, per contract, on the customer/client's time zone.

Most of the time, the supplier and customer deadlines are the same, except for the time zone that applies. However, there are situations wherein the customer cancellation deadline is earlier than the supplier cancellation deadline.

These can be due to the client having a restricted rate, booking a reservation already past the cancellation deadline, agreed contract with the client/sales team, among others. On these cases, the MOST RESTRICTIVE CANCELLATION DEADLINE will always apply, between the two.

If there is a need to know the actual cancellation policy and penalties, this can be seen in the LPO to the customer via the Email Communication function.

LAST ACTION

LAST ACTION row: this row shows about how the booking was last actioned and who did the last action. For this example, it indicated that an ADMIN (WebBeds) USER did the last action - and that the action was a system automated action.

Last Action	EMAIL ALI SENER
-------------	-----------------

The last action row, however, does not specify what or when was the last action made. To know this information, one would need to access the Booking Action functionality of the full summary.

LINK A BOOKING

A WebBeds user can link a related miscellaneous booking by clicking on the Link A Booking link in the Add Service row.

Add Services	Link a Booking
--------------	----------------

This allows for a Miscellaneous booking number to be input and linked to an existing Accommodation, Transfer or Tour booking. Once the miscellaneous booking # has been added and saved, it will be linked to the existing booking – allowing a user to easily access the connected Misc booking for any modifications or actions.

PASSENGER DETAILS

At the right part of the booking is the Passenger Details section. While most information that can be seen here are similar, the rows in this section change and differ, depending on what kind of service was booked.

Passenger Details	
Check-In:	12 Jul 2024
Check-Out:	15 Jul 2024
Passenger Name(s):	Sir/Madam CHANGGYU KIM Sir/Madam tba tba
Passenger Nationality:	SOUTH KOREA
Pax Country of Residence:	SOUTH KOREA
Room Type:	STANDARD ROOM
Room Occupancy:	2 Adults
Rate Plan Code:	APAC-Q32024-EE (FIT)
Bedding Preference:	No Preference
Rate Basis:	Breakfast
Additional Requests:	None Selected
Tagged Issues:	Tag Issue

ACCOMMODATION BOOKINGS

The Passenger Details section will show the travel dates and the guest names.

It will also show the guest's nationality and country of residence that was indicated at the time of the booking. This can no longer be changed once input.

It will also show the room type booked and the occupancy in the room. It will give access as well to the rate plan code for the booking, bedding preference chosen, rate basis or meal plan booked, as well as any additional/special requests, if any.

Passenger Details	
Passenger Name(s):	Mrs. Rita de Cassia Queiroz
Transfer Type:	Private 1 Adult
Meeting Point	Arrival info Your driver or representative will be waiting in the arrivals hall after you have collected y...
Pick-Up	Terminal AEP - Jorge Newbery Inter. Airport, Buenos Aires
Arriving Airline	Latam Brasil
Arriving From City	SAO PAULO
Flight Number	LA 8034
Arrival Date	01 Aug 2024
Arrival Time	17:00
Drop-Off	Accommodation Carrson Hotel Downtown Buenos Aires
Additional Requests:	None Selected
Tagged Issues:	Tag Issue

TRANSFER BOOKINGS

The Passenger Details section will show the guest names as well as the type of transfer that was booked, followed by where the Meeting Point for the guest and the transfer driver will be.

Next, it will show the Pick-up and Drop Off details.

Depending on if it's an arrival (Airport to Hotel) transfer or a departure (Hotel to Airport) transfer, then the flight details can show in either the Pick-Up or Drop Off rows.

Lastly, if there are any additional requests that the client requested for the transfer (ex: Car Seats etc), then it will be indicated here, as well.

Passenger Details	
Tour Date:	01 Aug 2024
Tour Time:	13:00
Passenger Name(s):	Mr. Muhammad Kadodia
Tour Type:	Scheduled 2 Adults , 3Children(Ages: 9,5,3)
Pick-Up	dubai
Starting Point	Dubai Parks and Resorts
Ending Point	Dubai Parks and Resorts
Additional Requests:	None Selected
Tagged Issues:	Tag Issue

TOUR BOOKINGS

The Passenger Details section will show the tour date and tour time, as well as the passenger's name(s). This will be followed by the tour type, which will indicate how many travellers will be joining the tour.

Next will be the Pick-Up row, wherein will be able to see where the pick-up point for the tour, which includes transfers, will be. If the tour is a stand-alone tour, then the pick-up row will show as N/A.

The Starting and End Point will indicate where the guest can be picked up if pick-ups transfers are included. Lastly, if there are any additional requests that the client requested for the tour (ex: Car Seats etc), then it will be indicated here, as well.

MULTI ROOM BOOKINGS (MRBs)

TYPES OF MULTI-ROOM BOOKINGS

Multi-room bookings are part of the original functionalities of DOTWConnect, wherein the platform allows for multiple rooms/services to be booked and billed in one itinerary, such as either a set of multiple rooms or multiple services (ex: accommodation/transfers/tours).

With recent developments, the functionalities and appearances of multi-room bookings have changed, depending on what type of booking source the services were booked from. Lastly, the new format of multi-room bookings currently only applies to Accommodation services.

The three types of multi-room bookings are:

1. MRBs by XML clients/customers → these MRB bookings were made by the customers via their own system
2. MRBs by WebBeds Admin users → these MRB bookings were made for the customers by a WebBeds admin user.
3. MRBs by POS clients/customers → these MRB bookings were made by the customers by booking through our online POS/Customer interface.

SHORT BOOKING SUMMARY

MRBs by XML clients/customers or by WebBeds Admin users

If a MRB was created by an XML customer or a WebBeds Admin user, each room will have its own individual short booking summary that would appear. The rooms will not be combined into one.

MRBs by POS clients via Customer Interface/POC

The appearance of MRBs made by POS clients in the short booking summary differs, depending on the type of supplier that the customer booked for the rooms.

MRBs by POS clients (Direct Contract/DMC/Channel Manager)

If the supplier that a customer booked for a MRB booking is either a Direct Contract/DMC/Channel Manager supplier, each room will have its own individual short booking summary that would appear. The rooms will not be combined into one.

Service Supplier	Seminaris Campus Hotel Berlin
Booked Service	★★★★ Seminaris Campus Hotel Berlin BERLIN, GERMANY
Room Type	Standard Single Room
Rate Plan Code	Contracted BB (FIT)
Rate Basis	Breakfast

For MRB for POS clients, the Booking Details column will first show the Service Supplier and Service/Hotel Name rows.

This will be followed by the Room Type, Rate Plan code and Meal Plan/Rate Basis rows, which all apply to all rooms booked for this specific MRB.

Booking Source	CI Mr. ADHOC SALES
Booking Date	20 Jun 2024 10:52:53 GMT
Booking Channel	DOTW
Check-In	01 Aug 2024
Check-Out	29 Aug 2024
Supplier Reference	101.115.058
Client Reference	FOZ1141

The Booking Source, Booking Date and Booking Channel rows will show next.

This is followed by the Check-In and Check-Out Date, which applies to all rooms booked for this specific MRB.

Lastly, the Supplier Reference & Client reference rows show next.

Supplier CXL Deadline	31 Jul 2024 15:00:00 Supplier Time Zone
Customer CXI Deadline	31 Jul 2024 23:00:00 Customer Time Zone
Last Action	EMAIL Reynaldo Preiml
Add Services	Link a Booking
Exclude Booking from WebRev	Yes ☐

The Cancellation deadlines for the booking, Last Action, Add Services/Link a booking and the Exclude Booking from WebRev rows show in the lowest part of the booking.

PER ROOM DETAILS

Room 1 - HTL-WBD-

Passenger name(s):	
Passenger Nationality:	JAPAN
Pax Country of Residence:	JAPAN
Room Occupancy:	1 Adult
Bedding Preference:	No Preference
Additional Requests:	None Selected
Tagged Issues:	Tag Issue
Promotions Applied:	Special 15% [PROMO CODE: Summer Deal 2024 15%] i
Note	update

The right side of the booking summary would show the individual room details summary for each room booked in the MRB.

Each room detail would show the guest names, nationality, country of residence, occupancy and bedding preferences for each room.

The lowest part of each room detail would show the promotion that was applied for the room and the Note box.

BOOKING ACTION BUTTONS

Booking Documents
Email Communication
Booking History

Enter Reference
Cancel Booking
Amend Offline
Cancel Offline

On the lowest part of the MRB booking summary would show the available booking action buttons for Multi Room bookings.

As with individual bookings, Enter Reference button will only be available for DC/DMC bookings which are still pending the hotel confirmation number for the rooms booked.

In addition, Amend Booking is not available for any kind of Multi Room booking, regardless of supplier type. Any request of amendment will need to be coordinated with the hotel and amended offline, with some restrictions. These will be further discussed in the Amendment section for Multi Room bookings.

VIRTUAL CREDIT CARD

Virtual Credit Cards, more commonly known as VCC, is one of the payment methods WebBeds has to suppliers, wherein a specific credit card number, security code and expiration date are digitally sent to the hotel per booking via the LPO to the supplier. Each DOTWConnect booking payable via VCC is created an individual virtual credit card. A supplier can charge the virtual credit card multiple times, provided that the total amount charged is not above the loaded amount in the VCC.

HOW VCC IS SENT TO THE SUPPLIER

The ability to receive payment in the form of VCC is discussed by the supplier and WebBeds at the time of contract negotiations. At this time, WebBeds and the suppliers discuss how they would like the VCC to be sent to the hotel, as there are three possible options:

- VCC information will be shown in the LPO via a secure, encrypted information.
- LPO to the supplier will have a link, wherein hotel can access the VCC information in a secured page.
- VCC information can be viewed by the supplier via the extranet.

HOW TO SEE THE VCC LOADING DATE AND TIME

Another specification discussed during contract negotiation between the supplier and WebBeds is when the VCC loading date for the hotel would be done. While VCCs are created and are loaded an amount of 1.00 of the supplier currency every booking creation, the actual loading date of the VCC differs from one hotel to another. DOTWConnect VCCs can be loaded the full amount, depending on contract, either:

- Before Check-In Date
- At the Check-In Date
- Before Check-Out Date, within travel
- At the Check-Out Date

To know when a VCC is loaded the full booking amount, there are two ways to see it. The first way is for a team member to click on the VCC Single Use Card information to load the full VCC summary. Next, one needs to scroll down to the Booking Details section, where the Card Scheduled Loading Time can be seen. The date and time notes in the local hotel time zone.

This way works for any booking payable via VCC.

Card Details					
Card Provider	Provider Card Code	Card Scheduled Loading Time	Closed	Card Status	Card Issuing Date
VCC HUB - HSBC	184377909 0	2024-07-07 00:00:00	No	created	2024-07-01

The second way is by loading the LPO to the supplier, preferably using the LPO via Resend Email To Supplier. Once the LPO is up and available, the team member needs to scroll down until they see the VCC Single Use Card information box in the LPO.

Below this box will show the validity date of the VCC, which are in local hotel time. Once the validity date has started, the VCC is already loaded the booking amount.

This way only works for booking booked via Direct Contract, and not for any other supplier using VCC as payment.

You can charge the VCC at the **checkin** of the booking, this VCC is valid between 00:01 2022-10-01 to 23:59 2022-12-30 then the card will not be valid anymore.

HOW TO SEE WHEN THE VCC CAN BE CHARGED?

Generally, WebBeds informs our suppliers that they can charge the VCC upon the check-out date. However, there are some suppliers who request if they can charge the VCC earlier than the check-out date. To know the validity date or when the DOTW VCC can be charged, one would need to open the LPO to the supplier and scroll down to the middle part of the LPO, where the VCC single use card information can be seen.

Below the VCC information will be seen the validity dates of the virtual credit card, which are noted in the hotel's time zone. If the hotel charges the VCC within this time, the VCC transaction will go through and get approved.

You can charge the VCC at the **checkin** of the booking, this VCC is valid between 00:01 2024-08-07 to 23:59 2024-11-05 then the card will not be valid anymore.

For any payment or VCC issues, please contact us at: VCC.apac@webbeds.com (APAC destinations).
Or you may call us for urgent matters at +44 20 4524 9641.

If the hotel tries to charge the card outside this validity time, the charge will decline as the VCC is already deactivated. A WebBeds team member would need to reach out to the Finance team to request for a new VCC to be reissued for the booking.

HOW TO SEE IF A VCC WAS CHARGED OR DECLINED

In the previous years, the Transaction Logs section of the full VCC summary will give a user access to view the authorizations made to the VCC, whether these authorizations were approved or declined. However, with recent developments in the platform and the change of financial systems in DOTW, this has since changed.

HOW TO KNOW IF A VCC WAS CHARGED

The VCC of a DOTWConnect booking will be charged if a user will see that the Settlement amount box already has an amount charged, comparable if not same to the cost in the Booking Amount box.

Booking Amount	Loaded Amount	Settlement Amount
21,000.00 THB	21,001.00 THB	21,000.00 THB 

In addition to this, once the Settlement Amount box already has an amount, the user will notice that the Transactions Log, in the full VCC summary, will show a transaction log, showing the date, time and amount of the transaction/charge.

Transactions Log						
TransactionDate	TransactionType	ExceptionTypeDescription	AmountTxn	AmountCardholder	AmountCpnCurrency	CurrencyTxn
2024-06-24 00:00:00	Transaction Troovo-WEX	-	21000.00 THB	21000.00 THB	-	THB

HOW TO KNOW IF A VCC WAS NOT CHARGED/DECLINED?

The VCC of a DOTWConnect booking is not yet properly charged if the Settlement Amount box shows 0.00. Subsequently, the Transaction Logs in the full VCC summary will show no transactions encoded.

Booking Amount	Loaded Amount	Settlement Amount
323.48 EUR	325.00 EUR	0.00 

However, if a hotel advises that their trial to charge the VCC declined, the reasons why a VCC was declined will no longer show in the Transactions Log section of the full VCC summary. To know why a VCC was declined, a user will need to reach out to the Finance Team to check on and define the reason why the VCC declined/was not charged properly.

BOOKING ACTIONS

The Booking Actions buttons grants access for additional information regarding the booking, as well as modifications and cancellations of the booking. These action buttons are in the lowest part of the DOTWConnect Full Booking Summary.

Not all booking actions buttons will be always available. Their availability will depend on certain criteria, such as the status of the booking or if there have been any actions that have been done in a booking. The booking action buttons available would include:

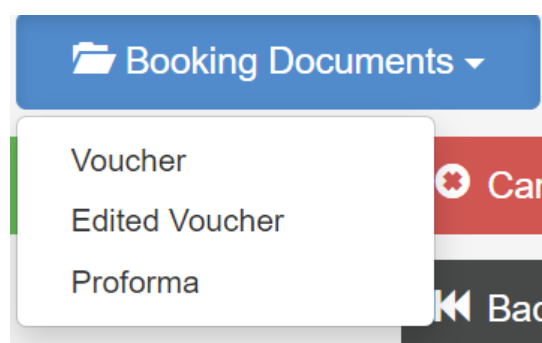

BOOKING HISTORY: gives access to the history of actions and modifications done in the booking. This section is arranged in chronological order, starting with the latest action or modification done. The bookings' cost, price and mark-up % can also been seen here.

EMAIL COMMUNICATION: gives access to the LPO (Local Purchase Order) or booking documents for both the supplier and/or the client. These booking documents are automatically sent to them at the time of booking creation or modification. This section will also allow these documents to be resent to the supplier or client.

BOOKING DOCUMENTS: gives access to the invoices and vouchers of the client. The documents that would be accessible in this section would include the:

PROFORMA INVOICE: This is the full receipt of the amount that the client needs to pay, for the whole itinerary. It indicates the booking details and selling price for each booking and the full itinerary. It will also have the bank details where the customer/client can send their payment to.

VOUCHER: This is a document that the client can give the guest/traveler, as proof of the booking. This document will only have the booking details, as well as a map to the service/hotel. However, it does not have any rate or price information at all. Clicking any of the links will load the vouchers in a pop-up box.

EDITED VOUCHER: This is a Voucher that has been manually changed and resent to the client.

VOUCHER DETAILS	
Booking Reference No	HTL-WBD-
Printed On	Tue, 06 Aug 2024 10:19:22 GMT
Itinerary Number	ITN-WBD
Booked By	WebBeds FZ LLC
Booking Status	Confirmed

SERVICE PROVIDER DETAILS	
Contract Supplier Name	Best Western Plus Maple Leaf
Service Name	Best Western Plus Maple Leaf
Address	Plot 1B Road 1 Sector 1, DHAKA, BANGLADESH
Telephone	880-8802-8951988

PASSENGER DETAILS

In the SERVICE PROVIDER DETAILS the following details can be changed manually by hovering with the mouse over the text and once the  sign appears, clicking on the text: contract supplier name (like shown in the screenshot), service name, address and telephone.

In the PASSENGER DETAILS you can change the: Passenger Nationality, Room Type, Room Occupancy, Rate Basis (meal plan).

Once edited, before sending, the system will ask for the email addresses, a subject line for the new email and the SEND EMAIL button will now be displayed as RE-SEND EDITED EMAIL.

Send To: *	
From: *	
E-mail Subject: *	

 Re-Send Edited Email

NETWORK INVOICE: This is an invoice for a client that would only be available, if the accommodation service is in one of the countries where there was an old DOTWConnect office (ex: Thailand, Saudi Arabia, Malaysia, Kuwait, Singapore, Indonesia, Pakistan, Cambodia).

ENTER REFERENCE: gives access for the hotel confirmation number to be updated in the system for confirmed bookings with a Direct Contract to hotel or a DMC availability. For On Request bookings, this button will also allow the booking to be confirmed on the same rate, different rate or be denied.

 Enter Reference

AMEND BOOKINGS: gives access for a Name, Date, Occupancy or Board Basis amendment to be done for Direct Contract to hotel or DMC bookings only.

 Amend Booking

CANCEL BOOKING: gives access to cancel a booking pre-travel, based on the cancellation policy that applies at the time of the cancellation.

 Cancel Booking

AMEND OFFLINE: gives access for a Name, Date, Occupancy, Room Type, Board Basis, Bed Preference, Booking Cost and Selling Price to be amended, provided that the booking amendment is first amended with or authorized by the hotel/supplier.

 Amend Offline

CANCEL OFFLINE: gives access for a booking to be cancelled and for cancellation penalties to be adjusted, provided that the hotel or supplier has given either a full or partial waiver of charges.

[Cancel Offline](#)

EMAIL COMMUNICATION

The Email Communication gives access to the LPO (Local Purchase Order) or booking documents for both the supplier and/or the client. These booking documents are automatically sent to them at the time of booking creation or modification. This section will also allow these documents to be resent to the supplier or client. Clicking this button will give one two set of options:

✉ Email Communication ▾

Last Email To Supplier

Resend Email To Supplier

Last Email To Customer

Last Edited Email To Customer

Resend Email To Customer

History

←

SUPPLIER
DOCUMENTS

SUPPLIER DOCUMENTS: allows to view the last LPO sent or resend the LPO to the hotel/supplier

CLIENT DOCUMENTS: allows to view the last LPO sent or resend the LPO to the client. This also gives access to the full cancellation policy of the booking.

DOCUMENTS HISTORY: allows to view the history of all LPOs sent out.

LPO TO THE SUPPLIER

The Supplier Documents section of Email Communication action box will give access to two options: Last Email To Supplier and Resend Email To Supplier.

✉ Email Communication ▾

Last Email To Supplier

Resend Email To Supplier

Last Email to Supplier gives access to view the last booking document sent to the hotel/supplier

Resend Email to Supplier gives access to resend the booking document sent to the hotel/supplier from the system, whether to the email address on file or to a different email address.

Clicking any of the two links will load the LPO in a pop-up box.

PARTS OF THE LPO TO THE SUPPLIER

TOP PART OF LAST EMAIL TO SUPPLIER

1. Email Sent to **Supplier** on Monday, July 15, 2024 10:35:51
 Email: yield@innoglobetravels.com,
 Booking Made/Updated by Customer

[Check Email status](#)

If a user has the Last Email to Supplier open, the topmost part of the LPO to the supplier will show the DATE AND TIME (GMT Time zone) when the document was sent, as well as the email address where the LPO was sent to.

TOP PART OF RESEND EMAIL TO SUPPLIER

Resend email to: yield@innoglobetravels.com

If a user has the Resend Email to Supplier open, the topmost part of the LPO to the supplier will show the email address where the LPO will be sent to once sent, by default.

DETAILS OF THE LPO

In the middle part of the LPO will be the Voucher Details section. In this area, the following information can be seen:

BOOKING INFORMATION, including the DOTW Reference Number, Itinerary Number and Booking Status

SERVICE PROVIDER DETAILS, including the service name, address and contact information

PASSENGER DETAILS, including the travellers' name, travel dates etc. In this section the following details can be changed manually by hovering with the mouse over the text and once the sign appears, clicking on the text: passenger nationality, room type, room occupancy, service name, rate basis (meal plan), specials (promotions, if any):

 Specials	
--------------	--

The Supplier Reference number can also be seen here, if the check-in date is within 5 days of check-in.

VCC Single-use card information

To enhance protection of your payment, WebBeds credit card details are no longer displayed in the booking email. To receive your payment please access your extranet account on the link below.

Please [click here](#) to receive virtual credit card (VCC) payment information.

You can charge the VCC at the checkin of the booking, this VCC is valid between 00:01 2024-07-21 to 23:59 2024-10-19 then the card will not be valid anymore.

For any payment or VCC issues, please contact us at: VCC.meais@webbeds.com (MEA destinations).
Or you may call us for urgent matters at +44 20 4524 9641.

VCC SINGLE USE CARD INFORMATION if booking is payable via VCC. This would include the link to our extranet, which would allow the hotel to view the VCC details for the booking. Below this would show the validity dates of the VCC and when is the earliest that the VCC can be charged. Lastly, this section would also show the contact information the hotel can reach out to, in case of any VCC issues.

You can enter your reference number for this booking by clicking on the following link:
Update Supplier Reference Number

UPDATE SUPPLIER REFERENCE NUMBER link, which gives access for the hotel confirmation number to be input by the hotel.

By default, this is the link that the hotel needs to click, if they would need to update the supplier reference number, on their end. However, this also is a secondary way that a WebBeds Admin User can update the supplier reference number for a Direct Contract or DMC booking.

DAILY RATES									
Date	Room Price	Taxes	Total Payable (inclusive of Taxes)	Rate Basis	Rate Plan Code	Min. Stay	From	Rate Market	Contract Type
Sat, 10 Aug 2024	USD 49.00	USD 0.00	USD 49.00	Breakfast - Breakfast	DMC - BB	-	Allocation	EUROPE	FIT
Sun, 11 Aug 2024	USD 49.00	USD 0.00	USD 49.00	Breakfast - Breakfast	DMC - BB	-	Allocation	EUROPE	FIT
Mon, 12 Aug 2024	USD 49.00	USD 0.00	USD 49.00	Breakfast - Breakfast	DMC - BB	-	Allocation	EUROPE	FIT
Tue, 13 Aug 2024	USD 49.00	USD 0.00	USD 49.00	Breakfast - Breakfast	DMC - BB	-	Allocation	EUROPE	FIT
Wed, 14 Aug 2024	USD 49.00	USD 0.00	USD 49.00	Breakfast - Breakfast	DMC - BB	-	Allocation	EUROPE	FIT

Rates including all Room taxes and Service charges and may not include City Taxes.
Please note that the rates shown above could be average daily rates and they might not reflect the actual daily rates for the room.

The Daily Rates section can be found in the lowest part of the LPO to the supplier. This section will show the nightly booking cost for the booking. In addition, this section will also present what board basis/meal plan applies for the travellers, any promotional rate or surcharge that applies and which market-specific rate applies.

Lastly, the Daily Rates section will give information of how the availability was taken from. This can be accessed from the FROM column of the Daily Rates. The FROM column will show:

ALLOCATION / FREE SALE – If the booking is taken from a Direct Contract with a hotel/ DMC.

DYNAMIC – If the booking is taken from a Dynamic (Hotel Chain), Third Party, Intercompany and Channel Manager connectivity.

Total Payable for this booking: 245.00 USD (US Dollars)

The lowest part of the LPO to the supplier would show the total booking cost payable for the booking.

RESENDING THE LPO TO THE SUPPLIER

To resend the LPO To the Supplier via the DOTWConnect platform, the Resend Email To Supplier link in the Email Communication Box need to be accessed. Once the LPO to the supplier has pulled up, one would need to scroll down until they see these buttons:

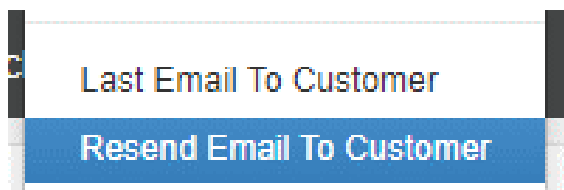

A
☐ The email will be sent to other address than the one in the Supplier f

B

- Tick box - Clicking the tick box will open an additional email address field, wherein a different email address, other than the default supplier email, can be input
- Send Email or Re-Send Edited Email button – Clicking on this button will send the LPO to the email address on file. If the tick box to send the email to a different email was clicked and a different email address was input, it will send the LPO to this address.

LPO TO THE CUSTOMER

The Client Documents section of Email Communication action box will give access to two options: Last Email to Customer and Resend Email to Customer.

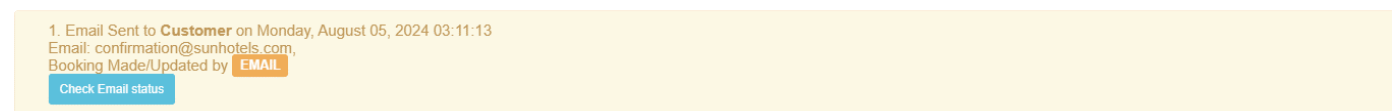

Last Email to Customer gives access to view the last booking document sent to the client.

Resend Email to Supplier gives access to resend the booking document sent to the client from the system, whether to the email address on file or to a different email address.

Clicking any of the two links will load the LPO in a pop-up box.

PARTS OF THE LPO TO THE CUSTOMER

TOP PART OF LAST EMAIL TO CUSTOMER

If a user has the Last Email to Customer open, the topmost part of the LPO to the customer will show the DATE AND TIME (GMT Time zone) when the document was sent, as well as the email address where the LPO was sent to.

TOP PART OF RESEND EMAIL TO CUSTOMER

If a user has the Resend Email to Customer open, the topmost part of the LPO to the customer will show the email address where the LPO will be sent to once sent, by default.

DETAILS OF THE LPO

In the middle part of the LPO will be the Voucher Details section. In this area, the following information can be seen:

The Daily Rates section can be found in the lowest part of the LPO to the customer. This section will show the nightly selling price for the booking. In addition, this section will also present what board basis/meal plan applies for the travellers, any promotional rate or surcharge that applies and which market-specific rate applies.

Amendment & Cancellation Policy

- Any amendments or cancellations must be done online before the cancellation deadline.
- Amendment on bookings confirmed through Dynamic rates & inventory and 3rd Party supplier is possible only if the service is available at the time of amendment and for the dates required.
- No manual /offline amendment is possible.
- Certain services are non amendable and should be rebooked as per new dates before the cancellation deadline.
- No Passenger Name change allowed

Cancellation Rules:

- Before Wed, 07 Aug 2024 16:59:59
No Cancellation Charge. No Amendment Charge.
- Between Wed, 07 Aug 2024 17:00:00 and Sun, 11 Aug 2024 02:59:59
Cancellation Charge: USD 49.00. Amendment Charge: USD 49.00.
- No Show Charge: USD 49.00

No-Shows or Early Checkout

100% charges will apply for No Shows and Early Check out.

Below the daily rates section of the LPO to the customer can one see the Amendment & Cancellation policy for the booking. The Dates and Times in the cancellation rules are in the customer's time zone. This will serve the guide to know what amendment or cancellation policy applies, prior to processing any amendment or cancellation.

Tariff Notes:

Rate Notes:

Hotel Tariff Notes:

Bookings including children will be based on sharing parents bedding, no separate bed for children is provided unless otherwise stated. CHILD POLICY: applies only sharing existing beds with parents (2 adults rate). For single accommodation any child will be considered adult. VAT tax of 10% on the room rate can be avoided for foreign guests if and only if the guest presents his passport at arrival with the immigration stamps showing that the guest has not stayed more than 183 days in the country. The visas or stamps on the passport must be as no resident. If not, the guest should pay 10% VAT Tax direct at the hotel at check in date. Rates do not include 10% VAT. NO Show must pay 1 night plus TAX. From November 15 2019 until April 30, 2020, URUGUAYAN PASSENGERS/Nationality must pay 10% VAT. This will be impose even if the guest is a NO SHOW.

IMPORTANT UPDATE AS OF JANUARY 24, 2020: Any NO SHOW that is made of accommodation will be computed with 22% VAT additional to the rate.

Passengers from Uruguay will be subject to pay an additional tax (VAT) of 10% directly to the hotels. This is starting today and will end on March 31, 2024

Bookings including children will be based on sharing parents bedding and no separate bed for children is provided unless otherwise stated.

Lastly, below the amendment and cancellation policies, the tariff or rates note from the hotel can also be seen in the LPO to the customer.

BOOKING HISTORY

The Booking History functionality will give access to the history of the actions done in the booking, within the DOTWConnect system. The history is arranged in chronological order, starting with the latest action/ modification that was done to the booking. The selling rate, booking cost and mark-up can also be seen here.

READING THE BOOKING HISTORY

Booking Details as of: 2024-07-19 13:04:07
By: Supplier Crystal Tower Hotel

In the topmost part of each Booking History log, it would indicate the Date and Time (GMT) when an action was done in the booking. This section will also specify who made the action at this time, whether it was the hotel/supplier, customer, or a WebBeds Admin user.

The next following rows will give information about the booking, which access was used to action the booking and what was the last action done in the booking, such as:

DOTW Reference #:	HTL-WBD-595606265
Booking Status:	Confirmed
Booking was modified from:	
Operation made on booking was:	Action index 8

The BOOKING WAS MODIFIED FROM row originally shows which access was used to make the modification in the booking, whether it's through XML service (XML Connectivity), Customer Interface (DOTW.com) or Admin (WebBeds user). However, in recent developments in the platform, this row is now kept blank.

The OPERATION MADE ON BOOKING WAS row originally shows a short summary of what was the modification done in the booking. However, in recent developments in the platform, a short generic term of "Action index" followed by a number shows instead. The modifications done in the booking can still be seen in the middle part of the booking history, highlighted in yellow.

Like the LPOS, the next section will show the Service Provider details and the Passenger details. Below the sections, the area for the Amounts section can be seen.

PAYABLE/NETWORK AMOUNT and MARKUP

AMOUNTS	
Total Payable Amount:	370.00 EUR
Total Network Amount:	370.00 EUR
Total Net Amount:	417.77 USD
Click to view exchange rates	
Network Markup:	0.000%
Customer Markup:	3.100%
Click here to view Expanded Markup	

The Amounts section will show the total booking cost, selling price and mark-up information of a booking. If there is a network mark-up that applies for a booking, this section will also show the Network Amount.

TOTAL PAYABLE AMOUNT ROW: shows the Total Booking Cost and Currency

TOTAL NETWORK AMOUNT ROW: shows the Total Booking Cost plus any network mark-up if any

TOTAL NET AMOUNT ROW: shows the Total Selling Price and currency

NETWORK MARK-UP ROW: Additional mark-up percentage that is added whenever an accommodation service is in one of the countries where there was an old DOTWConnect office (ex: Thailand, Saudi Arabia, Malaysia, Kuwait, Singapore, Indonesia, Pakistan, Cambodia).

CUSTOMER MARK-UP ROW: The mark-up added to each of our customer's booking, as agreed during their account creation.

CALCULATING THE MARK-UP

Whenever there is a need to give a manual quote to a customer and the mark-up will need to be added to the additional booking cost, one would need to make sure to add the sum of BOTH the Network Mark-up and the Customer Mark-up percentages.

So, using the below screenshot as an example, if there is a need to give a client a manual quote for any additional service and the mark up % shows as below, the mark up % that needs to be given would be a total mark-up of 4.30% (Sum of the Network Mark-up and Customer Mark-up).

Network Markup:	3.000%
Customer Markup:	1.150%

Another example would be, if there is a need to give the customer/client a manual quote for an additional service and the mark-up % would show as below, the mark-up that will be added to the quote would be 5.30% (Sum of the Network Mark-up and Customer Mark-up).

Network Markup:	0.000%
Customer Markup:	3.100%

DETERMINE BOOKING MODIFICATION HISTORY

Whenever there are any modifications made in DOTWConnect, these actions can be easily reviewed in the booking history. Any modification in the booking will be highlighted in YELLOW, in the respective BOOKING HISTORY log. An example of this would be this booking history log:

Booking Details as of: 2024-05-09 10:07:37 By: Supplier DEEVANA PLAZA KRABI AONANG			
DOTW Reference #:	HTL-WBD-559621805	Itinerary Number:	ITN-WBD-559621795
Booking Status:	Confirmed		
Booking was modified from:			
Operation made on booking was:	Action index 8		

This example will show that the OPERATION MADE ON BOOKING WAS rows are lit in yellow. These would indicate that there was a modification or update done in the booking.

Booking Details as of: 2024-05-09 10:07:37 By: Supplier DEEVANA PLAZA KRABI AONANG			
DOTW Reference #:	HTL-WBD-559621805	Itinerary Number:	ITN-WBD-559621795
Booking Status:	Confirmed		
Booking was modified from:			
Operation made on booking was:	Action index 8		

To know the date and time when this modification was done, one can look at the DATE and TIME section on the top part of the respective booking history log. For this example, it is noted that the supplier reference number was updated by the hotel last July 29, 2020, 00:02:05 GMT.

PASSENGER DETAILS	
Passenger Name:	
Service Type:	Accommodation
City:	KRABI
Check-in:	Wednesday, July 24, 2024
Check-out:	Friday, July 26, 2024
Supplier Reference :	568216 Changed By: Manop C.
Room Type:	PREMIER ROOM

To know what exactly the modification in the booking is, a user will need to scroll down to the middle part of the Booking History log, specifically in the Passenger details and Amounts area. The rows that are highlighted in yellow would indicate that these booking details were modified. Further, the highlighted rows will show the update done in the booking.

For example, in the above screenshot, it shows that the modification for the booking for this log was that the Supplier Reference # (or HCN) was input by the hotel.

AMOUNTS	
Total Payable Amount:	0.00 THB
Total Network Amount:	0.00 THB
Total Net Amount:	331.43 GBP
Click to view exchange rates	
Network Markup:	0.500%
Customer Markup:	1.500%
Click here to view Expanded Markup	

In this example, it shows that the modification was due to a rate adjustment, wherein the Booking Cost (or the total payable amount) was adjusted to 0.00, while keeping the Selling Price (or total net amount) the same.

ENTER REFERENCE

UPDATING THE HOTEL CONFIRMATION NUMBER VIA ENTER REFERENCE

For DOTWConnect bookings wherein availability was taken from either a DIRECT CONTRACT WITH THE HOTEL or a DMC/LOCAL SUPPLIER, one is given the ability to update the system with the supplier reference number. This can either be done if a client follows up for the confirmation number or if one is doing the tasks of following up the pending confirmation numbers of accommodation bookings.

Once the hotel has been contacted and one has received the direct hotel confirmation number, the hotel confirmation number can be entered by clicking the ENTER REFERENCE button in the Booking Actions section.

BOOKING REFERENCE # HTL-WBD-505586425

Service Name

MH FLORENCE HOTEL AND SPA

Booking Status

Confirmed

Supplier Reference

568216

Passenger Name (First, Last)

Mr. CHANGHWAN CHOI

# of Rooms	Room Type / Occupancy	Rate Basis	Adults	Children	Extra Beds	Booked On

• EB SPO - 120 days

Total Payable 294.50 EUR

Extra Meals amount 0.00

Total Net 326.97 EUR

Reference Number*

Ref. No.

Your Name(First, Last)

Jerome Mendez

DOTWConnect will then pull up a pop-up box that would show the booking details, the booking cost, and the selling price. The pop-up box will also have an option to update the Reference number of the booking.

Reference Number*	Ref. No.
Your Name(First, Last)	Jerome Mendez

In the Reference Number* box, the confirmation number given by the hotel/local supplier can be input. It is recommended to input too the name of the person from the hotel/local supplier who gave the confirmation number.

In the Your Name section, the field will be automatically input by the name of the one updating the Supplier Reference.

Once the reference number and the name of the person who confirmed it has been input, the Update Reference Number button below can now be clicked. This will automatically update the booking and automatically - send an updated confirmation to the customer as well.

UPDATING THE HOTEL CONFIRMATION NUMBER FOR NON-DIRECT CONTRACT/DMC BOOKINGS

For bookings that are not taken from Direct Contract or DMC connectivity, the Enter Reference button will not be available for one to use. In case that one has contacted the hotel or supplier and have received the direct hotel confirmation number, one can document the direct hotel confirmation number in the NOTES box instead.

Once the hotel confirmation number is documented in the Note box, the user needs to click on the Update button to save the information.

Note	HCN: 34659 - Mark - FD	update
------	------------------------	--------

UPDATING THE CONFIRMATION OF AN ON-REQUEST BOOKING

If a booking is with an On-Request status, a booking can be updated three different ways, dependent on what the hotel's acceptance to our booking is. On-Request booking can be updated, via the Enter Reference function, either as:

- Confirmed As Original
- Confirmed On A Different Rate
- Denied/Not Available

ON REQUEST CONFIRMED AS ORIGINAL

If a hotel has confirmed an On-Request booking as original, this means that they are confirming the booking based on the same rate and cancellation policy, as booked. What will need to be done is to update the DOTWConnect booking with the hotel confirmation number given by the hotel.

On Request Status	☐ NOT AVAILABLE ☒ CONFIRMED AS ORIGINAL ☐ CONFIRMED ON A DIFFERENT RATE
Total Payable	4,834.00 AED
Extra Meals amount	0.00
Total Net	25,836.13 ZAR

Reference Number*	875975 - Mark - FD
Your Name(First, Last)	Jerome Mendez

Once in the Enter Reference pop-up box, the CONFIRMED AS ORIGINAL tick box will need to be clicked. The hotel confirmation number given by the hotel can then be input in the REFERENCE NUMBER box. Once the hotel confirmation number is updated, the UPDATE REFERENCE NUMBER button can be clicked.

This will update the booking status from On-Request to Confirmed.

ON REQUEST CONFIRMED ON A DIFFERENT RATE

If a hotel has confirmed an On-Request booking on a different rate, the booking cannot be updated yet in the system as there will be a need for the client to accept the new rate first. One will, first, need to get the new selling price based on the different rate given by the hotel. Afterwards, this will need to be quoted and requested for the customer's acceptance.

On Request Status	☐ NOT AVAILABLE ☐ CONFIRMED AS ORIGINAL ☒ CONFIRMED ON A DIFFERENT RATE
Customer Markup	Percentage 6.500 %

The new selling price can be calculated via the Enter Reference function. Once in the Enter Reference pop up box, click on the CONFIRMED ON A DIFFERENT RATE tick box.

	Date	Allotment	Nightly Payable Rate	Meal Included	Including Supplements
Arrival Date	Wed, 14 Aug 2024	Confirm Outside Allotment *Allocation Confirm Outside Allotment	2417.00 AED Free No	*Include Meals ? Yes *Rate Basis: Breakfast Breakfast Name: Breakfast Breakfast	*Include Supplements? Yes Included Supplements: • Supplement
If payable rate is same for all nights check here ☐					
	Thu, 15 Aug 2024	Confirm Outside Allotment *Allocation Confirm Outside Allotment	2417.00 AED Free No	Included Meals Name: Breakfast Breakfast	*Include Supplements? Yes Included Supplements: • Supplement

Doing this will allow for the Monthly Payable rate to be changed. In the respective box, one can input the new booking cost that the hotel had quoted that they will accept, for the On Request booking. If the booking cost is the same for all nights, there is also an option to automate the update of the same payable rate for all nights.

Keep the original cancellation rules	<input checked="" type="button" value="Yes"/>
--------------------------------------	---

Below this section is a row that will allow one to specify if the original cancellation rules of the booking will be kept. If the cancellation rules will be kept as original, this can be kept with a YES. However, if the hotel gives a different cancellation rule for the booking they will accept, this need to be turned to a NO, to allow the modification of the cancellation rule in the system.

Total Payable	313.000	EUR	
Extra Meals amount	0.00		
Total Net	226.00		

Once the above actions are done, the Re-calculate Totals button can now be clicked. Doing this action will calculate the updated selling price of the booking, considering the new booking cost given by the hotel and the mark-up % for the booking. The updated selling price can be seen in the Total Net row.

This updated selling price can now be quoted to the customer and requested if they accept the new rate or not. If the clients accept the new selling price, we can now go back to the hotel and request for the confirmation of the booking on their end. Once the hotel confirmation number is received, the hotel confirmation number will need to be input in the Reference Number row before accepting in the system.

Prior to confirming the booking on the new rate, the new rates need to be ensured that they are input in the Enter Reference section again, once the CONFIRMED ON A DIFFERENT RATE button is clicked.

ON REQUEST THAT IS DENIED BY THE HOTEL

If a hotel has denied a booking, the NOT AVAILABLE button can be chosen. In the Reference Number row, one can input "DENIED" and include the name of the personnel from the hotel who denied the booking.

On Request:
☒ NOT AVAILABLE
☐ CONFIRMED AS ORIGINAL
☐ CONFIRMED ON A DIFFERENT RATE

Total Payable	226.00 EUR
Extra Meals amount	0.00
Total	

Reference Number*	Denied - Mark/FD
Your Name(First, Last)	Jerome Mendez

BOOKING AMENDMENT – INDIVIDUAL ROOM BOOKINGS

AMENDMENT VIA AMEND BOOKING WORKFLOW

In DOTWConnect, we have an option to do an online booking amendment through the DOTWConnect system. This functionality can be used for bookings that are taken from DIRECT CONTRACTS WITH A HOTEL or DMC/LOCAL SUPPLIER.

For bookings that are taken from DYNAMIC, THIRD PARTY or CHANNEL MANAGER booking channels, these needs to be manually amended with the hotel. After, the pre-travel bookings can be updated in DOTWConnect through the Amend Offline functionalities.

HOW TO DO AN ONLINE BOOKING AMENDMENT?

To do an online booking amendment, you would need to click the Amend Booking action button in the lowest part of the page. This button may no longer be available for any amendment request post-amendment deadline. However, provided it is a pre-travel booking and the VCC is not fully loaded, the Amend Offline functionality may still be available.

WHAT CAN WE AMEND VIA THE AMEND BOOKING WORKFLOW?

Booking Reference Number	HTL-WBD-581893025			Room Cost	299.79 USD
Property Type	Hotel			Room Type	Superior Double
Service Name	Mamaison Hotel Riverside Prague			Room Occupancy	2 Adults
Service Location	PRAGUE, CZECH REPUBLIC			Bedding Preference	No Preference
Deadline	Wed, 28 Aug 2024 12:59:59 [Click here for Details]			Board Basis	Breakfast

Passenger #	Salutation	First Name	Last Name
Leading Passenger	Sir/Madam	Melanie	Merhar
Passenger 2	Sir/Madam	Melanie	Merhar

Quotation Criteria

Check In Date	August 29, 2024	Adults	2
Check Out Date	September 1, 2024	Children	0
Board Basis	Breakfast	Agent Reference	20834874

*In case you are creating a relocation booking you must add the word **Relocation** into the Agent reference field.

Special Requests ☐ Yes ☒ No

The amendment functionality will give you the booking summary on top, as well as the amendment options available for the booking. Please make sure to take note of the selling price, in the ROOM COST row in the top right, as you will need this to manually calculate the additional selling price the customer needs to pay for the amendment.

For online amendments, these includes the ability to do:

1. Name Amendments/Correction
2. Date Amendments
3. Occupancy Amendments
4. Meal Plan Amendments: These are limited to the available meal plans to the contract. If the meal plan is not available, you would need to coordinate with the hotel and process the amendment via Amend Offline.

CAN WE INPUT SPECIAL REQUEST THROUGH THE AMEND BOOKING WORKFLOW?

The Online Booking Amendment will give a tick-box to choose special requests. However, encoding the special requests through this functionality may end up re-calculating the booking on its current selling price, charging the customer/client higher. Due to this, special requests for DOTWConnect bookings need to be manually sent to the hotel/supplier via email or phone.

HOW TO CALCULATE THE ADDITIONAL SELLING PRICE FOR THE AMENDMENT?

Once you have done the necessary amendments the customer is requesting, you can click on the "Proceed with the Amendment" button. It will then give you a quotation of the available rates, for the amendment the customer is requesting.

Make sure to go through with the rate plan quotations thoroughly, as the rate plan quotations can differ either on the new cancellation deadlines or the new total selling price.

Quotation

Room Occupancy	2 Adults
Check In Date:	Sat, 31 Aug 2024
Check Out Date:	Mon, 02 Sep 2024
Deadline:	Deadline: Fri, 30 Aug 2024 12:59:59
Promotions:	Promotions Applicable. Click for details.
Service Price:	239.29 USD
Meals Price:	0.00 USD
Total Price:	239.29 USD
Amend charge	0.00 USD

For example, if the customer would choose the rate plan above, the cancellation deadline will change to "Within Deadline," which means that cancellation or amendment charges will already apply for any further changes/cancellation after. In addition, the new total price is higher by USD 122.89 after the amendment, compared to the original selling price.

Room Available

Lastly, when offering a rate plan to a customer/client, make sure that the status shows "Room Available." This will ensure that if the customer chooses this rate plan, the allocation and room is indeed available with the hotel.

If the rate plan's status shows "Room on Request," make sure to check first with the hotel if the room or rate is still available. A Room on Request status would mean that the room is either already above allocation or sold out.

HOW TO FINALIZE THE BOOKING AMENDMENT?

Before proceeding and confirming the amendment in the system, please review the change and advice the customer/client the:

- A. Additional Selling Price to change (New Total Selling Price minus Original Room Cost/Selling Price);
- B. Any Amendment Penalty,
- C. New Cancellation Deadline for the Rate Plan and
- D. New Booking Details.

If the customer/client agrees with the changes, and more importantly the additional rate to change, you may proceed to amend the booking and confirm the amendment the customer requested.

If a booking is payable via Virtual Credit Card, the customer invoice and the VCC information and amount will automatically be updated once the amendment is completed in the system. Similarly, if a booking is payable via monthly invoicing, the invoices for the supplier and client will automatically be updated, as well.

AMEND VIA THE AMEND OFFLINE WORKFLOW

In DOTWConnect, one can do an offline booking amendment through the DOTWConnect system. This means that a team member would need to coordinate with a hotel or supplier with the availability and rates for an amendment request. If and once a client accepts the additional selling price for the amendment, the amendment details and rates can now be manually updated in DOTWConnect, allowing the details to update in the booking and the LPOs.

Once a booking has already been amended offline, the Amend Booking button will no longer be available. Any future amendments will now need to be manually amended with the hotel / supplier and updated in DOTWConnect, via the Offline Amendment functionality.

WHAT IS IMPORTANT TO BE DONE, PRIOR TO AMENDING OFFLINE?

Before processing the Offline Amendment functionality in DOTWConnect, please ensure that the booking has been amended first with the hotel/supplier on their end. This is IMPORTANT to do first, as any offline amendment in DOTWConnect will not reflect on the hotel's/supplier's end.

In addition, please ensure that, if applicable, the customer has accepted any additional rate, if any. Once this is done, the Amend Offline action button can be clicked, located in the lowest part of the DOTWConnect full booking summary.

WHAT ARE THE NEW AMENDMENT TYPES NOW POSSIBLE VIA AMEND OFFLINE?

The amend offline functionality has been further developed, to allow additional developments and actions which were previously not possible. Effective February 9th, 2023, the Amend Offline functionality will also now allow the following options:

1. Ability to do an amend offline to a booking that is with INVOICED status.
2. Ability to do an amend offline to a booking that is with CANCELLED status.
3. Ability to change both the cost and selling price to 0.00, for bookings that are pre-travel.
4. Ability to allow and reflect compensation amounts to both the supplier cost and selling price.
5. Ability to allow a user to enter the cost and selling price for the whole stay, in addition to per night.
6. Ability to calculate the mark-up percentage correctly, allowing negative mark-up up to -99.00%
7. Ability to enter the cost and selling price to 0.00 on Miscellaneous bookings.
8. Ability to calculate the mark-up percentage correctly for Miscellaneous bookings.

WHAT ARE THE TYPES OF AMENDMENTS THAT CAN BE AMENDED OFFLINE?

There are several things that can be updated or amended in the Offline Amendment functionality if these are first coordinated and manually amended on the hotel's/supplier's end. Through Offline Amendment, a user can amend the following:

The screenshot shows the WebBeds booking form with the following fields and labels highlighted by red arrows:

- Travelers' Names:** Leading Passenger (Mr. Stanley Planeto), Passenger 2 (Mrs. Davina Planeto).
- Travel Dates:** Check In Date (January 5, 2023), Check Out Date (February 9, 2023).
- Occupancy:** Adults (2), Children (0).
- Meal Plan:** Board Basis (Breakfast).
- Bedding Preference:** Bedding Preference (No Preference).
- Room Type:** Room Type ([83644095] STUDIO).
- Agent Reference:** MF3ADF75.
- Price Variation Table:**
 - Cost Price (Whole Stay):** Cost price whole stay (Apply).
 - Cost Price (Nightly):** Cost Price (1595.0000 THB).
 - Customer Markup:** Customer Markup (5.300 %).
 - Network Markup:** Network Markup (3.000 %).
 - Selling Price (Whole Stay):** Selling price whole stay (Apply).
 - Selling Price (Nightly):** Selling Price (40.4980 GBP).
 - Mark Up %:** Mark Up % (5.300 %).
 - Compensation Amounts:** Supplier compensation amount (THB), Customer compensation amount (GBP).
- Cancellation Policy:** Customer CXL Deadline (December 07, 2022 23:00 GMT), Non Refundable (checkbox), + Cancellation Policy.

1. Name
2. Travel Dates
3. Occupancy
4. Meal Plan (Board Basis)
5. Bedding Preference
6. Room Type
7. Cost Price (Total & Nightly)
8. Selling Price (Total & Nightly)
9. Mark-up %
10. Compensation Amounts
11. Cancellation Policy

HOW TO AMEND THE BOOKING DETAILS VIA AMEND OFFLINE?

The top part of the amend offline page will give a user access to amending the booking details, depending on what the customer's request or need is. Prior to amending the cost and selling price and if the hotel/supplier has given the authorization for us to amend, a user will need to ensure that the appropriate booking detail has been amended first accordingly.

The screenshot shows the top part of the WebBeds booking form with the following fields and labels highlighted by red arrows:

- Travelers' Names:** Leading Passenger (Mr. Stanley Planeto), Passenger 2 (Mrs. Davina Planeto).
- Travel Dates:** Check In Date (January 5, 2023), Check Out Date (February 9, 2023).
- Occupancy:** Adults (2), Children (0).
- Meal Plan:** Board Basis (Breakfast).
- Bedding Preference:** Bedding Preference (No Preference).
- Room Type:** Room Type ([83644095] STUDIO).
- Agent Reference:** MF3ADF75.

Once the needed booking details has been amended, a user can then scroll down more to proceed to adjust the rates.

If only the cost and selling price would need to be adjusted, a user can immediately scroll down to the Price Variation Table area, which would allow a user to amend the cost and selling price.

Price Variation Table

Tue, 10 Jan 2023 Cost Price: 1035.0000 THB Customer Markup: 2.900 % Network Markup: 3.000 % Selling Price: 30.0542 USD

HOW TO AMEND THE COST AND SELLING PRICE VIA AMEND OFFLINE?

DOTWConnect's Amend Offline functionality allows a user to make both Cost and Selling Price Amendments, lessening the need to create manual LPOs or miscellaneous bookings. There are several types of price amendments that can be done in the Amend Offline functionality.

AMENDING THE COST AND SELLING PRICE VIA THE WHOLE STAY'S RATE

If a hotel or supplier has given the new booking cost for the whole stay and the nightly rate for all nights are equal and same, the Amend Offline functionality now allows the:

- Ability to enter the cost and selling price via the whole stay's cost/price, and
- Ability of the system to automatically divide the cost and selling price equally, dependent on the number of nights

Once the whole stay's cost has been received and the whole stay's selling price has been calculated, a user will need to enter the whole night's cost in the "COST PRICE WHOLE STAY" box. The whole night's selling price will need to be entered in the "SELLING PRICE WHOLE STAY" box.

Price Variation Table

Enter the cost price amount for the whole stay.

Click the apply button once the whole stay's cost is entered.

Enter the selling price amount for the whole stay.

Click the apply button once the whole stay's selling price is entered.

Once the whole stay's cost price and selling price is entered, a user will need to click on the apply button to allow the system to equally divide the whole stay's cost and selling price, based on the number of nights of the booking.

Price Variation Table

☒ Cost price whole stay
☒ Selling price whole stay

	Calculate selling price		Calculate markup
Wed, 27 Jul 2022	<input checked="" type="text" value="100.0000"/> GBP	8.300 %	123.1100 EUR
	Calculate selling price		Calculate markup
Total Cost Price: 200.00 GBP		Total Selling Price: 246.22 EUR	

AMENDING THE COST AND SELLING PRICE PER NIGHT AUTOMATICALLY

A user will have an option to change the cost and selling price per night automatically. To do this, a user will need to enter the new value of the booking cost in the respective nightly “COST PRICE” box. Afterwards, the “CALCULATE SELLING PRICE” button will need to be clicked, to allow the automatic calculation of the selling price based on the default mark-up.

There will be no need to click on the “CALCULATE MARKUP” button anymore, on these scenarios.

ADJUSTING THE SELLING PRICE AND MARK-UP % MANUALLY

The current amend offline functionality allows a user to input a specific selling price and adjusting the mark-up % manually. To do this, a user will need to enter the new value of the booking cost in the respective nightly “COST PRICE” box.

The user will, then, need to enter the updated selling price for the respective night in the “SELLING PRICE” box. Once done, the CALCULATE MARKUP button will need to be clicked, to allow the system to adjust the mark-up % automatically. This needs to be done for all nights that would need to be adjusted.

In this example, we can see that the mark-up %, after clicking the Calculate markup button, has increased to 43.55%, compared to the original 8.30%.

In this scenario, there is no need to click on the “CALCULATE SELLING PRICE” button anymore on this scenario, as the user manually input the adjusted selling price.

AMENDING ONLY THE BOOKING COST

AMENDING ONLY THE BOOKING COST FOR ALL NIGHTS

If a user will need to adjust only the booking cost, a hotel or supplier has given the new booking cost for the whole stay and the nightly rate for all nights are equal and same, a user a user will need to enter the whole night’s cost in the “COST PRICE WHOLE STAY” box. The system will automatically divide the whole stay’s booking cost, dependent on the number of nights.

There is no need to enter or apply a new selling price whole stay, as only the booking cost needs to be amended.

Price Variation Table

Enter the cost price amount for the whole stay.

Cost price whole stay 200 Apply

Selling price whole stay Apply

Click the apply button once the whole stay's cost is entered.

AMENDING ONLY THE BOOKING COST PER NIGHT

If a user will need to adjust only the booking cost on a per night basis, a user will need to enter the new value of the booking cost in the respective nightly “COST PRICE” box.

Enter the updated cost for the respective night.

Cost Price 100 GBP Customer Markup 8.300 % Selling Price 82.3200 EUR

Calculate selling price Calculate markup

There is no need to click on the Calculate Selling Price button or Calculate Markup button, in this scenario, as there will be no changes to these values.

AMENDING THE COST AND PRICE IF THERE ARE DATE CHANGES

If the amendment offline is due to a change in travel dates, the Price Variation table section will update to add new or additional nightly cost and price rows, based on the new or additional travel dates.

A user will need to input the booking cost for the new or updated nights for the booking in the “COST PRICE” boxes. Afterwards, the “CALCULATE SELLING PRICE” button will need to be clicked, to allow the selling price to automatically be calculated. This needs to be done for all new or additional nights in the booking.

There will be no need to click on the “CALCULATE MARKUP” button anymore, on these scenarios.

Price Variation Table

Cost price whole stay Apply

Selling price whole stay Apply

Enter the updated cost for the respective night.

Cost Price GBP Customer Markup 8.300 % Selling Price EUR

Calculate selling price Calculate markup

Click the CALCULATE SELLING PRICE button to update the selling price automatically.

HOW TO ENTER CUSTOMER COMPENSATION AMOUNTS FOR AN ACTIVE BOOKING

If a user will need to give an approved compensation amount to a customer and a booking is still active, this can be done via the Amend Offline functionality.

For example, if a customer needs to be given an approved compensation and the compensation is a one-night stay, what a user will need to do is to adjust the “SELLING PRICE” box to 0.00. Afterwards, a user will need to click on the “CALCULATE MARKUP” button to adjust the mark-up % for that specific night.

The screenshot shows the 'Amend Offline' interface for a booking on Tue, 26 Jul 2022. The 'Cost Price' is 63.5000 GBP. The 'Customer Markup' is 0.00%. The 'Selling Price' is 0.00. A red arrow points to the 'Calculate selling price' button with the callout: 'Enter the 0.00 in the selling price box for the respective night.' Another red arrow points to the 'Calculate markup' button with the callout: 'Click the Calculate Markup button to adjust the mark-up % automatically.'

If for example, a customer needs to be given an approved compensation of a specific amount above 0.00 (ex: EUR 10.00), what a user will need to do is to deduct the approved compensation amount in the “SELLING PRICE” box. Afterwards, a user will need to click on the “CALCULATE MARKUP” button to adjust the mark-up % for that specific night.

The screenshot shows the 'Amend Offline' interface after adjustment. The 'Cost Price' is 63.5000 GBP. The 'Customer Markup' is 0.68%. The 'Selling Price' is 72.3200. A red arrow points to the 'Calculate selling price' button with the callout: 'Enter the adjusted selling price, minus the compensation, in the selling price box for the respective night.' Another red arrow points to the 'Calculate markup' button with the callout: 'Click the Calculate Markup button to adjust the mark-up % automatically.'

HOW TO ENTER COMPENSATION AMOUNTS TO A BOOKING THAT WOULD NEED TO BE CANCELLED

There are situations wherein a customer will request for the booking to be cancelled and request for compensations per contract, usually due to an In-Resort relocation that is not able to be accommodated within the contracted time.

A CS team member will need to coordinate with: a. the hotel to get the authority for a full refund and b. his/her manager/director to request approval for the compensation amount. Once both authorizations have been received, a CS team member would need to cancel the booking via CANCEL OFFLINE and keep the cancellation charges.

Once the booking is cancelled with charges via CANCEL OFFLINE, the CS team member will now need to go to the Amend Offline functionality to adjust the rates.

A user will, first, need to ensure the both the cost price and selling prices for all nights in “0.00.” To do this, a user will need to enter “0.00” in the “COST PRICE WHOLE STAY” box. The whole night’s selling price will need to be adjusted to “0.00” in the “SELLING PRICE WHOLE STAY” box, as well.

Price Variation Table

Adjust the cost price amount for the whole stay to 0.00.

Cost price whole stay Apply

Click the apply button once the adjusted cost is entered.

Adjust the selling price amount for the whole stay to 0.00.

Selling price whole stay Apply

Click the apply button once the adjusted cost is entered.

Once the whole stay's cost price and selling price is adjusted to 0.00, a user will need to click on the apply button to allow the system to apply the adjusted rate to all nights. Once all night's cost and price are showing as "0.00," the "CUSTOMER COMPENSATION AMOUNT" box in the lower part of the page will now be opened for adjustment.

A user will need to enter the compensation amount that needs to be given to the customer, in this box.

Total Cost Price: 0.00 GBP
Total Selling Price: 0.00 EUR

Supplier compensation amount GBP

Customer compensation amount EUR

Enter the compensation amount that needs to be given to the customer.

HOW TO ENTER COMPENSATION AMOUNTS TO AN INVOICED BOOKING

If a user will need to give an approved compensation amount to a customer and a booking is already with an invoiced status, this can also now be done via the Amend Offline functionality. This will be most helpful in cases of relocations.

Once a CS Team member has received the supplier authority and the approval of the manager/director for compensation, the team member will need to ensure the both the cost price and selling prices for all nights in "0.00." To do this, a user will need to enter "0.00" in the "COST PRICE WHOLE STAY" box. The whole night's selling price will need to be adjusted to "0.00" in the "SELLING PRICE WHOLE STAY" box, as well.

Price Variation Table

Adjust the cost price amount for the whole stay to 0.00.

Cost price whole stay Apply

Click the apply button once the adjusted cost is entered.

Adjust the selling price amount for the whole stay to 0.00.

Selling price whole stay Apply

Click the apply button once the adjusted cost is entered.

Once the whole stay's cost price and selling price is adjusted to 0.00, a user will need to click on the apply button to allow the system to apply the adjusted rate to all nights. Once all night's cost and price are showing as "0.00," the "CUSTOMER COMPENSATION AMOUNT" box in the lower part of the page will now be opened for adjustment.

A user will need to enter the compensation amount that needs to be given to the customer, in this box.

Total Cost Price: 0.00 GBP

Supplier compensation amount GBP

Total Selling Price: 0.00 EUR

Customer compensation amount EUR

Enter the compensation amount that needs to be given to the customer.

HOW TO CHANGE THE CANCELLATION DEADLINE VIA AMEND OFFLINE?

If the cancellation deadline needs to be amended after doing a manual amendment with a hotel, this can be done via the Offline Amendment functionality. Click on the blue "+ Cancellation Policy" link in the right, so that the cancellation policy can be adjusted accordingly.

If there are no changes to the cancellation deadline, this can be left as is.

Cancellation

Customer CXL Deadline July 24, 2022 07:00:00 GMT Non Refundable ☐ [+ Cancellation Policy](#)

HOW TO SEND AN UPDATED LPO TO THE SUPPLIER OR CUSTOMER AFTER AMENDING OFFLINE?

Once one has processed an Offline Amendment, there will be a choice to choose if the updated LPO/Booking Confirmation to be sent to the supplier and/or customer after doing an offline amendment. By default, these choices are placed as YES.

However, for example, if the rate will be amended because of an error on our end, one can choose YES to "Send Email to Supplier" but NO to "Send Email to Customer." The system will also allow you to send the LPO to a different email address, than what we have on file.

Updates Notification

Send email to customer? ☒ Yes ☐ No

Email Address

Can contain comma separated email addresses

Send email to supplier? ☒ Yes ☐ No

Email Address

Can contain comma separated email addresses

Note: Email Addresses in the above picture removed for security purposes

Please note that the Send Email to Supplier row will only be available, if the booking is taken from a Direct Contract or Channel Manager booking channel.

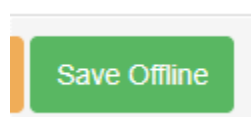

HOW TO COMPLETE THE AMENDMENT OFFLINE?

There will be a reminder at the end of the page that this is an Offline Amendment. This is a reminder to the user that this first needs to be coordinated with the supplier and that the amendment should authorized or done in the supplier's end first, before amending it in DOTWConnect Amend Offline. The tick box can be clicked if the amendment has been coordinated with the supplier first.

Offline Amend Confirmation

☒ This is an off-line amendment. Please make sure supplier authority is acquired before making any changes

Once all actions above are done, clicking the "SAVE OFFLINE" button will complete the process of Offline Amendment.

If a booking is payable via VCC, the virtual credit card information and amount will automatically be updated. However, if a booking is payable via bill back, the monthly invoice will be adjusted accordingly - based on the new information.

WHEN TO REACH OUT TO THE FINANCE TEAM, ONCE AN AMEND OFFLINE IS DONE

The need to reach out to the Finance team will depend on when the travel date of the booking is and when the amendment offline was made.

IF BOOKING IS PRE-TRAVEL AND AT LEAST ONE DAY BEFORE CHECK-IN

If a booking is pre-travel and at least one day before the check-in date, there is no need to reach out to Finance team to notify them of the changes we have made. Any rate adjustments due to Amend Offline will automatically reflect in the financial system once amended. The VCC amount is automatically adjusted, as well.

IF BOOKING IF PRE-TRAVEL BUT IS ALREADY ON THE DAY OF CHECK-IN

DECREASE IN RATES/REFUNDS

The Customer Service team member no longer needs to reach out to the Finance team to notify them of the changes made. These rate adjustments due to Amend Offline will automatically reflect in the financial system, once amended. It is, however, very important that the hotel/supplier has given written authority and this document can be pulled in via Freshdesk.

INCREASE IN RATES/UPGRADES

Once the Amendment Offline, leading to an increase in rate, is processed, the Customer Service team member will need to send an email to the appropriate VCC team email address to notify them of the amendment offline done and to create a new VCC, as needed.

IF BOOKING IS PAST THE CHECK-IN DATE/STATUS IS INVOICED

DECREASE IN RATES/REFUNDS

The Customer Service team member no longer needs to reach out to the Finance team to notify them of the changes made. These rate adjustments due to Amend Offline will automatically reflect in the financial system, once amended. It is, however, very important that the hotel/supplier has given written authority and this document can be pulled in via Freshdesk.

INCREASE IN RATES/UPGRADES

Once the Amendment Offline, leading to an increase in rate, is processed, the Customer Service team member will need to send an email to the appropriate VCC team email address to notify them of the amendment offline done and to create a new VCC, as needed.

TRANSFER BOOKING AMENDMENT

For DOTWConnect Transfer Amendments, only the online AMEND BOOKING function will be available. As such, the functionality of amending a transfer is the same with doing an AMEND BOOKING for an accommodation booking.

After clicking the Amend booking button, one will be given the opportunity to amend the transfer booking, including the: Pick Up / Drop Off Details, Passenger Information and Occupancy Information.

Once the necessary amendments the customer is requesting has been done, the PROCEED WITH THE AMENDMENT button can be clicked. It will lead to a pop-up box to appear, which will give a quotation of the available rates, for the amendment the customer is requesting.

Make sure to go through with the rate plan quotations thoroughly and to advice the client accordingly of any additional selling price for the amendment, as the rate plan quotations can differ either on the new cancellation deadlines or the new total selling price.

If the customer/client agrees with the changes, and more importantly the additional rate to change, one may proceed to amend the booking and confirm the amendment the customer requested.

TOUR BOOKING AMENDMENT

For DOTWConnect Tour Amendments, only the online AMEND BOOKING function will be available. As such, the functionality of amending a transfer is the same with doing an AMEND BOOKING for an accommodation booking.

After clicking the Amend booking button, one will be given the opportunity to amend the transfer booking, including the: Pick Up Location (if applicable), Passenger Information, Occupancy Information as well as the Date and Time of the Tour.

If the customer/client agrees with the changes, and more importantly the additional rate to change, one may proceed to amend the booking and confirm the amendment the customer requested.

MISCELLANEOUS AMENDMENT

Once a Miscellaneous booking has been created and an amendment needs to be done, this can be also done via the Miscellaneous functionality in DOTWConnect. To do this, one must click on the MISC tab in the Operations Tab.

Once the drop-down list shows, the REQUESTS tab would need to be clicked.

The next page will load, bringing one to the Look Up Miscellaneous Details page which will allow one to filter for a Miscellaneous booking. The easiest way to pull up an existing Miscellaneous booking would be via searching via the DOTW MISC #. To do this, one would need to look for the DOTW MISC # row in the right part of the page and input the MISC # here.

DotW Misc # MISC - Branch Code -

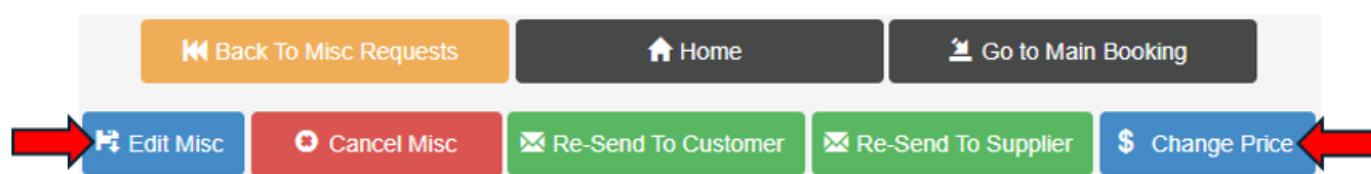

Once the DOTW MISC # has been input in the box, the APPLY FILTER button can now be clicked.

A short summary of the Miscellaneous booking will load in the page. One must click on the VIEW BUTTON to allow a user to load the full booking detail of the Miscellaneous.

#	DOTW Ref	Request Date	Service Name	Service City	From Date	To Date	Passenger Name	Status	Action
1	MISC-WBD-1347275	Wed Aug 28, 2024	Return Transfer - Hotel Bristol Geneva	GENEVA	Wed Sep 04, 2024	Wed Sep 11, 2024		Confirmed	

DOTWConnect will proceed to load the full booking detail of the Miscellaneous. There are two buttons that one can click/access to amend a Miscellaneous booking:

- EDIT MISC button; and
- CHANGE PRICE button.

EDIT MISC button: will allow one to amend the booking details, dates and cancellation deadline/penalty % of the booking.

CHANGE PRICE button: will allow one to amend the supplier cost, markup % and the selling price individually and accordingly. Clicking on the Update button will save the new cost/markup % and price.

BOOKING AMENDMENT – MULTI ROOM BOOKINGS

MRBs made by XML clients and WebBeds Admin users

There are no changes in the functionalities for Multi Room Bookings (MRBs) made by XML clients and WebBeds Admin users. This means that every room booked in a MRB made by XML clients and WebBeds Admin users will have it's own booking reference and will be handled on a per room basis – similar to Individual Room bookings.

In addition, both Amend Booking and Amend Offline booking functionalities are available for these types of MRBs. These applies to all possible amendments for a DOTW Booking.

MRBs made by POS Clients with a Direct Contract, DMC and Channel Manager supplier

For MRBs made by POS clients, with either a DC, DMC or Channel Manager supplier, the amendments that can be done either applies to all rooms in the booking (like Maker) or can be changed on a per room basis. Further, it can only be done via Amend Offline – wherein coordination with the hotel/supplier should be done first. As a guide:

DATE AMENDMENTS

Type of Amendments	Direct Contract	DMC	Channel Manager
Travel Dates	Can be changed on a per booking basis.	Can be changed on a per booking basis.	Can be changed on a per booking basis.
	<i>Date change applies to all rooms, once changed.</i>	<i>Date change applies to all rooms, once changed.</i>	<i>Date change applies to all rooms, once changed.</i>

For any Date Amendments done for MRBs made by POS clients with a DC, DMC or CM supplier, the date change applies to all rooms in the booking. This means that, if only one room in the booking would want to change the dates – and the rest of the rooms in the booking wants to keep the original dates, this is not possible as any date change will apply to all rooms in the booking.

In addition, only the first room would allow the user to adjust the dates, in case of date amendment that applies to all rooms.

Compensation	Can be changed on a per room basis	Can be changed on a per room basis	Can be changed on a per room basis

For all other amendments in the MRBs made by POS clients with a DC, DMC or CM supplier, these can all be changed on a per room basis without affecting the other rooms in the booking.

MRBs made by POS Clients with a Dynamic, Third-Party or Intercompany supplier

NAME AMENDMENTS

Type of Amendments	Dynamic/Hotel Chain	3P	Intercompany
Name / Occupancy	Can be changed on a per room basis	Can be changed on a per room basis	Can be changed on a per room basis

For Name Amendments in MRBs made by POS clients with a Dynamic, 3P or Intercompany supplier, these can be changed on a per room basis, without affecting the other rooms in the booking.

ALL OTHER AMENDMENTS

Type of Amendments	Dynamic/Hotel Chain	3P	Intercompany
Travel Dates	Can be changed on a per booking basis. <i>Date change applies to all rooms, once changed.</i>	Can be changed on a per booking basis. <i>Date change applies to all rooms, once changed.</i>	Can be changed on a per booking basis. <i>Date change applies to all rooms, once changed.</i>
Meal Plan / Bed Preference/ Room Type	Can be changed on a per booking basis. <i>Meal Plan amendment applies to all rooms, once changed.</i>	Can be changed on a per booking basis. <i>Meal Plan amendment applies to all rooms, once changed.</i>	Can be changed on a per booking basis. <i>Meal Plan amendment applies to all rooms, once changed.</i>
Nightly Booking Cost / Nightly Selling Price	Can be changed on a per booking basis. <i>Rate amendment is only possible for the total of all rooms in the booking.</i>	Can be changed on a per booking basis. <i>Rate amendment is only possible for the total of all rooms in the booking.</i>	Can be changed on a per booking basis. <i>Rate amendment is only possible for the total of all rooms in the booking.</i>
Compensation	Can be changed on a per booking basis. <i>Rate amendment is only possible for the total of all rooms in the booking.</i>	Can be changed on a per booking basis. <i>Rate amendment is only possible for the total of all rooms in the booking.</i>	Can be changed on a per booking basis. <i>Rate amendment is only possible for the total of all rooms in the booking.</i>

For all other amendments in the booking, these can only be changed on a per booking basis. This means that any changes done for one room will apply and affect all other rooms.

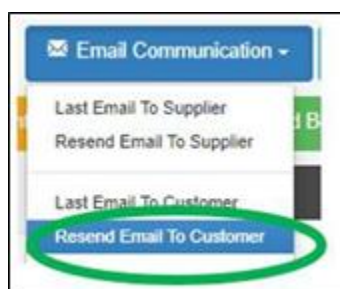

In terms of the nightly booking cost, selling price and compensation, these amounts would show as the total of all rooms in the booking.

BOOKING CANCELLATION – INDIVIDUAL ROOM BOOKINGS

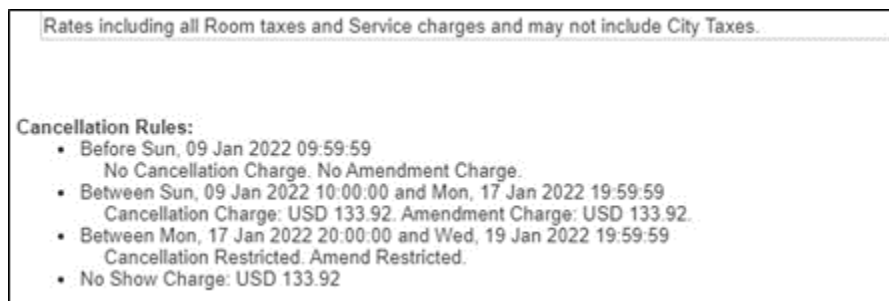

In DOTWConnect, one can do two types of booking cancellations: Online CANCEL BOOKING and CANCEL OFFLINE. The CANCEL BOOKING function will cancel the booking in the system, based on the cancellation policy that applies upon cancellation. The CANCEL OFFLINE function will allow a user to amend the cancellation penalty and update the cancellation in DOTWConnect, provided it is already cancelled with the hotel/supplier first.

CANCELLATION POLICY

Prior to cancelling a booking, the cancellation policy that applies for a booking can be viewed in the full booking summary. To do this, the full booking summary would need to be accessed. Once inside the booking summary, scroll down the page until the EMAIL COMMUNICATION BOX is seen. Click on this and choose to view RESEND EMAIL TO CUSTOMER.

This will open the LPO to the customer in the screen. Scroll down to the middle of the LPO, below the Daily Rates section, to see the CANCELLATION RULES that apply for the booking. The Date and Time noted in these rules are in the customer time zone and can be advised to the client.

CANCEL BOOKING FUNCTION

A DOTWConnect booking can be cancelled both by a WebBeds team member (via MyAdmin) or a customer (via DOTW.com or the client's own system). This process can be done for Accommodation, Transfer, Tour and Miscellaneous bookings.

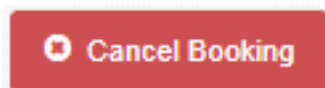

BOOKING CANCELLED BY A CLIENT

A client also has the same ability on their end (whether via DOTW.com or via their own system), wherein they can cancel a booking before cancellation deadline or after cancellation deadline. Restricted rates can be cancelled by clients, as well, on their system. One can determine if a booking is cancelled by a client by looking at the Booking History.

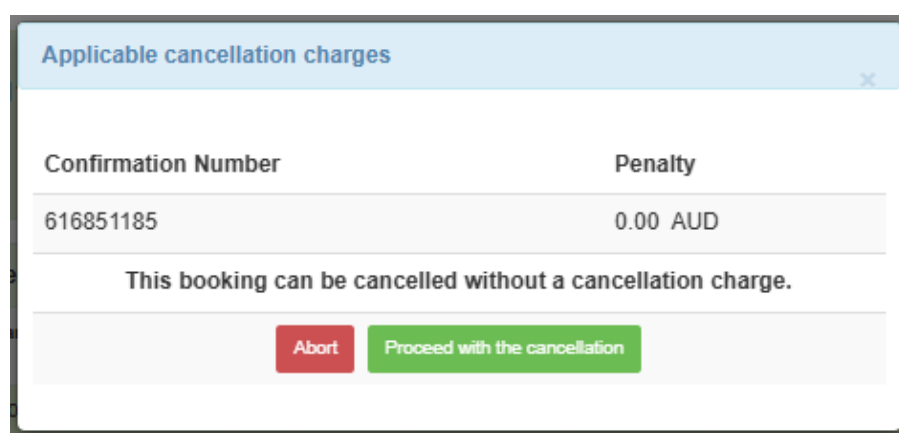

BOOKING CANCELLED BY A USER

A WebBeds team member can cancel a booking in DOTWConnect whether before cancellation deadline or after cancellation deadline, provided a booking is not yet invoiced. If a booking is cancelled before cancellation deadline, booking is cancelled without any cancellation charges. However, if a booking is cancelled after cancellation deadline, then cancellation charges will apply as per contract.

After checking the cancellation policy and if the client would like to proceed with the cancellation as per cancellation policy, a WebBeds user can click on the CANCEL BOOKING button in the lower part of the full booking summary.

DOTWConnect will show a pop-up box, wherein one will be informed if there is any cancellation charge that applies if the booking is cancelled at that exact moment. If the customer has accepted the cancellation charges or the booking does not have any cancellation charges, the PROCEED WITH THE CANCELLATION button can be clicked. This will cancel the booking in DOTWConnect and send the updated notifications, via the LPOs, to both the supplier and customer.

 A screenshot of a pop-up box titled "Applicable cancellation charges" with a close button (X) in the top right corner. Inside the box, there is a table with two columns: "Confirmation Number" and "Penalty". The first row shows "616851185" and "0.00 AUD". Below the table, a message states: "This booking can be cancelled without a cancellation charge." At the bottom, there are two buttons: a red "Abort" button and a green "Proceed with the cancellation" button.

Confirmation Number	Penalty
616851185	0.00 AUD

This booking can be cancelled without a cancellation charge.

Abort Proceed with the cancellation

CANCEL OFFLINE FUNCTION

If the booking has a cancellation charge and the customer is asking for a waiver, one will need to coordinate first with the hotel/supplier if they are willing to waive the fee or not. If the hotel/supplier is waiving the cancellation fee, whether partial or in full, the booking can be cancelled via the CANCEL OFFLINE functionality.

The Offline Cancellation functionality can be done for any booking, for any kind of Booking Channel/supplier and booking status. Unlike when the functionality was originally conceived, if a booking is already with an invoiced status, the booking can still be cancelled offline, and the refund amount will be adjusted and reflected in the financial system.

Before processing the Offline Cancellation functionality in DOTWConnect, the booking needs to be cancelled first with the hotel/supplier on their end or at least, authorized by the hotel to cancel with waiver. In addition, please ensure that we have documentation in writing from the hotel that they have authorized a waiver of the fees, from their end.

Once the hotel has authorized the cancellation with waiver or has cancelled the booking with waiver on their end, once can proceed to click the CANCEL OFFLINE button in the lowest part of the full booking summary.

A pop-up message from the system, indicating that the booking is within cancellation deadline, will show after the Cancel Offline button. If we have the written documentation from the hotel/supplier regarding the cancellation with waiver, one can proceed to click on the YES button to proceed.

The Booking is within Cancellation Deadline. Are you sure you want to cancel it ?

No

Yes

A new pop-up box showing the applicable cancellation charges will show in the screen. The WebBeds user will be allowed to amend both the supplier and customer cancellation charges, based on the waiver given by the hotel.

In addition, a WebBeds user will be given a choice if they want to send the supplier and/or the customer a notification that the booking was cancelled, if the booking is taken from a Direct Contract or DMC supplier. If the booking is taken from any other supplier (Dynamic, Third Party, Channel Manager, Intercompany), then only sending an email to the customer will be available.

Applicable cancellation charges - Cancel Offline

Confirmation Number	Penalty
603685675	Customer penalty: 910.0688 USD Supplier penalty: 810.0000 EUR

☒ Send email to customer
 ☒ Send email to supplier

The customer is on stop sell. Please make sure the customer current balance allows the cancellation.

Abort

Proceed with the cancellation

Once the cancellation penalties have been updated and the notification emails have been chosen, the PROCEED WITH THE CANCELLATION button can be clicked. The booking will then be cancelled in the platform, with the cancellation fees adjusted as what indicated previously.

The cancellation fees can only be adjusted once. If there are any further adjustments to the cancellation fees that will need to be done, this would need to be raised to the Accounting Team for a manual refund to be processed.

MANUAL REFUNDS

A booking will need to be manually refunded and sent to the Finance team if a booking comes from a customer paying via Credit Card or is a MOR customer.

For these cases, the written authorization from the hotel/supplier that they are authorizing a cancellation penalty waiver, whether full or partial refund, will need to be included in the email. The customer's email address would need to also be included in the email, so that the Accounts team can send the credit note/proof of refund once processed.

BOOKING CANCELLATION – MULTI ROOM BOOKINGS

MRBs made by XML clients and WebBeds Admin users

Both cancel booking and cancel offline functionalities are available for MRBs made by XML clients and WebBeds Admin users. Further, the cancellation functionalities for these booking work exactly the same as Individual Booking's cancellation, wherein each room has it's own booking and can be cancelled individually.

MRBs made by POS Clients with a Direct Contract, DMC and Channel Manager supplier

Both cancel booking and cancel offline functionalities are available for MRBs made by POS clients, with either a DC, DMC or Channel Manager supplier.

Further, cancellation waivers (via Cancel Offline) for MRBs made by POS clients, with either a DC, DMC or CM supplier, can be adjusted on a per room basis.

Type of Cancellation	Direct Contract	DMC	Channel Manager
Cancel Offline	Penalty fees can be adjusted/waived on a per room basis.	Penalty fees can be adjusted/waived on a per room basis.	Penalty fees can be adjusted/waived on a per room basis.

Once the Cancel Offline pop-up appears, it will show each of the rooms in the pop-up box. This gives the user the ability to adjust/waiver the cancellation fee for the applicable room – without affecting the other room, if needed.

Applicable cancellation charges - Cancel Offline ✕

Confirmation Number	Penalty
611351985	Customer penalty: 617.4767 USD Supplier penalty: 2190.0000 AED
611351975	Customer penalty: 363.7191 USD Supplier penalty: 1290.0000 AED

MRBs made by POS Clients with a Dynamic, Third-Party or Intercompany supplier

Like Maker's BackOffice, the rates for all rooms in MRBs made by POS clients with a Dynamic, 3P or Intercompany supplier would be combined into one total. Thus, if there is a need to make an adjustment/waive the cancellation penalty, these fees can only adjusted/waived from the total amount of all bookings in the MRB – like how BackOffice works.

Type of Cancellation	Dynamic/Hotel Chain	3P	Intercompany
Cancel Offline	Penalty fees can only be adjusted/waiver from the total amount of both bookings.	Penalty fees can only be adjusted/waiver from the total amount of both bookings.	Penalty fees can only be adjusted/waiver from the total amount of both bookings.

ON REQUEST BOOKINGS

On Request is an availability and booking status that can only be encountered in DOTWConnect. This status can be encountered on any of the services offered in DOTWConnect, including Accommodation, Transfer, Tour and Miscellaneous.

If an availability or a booking's status show ON REQUEST, this will mean that this booking will not be automatically accepted or confirmed by the supplier, for several reasons. If a booking is for an Accommodation, an on-request status would mean that either:

- A. The room availability is taken above confirmed availability/allocation/free sale, or
- B. A prior stop sell from the hotel was updated in the system.

If a booking is for a Transfer or Tour, an on-request status would mean that a supplier would need to confirm if all needed information to create the booking is given in the system before they confirm a booking. If a booking is a Miscellaneous, the booking will remain with an On-Request status until the Confirmation of the miscellaneous is input in the system.

Hotels or suppliers have the right to not accept the booking if a booking is On Request. Thus, if an accommodation booking is ON-REQUEST and the hotel is unable to accept the booking, one would need to politely let the client know of the situation and recommend for them to make a booking for a different hotel.

Hotels or supplier may also offer to accept a booking on a different rate or, for accommodation bookings, a different room or bed type. For these cases, this needs to be coordinated with the client first and get their approval to proceed. Once a client approves, only then can the on-request be confirmed on a different rate or room type.

Lastly, hotels or suppliers may deny the booking. While a hotel may deny an on-request booking on their end, some hotels would reply to our LPOs, advising they are not accepting and denying the booking. A WebBeds team member would need to update the booking with the denial and the name of the person who denied the booking.

FAILED BOOKINGS

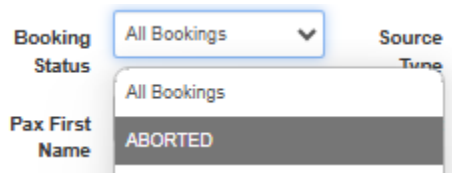

ABORTED BOOKINGS

Bookings with an Aborted status are bookings or services wherein the customer/client attempted to book on their end. However, the booking was not completed due to technical reasons. This is equivalent to the Failed Booking status in other WebBeds platforms.

There is no report that is run to determine aborted bookings. Most of the time, clients will reach out to notify us that due to an interruption during the booking or cancellation process, the booking was confirmed or cancelled on the client's end but not in our platform. Thus, they send WebBeds an email for us to check and confirm.

A WebBeds user would need to check what information one can use to try to pull up a booking. If a DOTW Ref # or booking information, such as travel dates and guest names, are available, these can be used to pull up the booking.

If one has tried to pull up the DOTW Reference number given but does not pull up any existing bookings, the booking may be an Aborted booking.

To pull up an aborted booking, one must change the Booking Status filter in Central Reservations Office to show only ABORTED BOOKINGS. Clicking on the search button after will allow the booking summary to show if it is aborted.

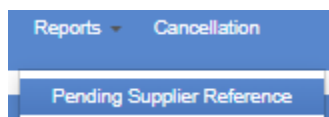

If a booking, after filtering for aborted bookings, is still not found, this needs to be checked with the Application Support team of DOTWConnect to confirm from the back end if a booking was indeed created or not. If a booking was found after checking with Application Support, one would need to reach out to the hotel/supplier to confirm if they hold a booking on their end and to negotiate the free cancellation.

If no booking was found after checking with application support or if the status of a booking is Aborted, the ticket can already be closed.

REPORTS

The Operations Tab of DOTWConnect gives access to the Reports functionality, which would allow the generation of reports for existing, created bookings. There are several different types of reports that can be created, which includes reports about:

- A. Bookings that are pending supplier confirmation numbers,
- B. A list of bookings made for a specific hotel or supplier,
- C. A list of bookings made by a specific client,
- D. A list of bookings with a specific booking status, and
- E. A list of bookings for a specific DOTWConnect service, among others

To pull out the reports, one would need to click on the Reports tab, which would pull down a drop-down list. From the list, the PENDING SUPPLIER REFERENCE OPTION will need to be chosen.

Doing this will load the Reports filter page.

Branch Name: ALL BRANCHES

- B. Customer Country Name
- C. Customers
- D. Supplier Name
- E. From & To and Include
- F. Product Type
- G. Booking Status

A WebBeds user can also filter if the report will only show bookings with supplier reference, without supplier reference or all bookings.

Lastly, the report can be sorted by different options through the Order by option.

A blue rectangular button with rounded corners and the text "View Report" in white.

Once the respective filters have been input and chosen, the View Report button can be clicked, located in the lowest part of the page. This will lead the platform to load the report, based on the data filtered.

Once the report loads, the platform will present the results based on the search filters input in the previous page. Clicking on the respective DOTW Reference number in the report will open the specific booking in a separate tab. A user also has an option to either print the report or download the report in an Excel file, which can be seen in the buttons at the lowest part of the page.

TRAINING VIDEO LIBRARY

To further help our team members receive the best support in their tasks, the CS Global Training team has created a training video library database. This training video database encompasses all our existing WebBeds platforms and the commonly used functionalities and topics.

One may click on the link below and it will open the full list of current CS Training videos, in a separate tab or browser.

DOTWConnect Training Videos:
