1. MAKER

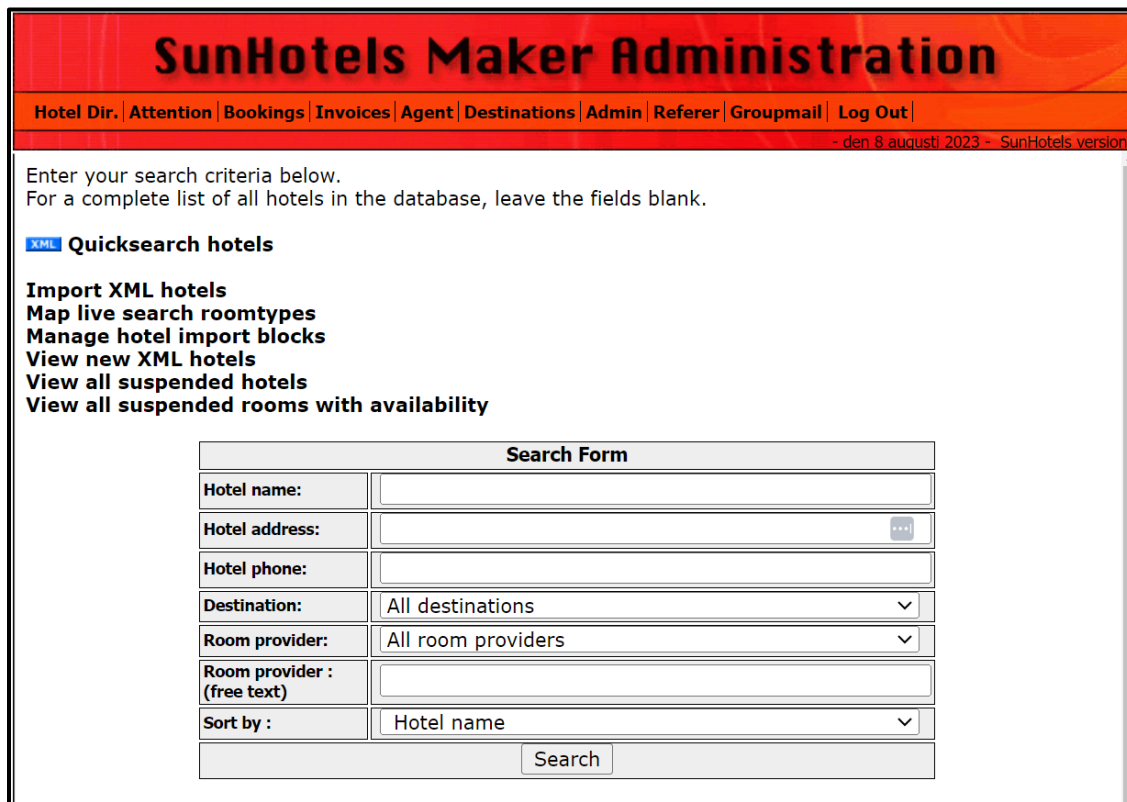

1.1. Homepage

The Maker homepage will be the first page the user will be sent too after successfully logging in.

On the upper side of the page, we have the main menu with several options to choose from, depending on what information or actions we are trying to access.

Below we will also have search options that will allow us to search for hotels within the platform.

As an observation, basically after we successfully log into Maker, we will be taken to the page that allows us to search for hotels, however we can easily navigate to which ever section we need by using the menu options.

The screenshot shows the SunHotels Maker Administration interface. At the top is a red header with the title "SunHotels Maker Administration". Below the header is a navigation bar with links: Hotel Dir., Attention, Bookings, Invoices, Agent, Destinations, Admin, Referer, Groupmail, and Log Out. A version string "- den 8 augusti 2023 - SunHotels version" is visible on the right. The main content area has a search instruction: "Enter your search criteria below. For a complete list of all hotels in the database, leave the fields blank." Below this is a section titled "XML Quicksearch hotels" with a list of links: Import XML hotels, Map live search roomtypes, Manage hotel import blocks, View new XML hotels, View all suspended hotels, and View all suspended rooms with availability. A "Search Form" is provided with fields for Hotel name, Hotel address, Hotel phone, Destination (dropdown), Room provider (dropdown), Room provider (free text), and Sort by (dropdown). A "Search" button is at the bottom of the form.

Menu options description

The screenshot shows a navigation bar with the following links: Hotel Dir., Attention, Bookings, Invoices, Agent, Destinations, Admin, Referer, Groupmail, and Log Out.

Hotel Dir. – allows us to search in the platform for hotels WebBeds currently has contracts with

Bookings – allows us to search for bookings or transfers.

Agent - allows us to search for travel agencies and find relevant information regarding them.

Destinations – allows us to search for hotels, by first selecting a city or area.

Admin – allows us to check which guest nationalities are valid for each contract.

1.2. Hotel Dir.

Hotel Dir. allows us to search for hotels in our system.

While the system offers multiple criteria you can use to search for a hotel, we generally use the name of the hotel, as that is the most convenient for us and is generally the information, we have available. By typing the name of the hotel in the Search Form, under Hotel Name, the system will be able to pull up all the results that match the word/words we have typed in.

Enter your search criteria below.
For a complete list of all hotels in the database, leave the fields blank.

XML Quicksearch hotels

Import XML hotels
Map live search roomtypes
Manage hotel import blocks
View new XML hotels
View all suspended hotels
View all suspended rooms with availability

Search Form	
Hotel name:	
Hotel address:	
Hotel phone:	
Destination:	All destinations ▼
Room provider:	All room providers ▼
Room provider : (free text)	
Sort by :	Hotel name ▼
Search	

If there are multiple results, the system will display all of them in the form of a list, displaying the complete name of the hotel and the hotel's location. For each hotel we will have two buttons that allow us to see more information: **[Add/Edit rooms]** and **[Edit]**. We can also see the physical location of the hotel on the geographical map by pressing the button between **Add/Edit rooms** and **[Edit]**. Usually, the button will be a red capital letter "A" or "M".

[Write review]	Adana Hilton SA			Adana, Adana	Hotel	[Add/Edit rooms]		[Edit]
----------------	-----------------	---	---	--------------	-------	------------------	---	--------

1.2.1. Add/ Edit rooms

This option shows us all the channels through which we can book a room at the selected hotel.

Show all
Non-xml rooms
AgodaXMLLive
AkuPush
AKUWbConnect
BookohotelXMLLive
DidaB2CXXMLLive
DidaXMLLive
DOTWWbConnect
DOTWXXMLLive

- **Orange color** - Non xml rooms, from Direct contract or DMC
- **Red color** - not active
- **Green color** - 3rd party / xml rooms

If we click on one of the suppliers, we will obtain a list of all the room types that can be booked through that particular supplier. Here we will also be able to find the unique id for each room type.

This id allows us to identify through which supplier the room was booked in SunHotels Maker.

	Show the map Send a map		
Sunhotel Class :	3 ▼ ▼	Official Classification :	3
Type of Accommodation :	Hotel	Adult Only: ☐	Block Infants: ☐
No. Rooms in Hotel :		No. Floors :	

Here we can find information such as: the name and location of the hotel, the physical address, the star rating (**Sunhotel Class**), hotel phone number and the name of the Contracts Manager from WebBeds responsible for this hotel (**Contractor**).

1.3. Agent

By accessing the **Agent** tab, we have the possibility to find profiles for our clients (travel agencies).

Similar to Hotel Dir., we will search based on the name of the travel agency. The search results will provide us with all the results that contains the key word or words we have used.

An important detail to note is that some agencies have multiple accounts in Maker, each account having different settings when it comes to the way the agency pays us, certain account settings or restrictions they might have and, as such, we will always need to be certain we are selecting the correct account from the list.

Search result Agents				
Expedia	U: Deleted_Expedia03	[Edit]	[Block list]	
Expedia Live	U: EANLive	[Edit]	[Block list]	
Expedia Live B2B	U: ExpediaB2B	[Edit]	[Block list]	
Expedia Live Mobile	U: ExpediaMobile	[Edit]	[Block list]	
Expedia Live MOD	U: ExpediaMOD	[Edit]	[Block list]	
Expedia Live Reduced	U: EANLiveReduced	[Edit]	[Block list]	

In order to see information about the account/ agency, we will have to click on **[Edit]**

A new window will open, offering information regarding the travel agency. The information is split across 4 tabs, as shown in the image below:

Add/Edit Agent

Agent Details !

Rates/Account !

Options

Content Control

Brand:	WebBeds Europe
Agent:	Expedia Live B2B
Sales Responsible:	Susana Doncel
Language:	English
Market Setting:	United Kindom
Username:	ExpediaB2B
Suspended:	☐ WebBeds Customer
Stop Sale:	☐
Comments:	
Address:	1111 Expedia Group Way W., WA

The **Agent Details** tab will tell us the name of the travel agency, the physical address, contact phone number and email address, the name of the Sales Manager handling the agency (**Sales Responsible**), the language in which the account is set up and the Market Settings.

The Market Settings allow us to know from which country the travel agency appears in our system and as such, allowing us to determine which CS office handles that specific travel agency (Europe, MEA, APAC, LATAM).

Rates/account tab tells us what is the default currency in which the travel agency is paying us for the bookings/transfers they make through WebBeds as well as if the agency has any commission.

The screenshot shows the 'Add/Edit Agent' window with the 'Rates/Account' tab selected. The window has a title bar with a close button. Below the title bar are four tabs: 'Agent Details', 'Rates/Account', 'Options', and 'Content Control'. The 'Rates/Account' tab is active, displaying a table with the following fields:

Tax Information:	
Primary Currency:	EUR
Prim. Curr. Factor (Euro = 100%):	87 %
Secondary Currency:	(None)
Commission:	0 %

Options will tell us if the travel agency is paying us via invoice or credit card.

The screenshot shows the 'Add/Edit Agent' window with the 'Options' tab selected. The window has a title bar with a close button. Below the title bar are four tabs: 'Agent Details', 'Rates/Account', 'Options', and 'Content Control'. The 'Options' tab is active, displaying a table with the following fields:

Invoice:	☒
Pay At Hotel:	☐
Invoice currency:	Invoice only in local currency

If the Invoice box is ticked, that means that the current payment method is via invoice. If the box is not ticked, the payment is via credit card.

1.4. Destinations

Allows us to search for hotel based on the location (city, area) where it is located.

Accessing Destinations will open a table with the list of countries and for each country cities within that country where we sell hotel rooms or transfers.

Destinations		
:: Manage Areas		
Abkhazia	active

Kruje	active	[Transfer providers] [Show hotels] [Resorts]
Ksamil	active	[Transfer providers] [Show hotels] [Resorts]

By clicking on the Transfer providers button to the right of a city, we will get a list of all the suppliers through which we can book a transfer. We will also have contact details for each supplier on the list and in which currency we are paying them.

Transfer providers for destination: Sydney						
Transfer provider	Currency	Phone number	Emergency phone number	E-mail	Status	Actions
FLY MILES	AUD	+61413092724	+61413092724	sales@flymiles.com.au	Active	
FLY MILES (Cruise)	AUD	+61413092724	+61413092724	sales@flymiles.com.au	Active	
GO SYDNEY SHUTTLE	AUD	+61 434 844 020 (office)	+61 434 844 020 (24hr)	info@gosydneyshuttle.com.au	Active	

Observation: if the list is blank, this means that we do not offer any transfers in that specific city.

By pressing on the Show hotels button, the system will pull up a list with all the hotels in our system located in that city, as shown below and from here we can navigate through the list or look up information about hotels exactly like we would do in Hotel Dir.

1.5.1 Booking Search

The first thing we need to do whenever we want to search for bookings or transfers is select the appropriate Operations Brand.

Operations Brand tells the system from which region the bookings/ transfers we are searching for are. For example, if we are only interested in searching for bookings from European clients, we will select the **WebBeds Europe** option.

As a note, in case we select the **WebBeds Europe** option, however the booking is from a different region, such as MEA or APAC, the system will not be able to locate the booking as it is searching only among the European region. As such, selecting the correct Operations Brand is very important.

In case we select the **All** option, the system will search for bookings/transfers from all regions.

Once we have selected the correct Operations Brand, we will press the Advanced Search button, which will open a new window with multiple criteria we can use to search for bookings or transfers.

An important thing to note is that the system can only search for either bookings or transfers, but not for both at the same time, as such, we will always have to tell the system what we are searching for.

In order to do that, we can check the top blue bar, which will display one of 2 messages: **switch to transfer search** or **switch to booking search**.

Switch to transfer search allows us to toggle the system to search for a transfer.

Switch to booking search allows us to toggle the system to search for bookings.

When searching for bookings or transfers, there are 3 preferred ways to search for a booking:

- **Sunhotels reference number**

This is our internal reference number for bookings/transfers made in SunHotels Maker.

A Maker reference number for bookings will always start with SH followed by 8 digits (SH#####). A Maker reference for transfers will always start with ST followed by 8 digits (ST#####).

We can also pull up multiple bookings or multiple transfers at the same time, as seen in the below images. In order to do that, we can write the reference numbers without the SH or ST and add a “,” after each reference.

Advanced Search: (switch to transfer search)

Booking number:
 ☐

This allows us to work on multiple bookings more easily at the same time, as any actions performed on one of them will not affect the others. Or we can rely on this if we need to compare the details on the opened bookings/ transfers. The system will allow us to pull up any booking, without it being necessary to have a specific criteria or common detail.

Accepted bookings

			[Voucher] [SpecialRequests]

We can have a special situation when the travel agencies books both the room/rooms and the transfer at the same time, as this will cause the system to assign the same digits to both, the only difference being the SH and ST in front of the number.

- **Travel agency/ Client reference number**

Booking number:
 ☐

Client Reference:
 ☒

Adult Guest Name:

This option allows us to pull up the booking in Maker using the travel agencies reference number. If we use this option, it generally will take longer for the system to find results, as it will have to check all the

bookings in the system that are a possible match. This method will only work if the travel agency has a client reference, as in the case of our retail clients, some do not have their own reference number and rely solely on the Maker one to distinguish bookings.

- **Lead guest name and check in date**

Adult Guest Name:	Calin Sarbu		
Hotel Name:	☐		
Destination:	☐		
Arrival Date: (yyyy-mm-dd)	☒	From: 2023-09-16	To:

This option allows us to search bookings or transfers when we do not have any reference, but we do have the main booking details. As such, we can use the lead guest name and the check in date (date of arrival) to locate the reservation.

1.5.2. Booking details

Once we have selected our search criteria and press the search button, the system will automatically pull up the booking/booking. In the below image we can see how the booking details summary looks.

	A	B	C	D
AGENT	Booking details ⓘ SH17249662 🛒 Arrival: 2023-08-10 Departure: 2023-08-11 Hotel info: Quality Inn Umatilla - Hermiston, (Umatilla (OR), Umatilla) Room Type: Double room King bed Sunhotels Choice OBC WbConnect Live Rooms/Apts: 1 Board: Breakfast Added: 2023-08-09 21:37:18 Modified: 2023-08-09 21:37:20 Confirmed to Hotel XML XML	Payment details Agent name: Expedia Live MOD Client reference: 64992220 Special Requests: Total amount: 113€ Book OK 115.4 USD XMLID: GN80919371930QJKZ8520#86844918 XMLItemID: c0cd99e8-eb1f-4cac-864f-a4277875690e[False API] Superdeal No grace period exists Booking Notes CR [view booking history]	Adult Guests (1) Joseph Flores Children Guests (0) Infants (under age of 2) No	[Voucher] [SpecialRequests] [ConfirmationEmail] [CancelReservationEmail] [Note] [Cancel]

We can divide all the booking details into 4 sections/columns:

A. Booking Detail section

The screenshot shows the 'Booking details' section of a booking interface. It includes a vertical 'AGENT' label on the left, a title 'Booking details' with an information icon, a booking reference 'SH17249676', and a red suitcase icon. Below these are the arrival and departure dates, hotel information, room type, and a 'WbConnect Live' link. Numbered callouts point to specific elements: 1 points to the 'AGENT' label, 2 points to the 'Booking details' title, 3 points to the booking reference, 4 points to the departure date, 5 points to the hotel information, and 6 points to the room type.

1 **Agent info** – by clicking on the text, the system will open a new window where we can find the name of the travel agency, contact details for the travel agency (email address, phone number) as well as information regarding which country the travel agency is from.

The 'Agent Info' window displays contact and operational details for 'Hotelbeds DMCC TPS'. It is divided into two main sections. The left section contains the agency name, address, email, operation telephone, operation email, and operation escalation email. The right section contains sales responsible, market settings, language, and free cancellation time. Callouts 'a' through 'd' point to specific fields: 'a' points to the agency name, 'b' points to the operation telephone, 'c' points to the operation email, and 'd' points to the market settings.

a – name of the travel agency

b – travel agency phone number

c – travel agency email address

d – Market Settings will always tell us from which country the travel agency appears in our system

We can also simply hover with the cursor over the text and a pop-up box will appear with the same information.

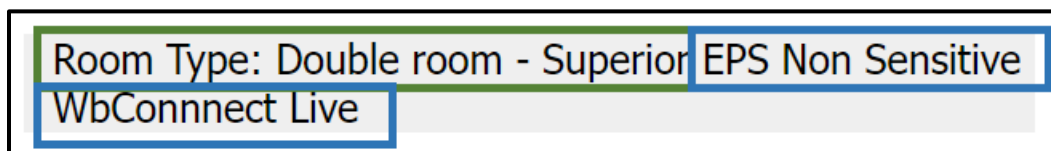

2 Room ID – if we hover with the cursor over this, we will be able to see the Room ID for this booking. The room ID can be used in case we need to find more information regarding the room booked or the provider of this room.

3 SunHotels reference number – this is our reference number for the booking. By clicking on it, the system will reload the booking page, acting similar to a refresh function. This can be used in case we want to check for any adjustments made to the booking that are not yet reflected.

4 Arrival and Departure – these indicate the check-in (arrival) and check-out (departure) dates of the booking.

5 Hotel info – here we can see the name of the hotel booked as well as the city in which the hotel is located.

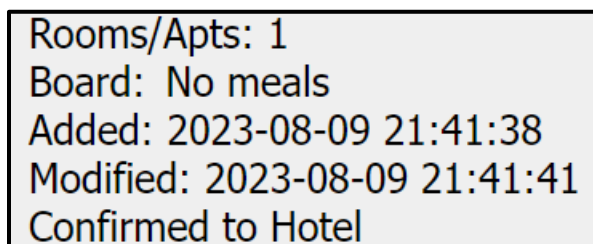

6 Room Type – indicates to us 2 things: 1. the room type booked by the travel agency and 2. the channel through which the booking was made.

The first part (highlighted in green) indicates us the room type booked by the travel agency, as the room is described in our system.

Observation: It is important to note that the room type described in our system might not always appear exactly as it will appear in the hotel's system or on their website.

The second part (highlighted in blue) indicates the channel through which the booking was made.

Room/Apts – will indicate to us how many rooms there are booked under this booking reference.

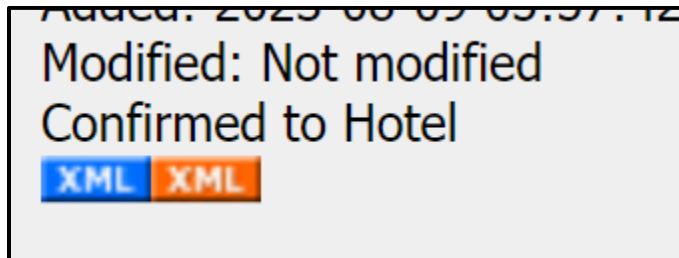

Board – indicates in the room was booked together with a meal plan or not.

Observation: Travel agency can book through SunHotels one or multiple rooms at the same time. If they choose to booked multiple rooms at the same time, they will all appear under the same reference number, Rooms/Apts being the only place we can see clearly how many rooms there are. All the booked room under the same SunHotels reference have the same details (same check-in and check-out date, same hotel, same room type, same meal plan) and the only thing that will be different is the passenger names in each room.

Added – will tell us the date and time of when the booking was created in Maker, in Spain Time Zone.

Modified – will tell us the date and time of when the last modification was made to this booking in our system.

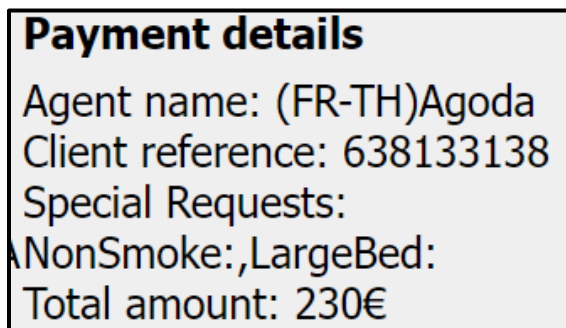

Confirmed – will tell the date and time of when the hotel accepted our booking. If the hotel is setup to automatically accept the booking, the time and date should be identical to that of the Added line. If the hotel needs to confirm the booking via email link, it will display when they accepted the booking.

The blue XML icon indicates if the channel through which the booking is made is connected to the WebBeds system via XML connectivity. If that button appears, that means that booking is made via XML connectivity and if it does not appear, it means it is not made via XML connectivity.

The orange XML icon indicates if the travel agencies system is connected to the WebBeds system via XML connectivity. If that button appears, that means that the travel agency is a wholesaler agency (XML customer) and if it does not appear, it means that we have a retail agency as a client.

B. Payment Details, Cancellation Rules & Booking History section

Agent name – will indicate what is the name of the travel agency who made the booking.

Client reference – displays the travel agencies reference number; this is only available for wholesaler agencies or in case the agency manually adds their reference number when creating the booking. If they do not add their reference number, the field will remain blank.

Special Requests – if the travel agency adds a special request when creating the booking, the request will be visible here and the system will also try to forward this request to the booking channel through which the booking was created.

Observation: The system will only be able to forward the special request if there is a valid email address associated to the booking source.

Total amount – indicates the total selling price (price the travel agency is paying us) and the currency in which the agency is paying us for this booking. The price displayed can be net or gross, depending on how the travel agency is paying us.

The screenshot shows a booking confirmation box with the following fields and callouts:

- 1** points to **XMLTotalPrice: 219.09 EUR**
- 2** points to **XMLID: 8973942514**
- 3** points to **XMLItemID: 14427116**
- 4** points to **Superdeal** (in red text) and **No grace period exists**
- 5** points to **CR** (in red text) under the **Booking Notes** section

1 XMLTotalPrice (Book OK) – displays the buying price and currency in which we are paying for the room/rooms in case of Dynamic bookings, 3rd Party suppliers or Intercompany bookings.

2 XMLID – displays the supplier booking reference when the booking is made via a 3rd party supplier or intercompany booking.

Observation: Sometimes the hotel confirmation number for a dynamic booking will be indicated in the XMLID, usually when we have multiple references. In case we cannot clearly determine which of the references is the HCN, it is best to double check with the hotel.

3 XMLItemID – in certain cases indicates the hotel confirmation number, if the booking is made through a hotel chain (dynamic booking) or it will simply reindicate the WebBeds reference without the SH in front.

The **XMLTotalPrice**, **XMLID** and **XMLItemID** will only appear if the booking is made through a 3rd Party Supplier or Hotel Chain. In case our booking is made through a different channel, we will instead have a list with the contracted rates, as shown below.

The screenshot shows a booking confirmation box with the following fields:

- Total amount: 285€**
- SPECIAL OFFER** (in red text)
- Cont rate:** (highlighted with a blue border)
 - 81,75
 - 96,75
 - 111,75
- Booking Notes**
- CR**

These contracted rates (**Cont rate**) will indicate to us the nightly rates based on the contract from which the booking has been made, however the system will not tell us in which currency the rates are nor does it always clearly express which rate is for which night. As such, if we need to check the nightly rates, we should also double check in Hotel Maker.

4 Superdeal – if this row appears, that means the booking is made under a non-refundable and non-amendable cancellation policy.

5 CR – is short for Cancellation Rules. If we left click on CR, a new pop-up will open and we will be able to see the cancellation rules for the booking.

Cancellation rules for **Leonardo Hotel London Croydon (ex Jurys Inn Croydon)**

Cancellation made less than 1 day (12:00) prior to the arrival will be charged with 100% of the total booking value.

Please note, If you cancel now, a cancellation fee of 0 will be charged.

On the lower section of the window, we will also be able to see if there are any charges and how much would those be if we were to cancel the booking right now.

In case we see the word **[Transfer]** appearing in this column, in bold letters, that means that there is also a transfer booking under the same reference number, associated with our booking.

[view booking history]

[View booking history] contains 4 tabs, with various information regarding the booking. It is important to note that in all tabs, we will always have two lines. The first one, called **booked** indicates to us information

that the end clients have booked with, and the second line, called **current** indicates the default information from our system related to the travel agency. The most relevant information is the following:

[view booking history]

Booking history for booking SH17288803

Room History Voucher History Hotel History Customer History													
Version	Beds	Extra Beds	Room Type	Provider	XML Room Id	XML Provider	Room Provider Id	Room Provider	No Refund	Hide Extra Beds	Hide Extra Beds Child	Is Live Room	
booked	3	0	Double room - Spacious	BAR RO - CDS 2ad+1ch		SiteMinder	10363	Sunhotels Jurys Inn & Leonardo Hotels UK - BAR	No	No	No	No	
current	3	0	Double room - Spacious	BAR RO - CDS 2ad+1ch		SiteMinder	10363	Sunhotels Jurys Inn & Leonardo Hotels UK - BAR	No	No	No	No	

In the **Room History** tab, we can find information regarding what type of room was booked in our system, under Room Type.

XML Provider will indicate who is the xml supplier in case the booking is made via xml connectivity. In case it is made through direct connectivity, this column will be empty. This is particularly relevant when the booking is made with a Channel Manager.

The room provider will indicate if the booking is made with a hotel chain, channel manager or supplier.

[view booking history]

Booking history for booking SH17288803

Room History Voucher History Hotel History Customer History							
Version	Destination	Resort	Accommodation Type	Star Rating	Features	Curre	
booked	54	2847	Hotel	4	Air Conditioning, Bar, Elevator, Restaurant, Telephone, TV, Wireless internet,	GBP	
current	54	2847	Hotel	4	Air Conditioning, Bar, Elevator, Restaurant, Telephone, TV, Wireless internet,	GBP	

Under the **Hotel History** tab, we have information regarding some of the features of the booked hotel and the star rating of the hotel.

[view booking history]

Booking history for booking SH17288803

Version	Agent Commission	Currency	Factor	Company	Force Credit Card	Invoice Account	Is Test Agent	Entry Point	Customer Country	B2C
booked	0	EUR	87	15	No	48	No	XMLAPI	England	Yes
current	0	EUR	87	15	No	48	No		England	Yes

Under the **Customer History** tab, we have information regarding the nationality of the guests, in the Customer Country column. When checking for the guest nationality, we always look at the booked line.

C. Passenger/ Rooming List section

Adult Guests (2) Herman Goysens Arnsd Bernhard Children Guests (0) Infants (under age of 2) No
--

This column will give us the names of all the passengers (adults, children, infants) on this booking, and the age in case of children. The system will always arrange the adult guests on top, followed by the guest children and last the infants. If there are no children on the booking, the area where their names should appear will be blank. If there are no infants on the booking, the system will display “No” and in case there is at least one infant it will display “Yes”.

It is important to note that the system will not be able to retrieve the number of infants from the clients side and is only able to forward to the hotel/supplier either that there is at least one infant on the booking (Yes) or that there are no infants on the booking (No).

D. Booking Action list section

[Voucher]

[SpecialRequests]

[Resend ReservationEmail]

[ConfirmationEmail]

[CancelReservationEmail]

[Note]

This section contains all the buttons and actions we can perform on a booking in Maker.

[Voucher] – allows us to see the booking voucher sent to the travel agency and allows us to perform manually changes within the platform for the passenger names, check-in and check-out date.

PROPERTY:	Simons Boutique Hotel
ADDRESS:	69 Rue Riquet 75018 Paris France
PHONE:	00330188401600

ROOM TYPE:	Double room - Comfort
BOARD/REGIMEN:	Breakfast
BOARD LABEL:	
ARRIVAL DATE:	2023-09-22
DEPARTURE DATE:	2023-09-25
CLIENT'S NAME:	Adult Guests (6) SIMON LESTER URBEN SMYTHE ETTIENNE BREYTENBACH EDWARD JANSEN VAN RENSBURG JOHANNES HENDRIKUS MOLLER WILLIAM CRAWFORD

When first accessing **[Voucher]**, we will only be able to perform changes to the existing names. All we will need to do is replace the existing names in the editable brackets with the new ones. We can also leave a bracket completely empty, but we cannot increase or decrease the number of brackets. Once we have made the change, we can press the Save Voucher.

IMPORTANT INFORMATION:	Contact us https://www.webbeds.com/contact-global-cs/ City Tax is NOT included. City Tax must be
Internal voucher text:	E: reservations@sunhotels.com ; T: +34 971 425 588

Booking notes:	All stays in a hotel/apartment will charge a local city tax. It must be paid directly to the hotel/apartment upon check in/out. Bar closed
Save Voucher	[Create Manual Voucher]

1

2

If we need to change other information, we can press the **[Create Manual Voucher]** button, which will allow us to edit the other brackets as well. Once we have made the changes, we can press the **Save Voucher** button for the information to be updated.

Booking notes:	All stays in a hotel/apartment will charge a local city tax. It must be paid directly to the hotel/apartment upon check in/out. Bar closed
SEND VOUCHER TO:	hotelsupport.europe@hotelbeds.co...
[Print] [Send] [Modify]	[Back to accepted bookings] [Back to new bookings]

Once we press the **Save Voucher** button, we will be taken to a new page where we can view the updated booking details and from here, we will have to press **Send** to resend the voucher to the travel agency.

If we have used the Create Manual Voucher option, on the booking, the **[Voucher]** button will change to **[Manual Voucher]**

[Manual Voucher]

**[Resend
ReservationEmail]
[ConfirmationEmail]**

Observation: From all the changes we perform here on the booking only the name changes will be visible. All the other changes will only appear in the Voucher. On the booking summary, the remaining details will be unchanged, and the travel will also not be able to see any changes made on our end.

[Special Requests] – allows us to send special requests to the hotel or supplier directly from the system. This feature only works if the booking is made directly through the hotel, through a DMC or Channel Manager.

[Resend Reservation Email] – allows us to resend the booking details email (LPO) to the hotel/DMC. Here we also have the possibility to change the email address where we are sending the LPO.

CLIENT'S NAME:	Adult Guests (2) Laura Gostautaitė Gostautiene Stase Children Guests (0) Infants(under age of 2)No
EMAIL TO:	reservations@voyages.com.au
Send Cancellation Send Cancellation FAX	

One important thing to note is that once we sent the cancellation email, the system will mark the booking as cancelled in our system and this button will disappear and as such, it will not be possible to resend the cancellation request.

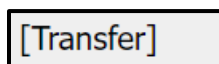

[Note] – Allows us to view all the notes previously added on the booking and add new notes.

This section allows us to add a new note and using the **Save** button to save it in the system. Any note we add will be saved under our SunHotels Maker user and the system will show the time and date when we have added the note. We can see all previously added notes, however we cannot edit or remove them.

In case we perform manual adjustments in the system, such as changes in the manual voucher or price changes in BackOffice, the system will add notes under our name regarding the made changes, as well as the time and date when the changes were made.

Below we have the Reservation E-mail history, which will show us a list of all the emails sent to the hotel. The system will show us from which email address from our system the email was sent (usually noreply@fitruum.com or noreply-bookings@webbeds.com), and to which email address the information was sent and the time and date when it was sent.

If the transfer button appears, this indicates that it is possible to add a transfer to the booking.

[Cancel] – allows us to cancel a booking made through xml connectivity in our system and send the cancellation request if the booking is made through a 3rd party supplier, hotel chain or intercompany. This button will not appear in case we have a dc booking and once we have pressed it, it will change the status of the booking to cancelled in our system and will no longer appear.

[Delete] – allows us to change the status of a booking to cancelled in our system, however this does not send a cancellation request to the booking channel – cancellation will have to be actioned manually first. This button is used only if we cannot cancel the booking using the **[Cancel]** or **[Cancel Reservation Email]** button.

1 – if this icon appears, it means that we are being paid a commission by the hotel for this respective booking.

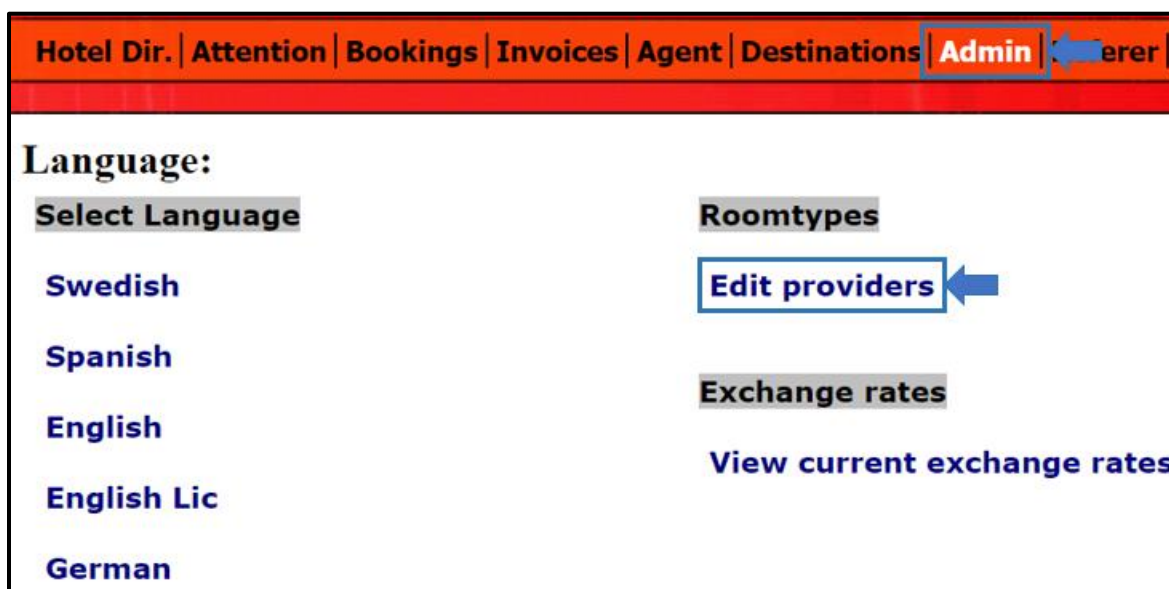

2 – if this icon appears, it means that we are paying the hotel/supplier through a VCC (Virtual Credit Card).

1.5.3. Identifying the booking channel in Maker

	Resend Reservation Email button available	Were the LPO was sent, based on the information in	The XML Provider appears in Booking History	The word SunHotels appears in the Room type row	The blue xml button appears on the booking
DC Booking with the hotel	Yes	Directly to the hotel	No	Most of the time	No
DMC	Yes	To the DMC	No	No	No
3rd Party Supplier	No	No LPO sent	Yes	No	Yes
Hotelchain / Dynamic booking	No	No LPO sent	Yes	Most of the time	Yes
Channel Manager	Yes	Directly to the hotel	Yes	Most of the time	No

1.6. Admin

This tab allows us to see which nationalities are accepted by each hotel from our inventory. This can be useful in case certain countries/ nationalities are added or not added correctly and this can result in us allowing our clients access to rooms they should not have access based on the nationality.

After we select the **Admin** from the main menu, we will click on **Edit providers**.

A list with all our providers will start to load and we can search the contract/ provider we are looking for by copying the information found after the room type in the booking section. We will use the browser's search function (Ctrl + F) and search on the admin page using the complete name of the contract.

If we have done everything correctly, we should have only one result, which is the contract we are looking for.

10703	Sunhotels JSR Evenia BAR Net	WebBeds Eu...	Int	Yes	Offline							
13895	Sunhotels JSR Evenia FIT	WebBeds Eu...	Int	Yes	Offline	JSR				B2C		
10652	Sunhotels JSR FIT Alexandre	WebBeds Eu...	Int	Yes	Offline					B2C		

Once we have located the contract, we can press the Edit button (blue button highlighted above) and this will open a list with all the countries(markets) that are open or closed.

Observation: In some cases, it is possible that a country is added to the list as part of a group of countries, for instance a country such as Belarus is part of Commonwealth of Independent States (CIS), so it is possible for it to be placed in this list once under the CIS group and a second time under its own name.

Markets			
Market	Close	Open	
Africa - Algeria	☐	☒	
Africa - Angola	☐	☒	
Africa - Benin	☐	☒	
Africa - Botswana	☐	☒	
Africa - Burkina Faso	☐	☒	
Africa - Burundi	☐	☒	
Europe - Slovenia	☐	☒	
Europe - Spain	☒	☐	
Europe - Sweden	☐	☒	

If the closed box is ticked in front of a country, that means that the contract is not valid for that country and as such, the system should not allow our clients to book rooms from the contract/ through this supplier if they have selected a nationality that is closed in our system. If a country has the open box ticked, it means that our clients can book rooms from the contract/ through this supplier.

1.7. Transfers

1.7.1. General

When it comes to booking transfers, our clients have two options to choose from: they can either book the transfer together with the booking or book the transfer separately.

If the travel agency books a transfer together with the hotel room, both the transfer and the booking will have the same reference number. The only difference between them will be that the room reference number will start with SH and the transfer reference number will start with ST.

When searching for a transfer, we use the Advanced Search option, making sure we have set the system to search for transfers instead of bookings:

Advanced Transfer Search: (switch to booking search)

☒ Booking number:
☐ Client Reference:
☒ Adult Guest Name:
☐ Hotel Name:
☐ Destination:
☒ Arrival Date: (yyyy-mm-dd) From: To:

We can search for the transfer using the SunHotels reference number or using the lead guest name and transfer date.

Children Guests (0)

Infants (under age of 2) No

If we notice that the transfer has the line Board: missing board that means that the transfer is not connected with a hotel booking. This does not mean there is no hotel booking made for the same passenger with the same details, but rather, only that the 2 items were booked separately.

Board: missing board

Transfers are only forwarded to the provider two weeks before the arrival date, as there are many changes to flights and in case the travel agency needs to make amendments before the 2-week deadline, they can simply cancel the transfer and rebook with the desired changes.

Proceeding this way does not guarantee that they will be able to find availability.

In case we notice that on the **Confirmed to provider** line there is nothing added, that means that the system has not yet sent the transfer to our supplier.

In case we see this clock icon on the transfer, that means that there are certain time restrictions with this specific supplier and in case the agency asks us to change the time, it is possible that they might have to pay for supplements in order to proceed with the change.

1.7.2. Transfer amendments

In case we need to perform manual amendments of transfers, we can update the information in the **[Voucher]**.

If it is not possible to change certain information, such as adding an extra passenger or change the resort, it will not be possible to properly reflect the changes in our system, not to mention a different resort/hotel might have different transfer indications or pick-up/drop off locations.

1.7.3 Pick-up/ Drop-off information

In case we need to contact the supplier through which we made the transfer or simply need to check the pick-up/drop-off information, we can go to **[Voucher]** and from there we can press the **Save Transfer Voucher** button.

Save Transfer Voucher

The system display the transfer details and we can select the **[Print]** option to see the contact details for the supplier.

2. BACKOFFICE

BackOffice allow us to make manual price changes in our system, change the payment method for bookings and the booking provider.

2.1. Price Changes

BackOffice

Accommodation Amendment

Amendment	Booking id	Amendment type	Amendment Reason	Get
- Accommodation - Transfer	SH17156800	- Select -		

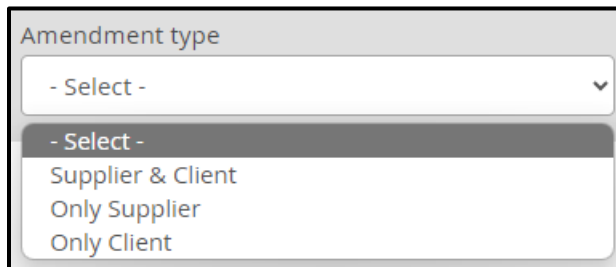

1 2 3 4

1 Amendment – similar to SunHotels Maker, BackOffice will always require us to specify if we are trying to pull up a booking or a transfer. We simply need select between Transfer and Accommodation with a left click

2 Booking id – we will need to add the booking/transfer reference.

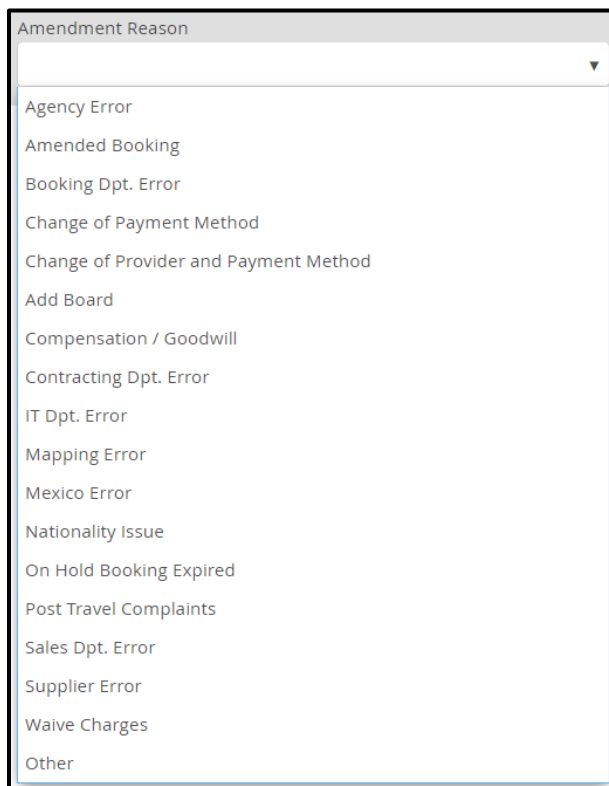

3 Amendment type – here we will have to select if we want to change the buying price, selling price or both.

4 Amendment Reason – the system will ask us to select the reason as to why we are making a manual change to the booking.

When selecting the Amendment type, we can choose to change both the buying and selling price (Supplier & Client) or just the buying or just the selling price (**Only Supplier** or **Only Client**).

If we opt for the Only Supplier or Only Client option, the system will only allow us to change that specific price and will not make any adjustments to the other values. If we opt to change on both sides, the system will perform automatic adjustments to the selling price based on the changes we make to the buying price.

We will always be requested to select a reason as to why we are making the change, to pull up the booking. From this list, we will generally select the option that best describes the reason why we are performing the manual change. We can select one or multiple reasons.

Booking id SH17156800	Amendment type Supplier & Client	Amendment Reason Amended Booking ✕	Get
--------------------------	-------------------------------------	---------------------------------------	-----

Once we have filled in all the relevant information, we can press the **Get** button in order to pull up the booking.

SH 17156800		Amendments 2	Booking accepted	Total agent amount 193.00 EUR	
Added	2023-08-02 14:46	2 adults	CLAUDIO TROCADO	Agent name	DOTW EUR
Hotel	Andaman Embrace Patong (Phuket)		EDUARDA TROCADO	Credit card	TROOVO-WEX INC. VCC
Rooms	1 x Double room - De Luxe	Infants	No	Provider	WRF641LEWBC26G8E68
Board	Breakfast			Provider	Sunhotels FIT Ruums GROSS
Dates	2023-12-27 to 2024-01-02			Provider payment method	VCC

On the upper side of the window, we will see a booking summary, mentioning details such as the hotel's name, check-in and check-out of the booking, room type, passenger names, meal plan, payment type, etc.

We can split the lower area into 2 sides: the left side being related to changing the buying price and the right side related to the selling price.

Supplier amendment will show all the information regarding the buying price as well as allow us to make manual changes to the buying price. To make changes, we will first have to select either the **Increase** or **Decrease** button. Depending on which button we select, we will be telling the system if the new price will be higher or lower than the original price.

Once we have pressed one of the buttons with left click, the **New contract price (net)** and **Price change (net)** cases will become editable and there we can adjust the price.

If we know the now total price, we can simply type it in the **New contract price** case.

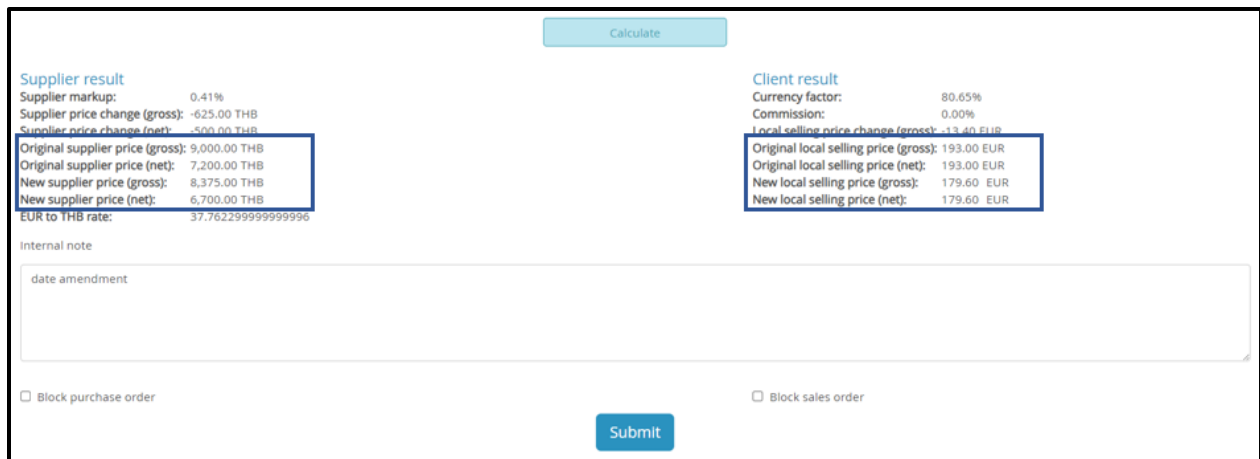

If we know how much we need to add to or subtract from the current buying price, we will write in the **Price change (net)** the amount.

Regardless of which of these options we select, by adjusting one of the cases, the other will automatically adjust.

Once we have added the desired price, we will have to press the **Calculate** button.

This will show us a preview of how much the prices were as well as the values that they will have if we perform the change, as indicated in the below picture.

Supplier result		Client result	
Supplier markup:	0.41%	Currency factor:	80.65%

It is important to note that at this stage, no changes have been made in the platform. What we are seeing under the Calculate button is just a preview of how the prices will look if we decide to proceed with the change.

The system will calculate both the buying and selling price, even if you we only modify the buying price. This is because if we selected as Amendment Type the Supplier and Client option, the system will automatically apply the mark up and conversation rate, if applicable to the selling price, even if we have only changed the buying price.

For the other Amendment Type options, the system will not automatically perform adjustments, forcing us to manually calculate the new prices.

Client amendment will give us information regarding the selling price.

If we want to perform manual changes to the selling price, we will have to select the Increase or Decrease button depending on if the new selling price is higher or lower than the original. Once we do that, the Price change (gross) will become editable and there we will have to add the amount that we want to add or to subtract from the original gross price in order to obtain the new price.

As an example, let us say that the original gross selling price is 190 EUR and we need to manually change the price to 250 EUR. In order to do that, we will have to press the Increase button, as the new price will be higher and in the Price change (gross) case we will add 60, as by adding 60 EUR more to the original price we will get 250 EUR.

Submit

After we have changed the prices, we will have to add a note as to way we are making manual changes to the prices and in order to finalize the change, we will have to press the Submit button.

⚠ The link between the supplier and client financial parameters will be broken, no calculation will be performed on future amendments. ✕

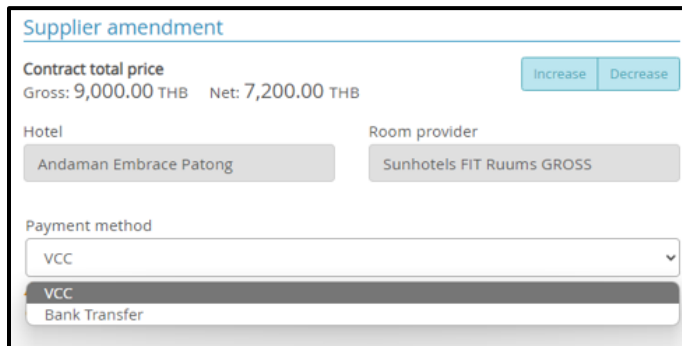

Observation: If we only make changes to the client or only on the supplier's side, the system will not perform any adjustments and even more, it will break the link between the supplier and client side. This

will cause the system to no longer perform any future price adjustments. This means that if we decide to break this link, it will not be possible to reestablish it.

2.2. Change of payment method

By selecting Change of payment method option in the Amendment Reason, the system will allow us to modify the payment method of the booking.

When pressing the Get button, we will have an additional row, called Payment method. Here we can toggle the payment method through which we are paying the booking provider between **VCC (Virtual Credit Card)** and **Bank Transfer (Invoice)**.

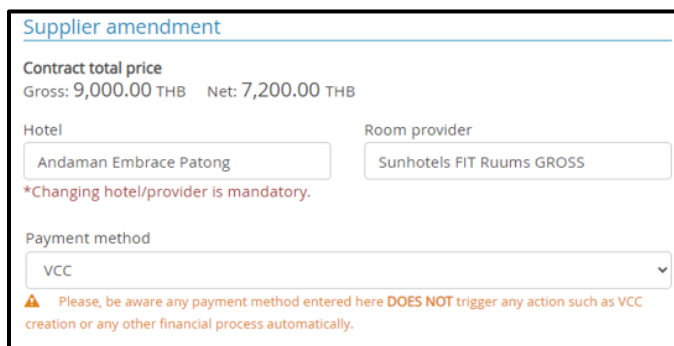

The screenshot shows the 'Supplier amendment' form. At the top, it displays 'Contract total price' with 'Gross: 9,000.00 THB' and 'Net: 7,200.00 THB'. There are 'Increase' and 'Decrease' buttons. Below this, there are two input fields: 'Hotel' with the value 'Andaman Embrace Patong' and 'Room provider' with the value 'Sunhotels FIT Ruums GROSS'. The 'Payment method' is shown as a dropdown menu with 'VCC' selected. Below the dropdown, there are two options: 'VCC' and 'Bank Transfer'.

Once we have changed the payment method, we will also need to inform the Accounting Department regarding the change, as otherwise they will not know we have made the change and will continue to use the default payment method.

If we change the payment method to VCC, the system will not generate a new virtual credit card.

2.3. Change of provider and payment method

If we select the Change of provider and payment method option in the Amend reason, the system will allow us to also adjust the payment method as well as the hotel name and the name of the booking channel (Room Provider).

The screenshot shows the 'Supplier amendment' form. At the top, it displays 'Contract total price' with 'Gross: 9,000.00 THB' and 'Net: 7,200.00 THB'. There are 'Increase' and 'Decrease' buttons. Below this, there are two input fields: 'Hotel' with the value 'Andaman Embrace Patong' and 'Room provider' with the value 'Sunhotels FIT Ruums GROSS'. Below these fields, there is a red warning message: '*Changing hotel/provider is mandatory.' The 'Payment method' is shown as a dropdown menu with 'VCC' selected. Below the dropdown, there are two options: 'VCC' and 'Bank Transfer'. At the bottom, there is a warning message: 'Please, be aware any payment method entered here DOES NOT trigger any action such as VCC creation or any other financial process automatically.'

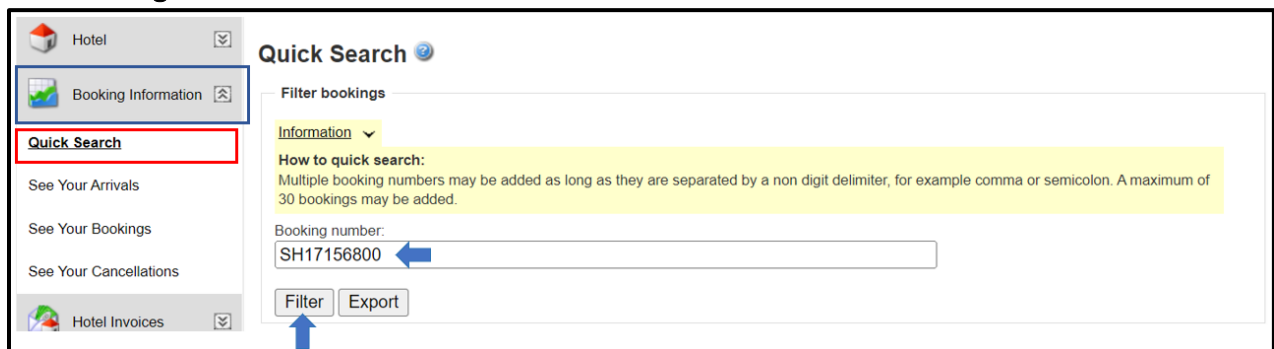

If we need to change the hotel name or room provider, we will need to edit the case and add the correct name of the new hotel or room provider and it will be necessary to select the correct option from a drop-down list that will appear.

If we cannot find the needed option in the drop-down list, it will not be possible to perform manually the changes.

Observation: We will always have to keep the original buying currency, as the system does allow us to change the currency, however this will cause issue for the Accounting Department's systems.

3. HOTEL MAKER

3.1. Finding the VCC details

In order to obtain the information regarding the payment, we will have to left click on the Booking Information tab in the menu of the left side and then select the Quick Search option.

This will bring up to the right side of the page a search engine where we will need to add the SunHotels booking reference and then press the **Filter** button or the Enter key from our keyboard.

The system will load and display the general booking details, such as the rooming list, check-in date, check-out date, room type booked, meal plan booked and below that we will have information regarding the amount that we need to pay to the hotel or supplier, as well as information regarding the virtual credit card is case the payment is made via VCC.

Calendar Based Notes		

1 Room Type will tell us the type of room booked in our system, the maximum capacity for that specific room type (the first number will display the maximum number of adults who can occupy the room and the second number will display the maximum number of children that can occupy the room) and at the very end it will even tell us from which type of contract is the room taken.

For the above example, we can see at the end of Room Type line, the word **freesale** is mentioned, meaning that the room was taken from a freesale contract.

Observation: The word Invoice also appears in the room type, however this does not mean that the booking is paid through invoicing, but rather whenever a contract is loaded into the system, by default the system will select the payment method to invoicing. Even if afterwards the payment method is changed, here it will still show as being paid through invoicing.

2 Show virtual credit card allows us to see the virtual credit card (VCC) details for this booking, as shown in the below image:

We will be able to see the card number, the expiration date and even the cvv.

This information will only appear on booking paid through a virtual credit card. If we are paying for the booking via invoicing, this option will not appear.

Observation: Currently, the option to see the virtual credit card it not available to CS Agents.

3 This area indicates the buying price and currency as well as if we are receiving a commission from the hotel for this booking and how much that commission is.

4 the **Price chart** option allows us to see the nightly rates for the booking. This is only applicable to dc bookings or bookings made through a DMC.

Observation: The prices shown on the Contract column will not always include rom extras, such as extra bed or the meal plan. These might appear as separate columns and also it is important to note that the prices displayed here will sometimes be gross prices.

Price chart				
Date	Contract	Adult extrabed	Child extrabed	Discount type

2023-12-31	1200.00	-	-	-
2024-01-01	1200.00	-	-	-

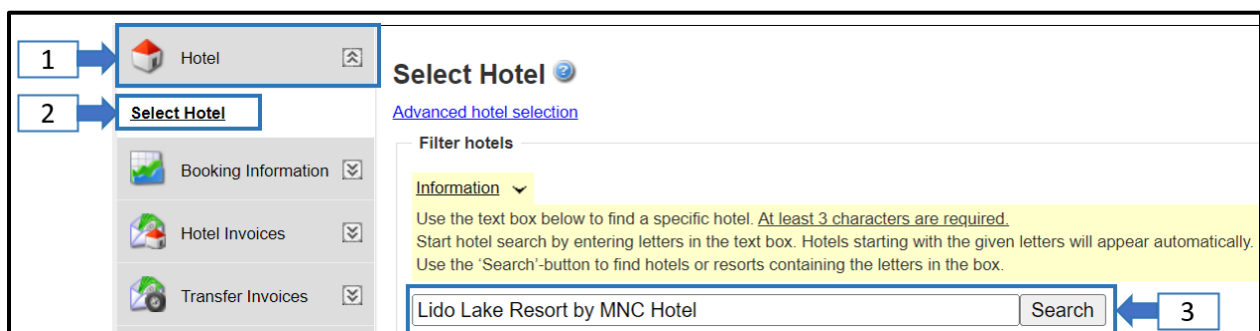

2.2. Checking when can a VCC be charged by the provider

In order to check when a hotel is able to charge the VCC associated with bookings, we must first determine from which contract the booking was made.

For that reason, we will first have to pull up the booking in Maker and check the name of the hotel appearing on our booking.

We will copy the full name of the hotel and go to HotelMaker. From the left side menu, we will select the **Hotel** tab and then pick **Select Hotel** as a sub tab.

This will open a search window on the right side of the page, where we can type in or paste the hotel name. Once we have done that, we will wait while the system will start loading all the booking channels (contracts) we have with the hotel.

Note:

It is not necessary to press the search button in order to make the system load the list of booking channels. As long as we have written the name of the hotel correctly, the system will pull up all the contracts related.

It is recommended to add the full name of the hotel, as a partial name can easily cause the system to pull up contracts related to hotel who might have a similar or partial similar name, leading to a longer list of contracts to scroll through.

On the right side of the screen, 2 columns with information will appear, similar to the above picture and will have to look for the line that mentions **Virtual Credit Card Payment**, as this line will indicate to us from when the VCC can be charged for bookings made through this booking channel.

Maker Guide version 112023

WebBeds

Page 41 of 48

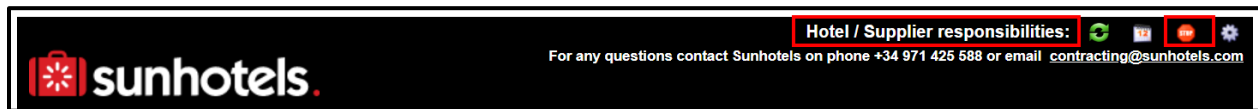

In brackets we will have the values of 0,1,2,3 and 5, each indicating a specific interval when the card can be charged. As the brackets, there will be a case containing a numerical value and will indicate which of the 5 options is the one associated to this booking channel.

0	1	2	3	5
15 days after departure	On departure	On arrival	15 days before departure	2 days before departure

Looking at the example used in the above screenshot, we can see that option 2 is the one added, and this means that for all the bookings made via this booking channel, the hotel will be able to charge the VCC starting with the date of arrival.

3.3. Checking if stop sales have been applied on a contract

In order to determine who is responsible for applying stop sales, we can always see that information at the very top of the HotelMaker page:

If we see the icon that looks similar to a stop sign, in our example it would mean that the hotel/ supplier is responsible with applying the stop sales.

In order to check if there are any stop sales applied on this contract (booking channel), we again will again select the **Hotel** tab from the left menu and the **Select Hotel** sub tab. We will search with the name of the hotel, as it appears in Maker and match the contract from the list with the name that we have in Maker, after the room type.

We will left click on the matching booking channel and on the left side, we will have a list of changes that have been performed on this booking channel (contract).

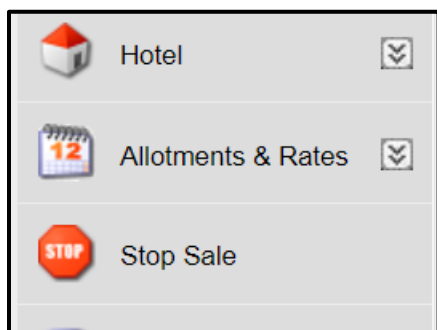

Latest Changes					
	PROCESSED	ID	STATUS	TYPE	DESCRIPTION
	2023-08-11	34275462	Auto accepted	Stop sale	Twin/Double room - De Luxe (2, 0) (FESTIVE PROMO RB / Sunhotels FIT Ruums NETT) * SUSPENDED * (Invoice) (freesale) : Twin/Double room - De Luxe (2, 0) (RB / Sunhotels FIT Ruums NETT) (Invoice) (freesale) : Twin/Double room - De Luxe - Pool Access (2, 0) (NOT IN USE) * SUSPENDED * (Invoice) (freesale) : Twin/Double room - De Luxe - Pool Access (2, 0) (NOT IN USE) * SUSPENDED * (Invoice) (freesale) : 2023-08-11 - 2024-12-31

	2023-08-11	34271622	Auto accepted	Stop sale	Twin/Double room - De Luxe (2, 0) (FESTIVE PROMO RB / Sunhotels FIT Ruums NETT) * SUSPENDED * (Invoice) (freesale) : Twin/Double room - De Luxe (2, 0) (RB / Sunhotels FIT Ruums NETT) (Invoice) (freesale) : Twin/Double room - De Luxe - Pool Access (2, 0) (NOT IN USE) * SUSPENDED * (Invoice) (freesale) : 2023-08-11 - 2024-12-31

Here we can see the last 10 modifications made to the contract, which can include:

- applying stop sale
- updating room inventory or types of rooms we sell
- hotel information

If we hover our mouse over the person icon, we will be able to see the name of the person who made the change (contract manager, stop sales dept., hotel, etc.) and if we hover over the date, we can see the exact time (Spain local time) when the change was made in our system.

It is important to know that Hotel Maker does not give us access to all the contractual information, however we can interrogate the system to see if stop sales have been applied for a specific period and we can also filter based on the room type/types we are interested in.

For that we will click on the **Stop Sales** tab on the left side menu, which will open a new page on the right side of the screen.

Stop Sale ?

Information

Use 'Stop sale'-button to apply allotment 0(zero) on selected dates and room types.
To view the specified period on screen, use the 'View period'-button. At this stage you can make a more detailed selection.

Apply stop sale on dates and room types

☒ Saturday

Stop sale

View period

Here we will be prompted to select the interval in which we want to check for potential stop sales (the system will only allow us to check for future dates) and afterwards we will also have to select the room type/types.

Once we have done this, we can press on the View period button and a table will indicate us if any stop sales have been applied. In the below example, we can see that for the Double room – Single use – Superior, we have a stop sales applied from the 26th of August to the 28th of August. This is easy to notice, as if stop sales have been applied, the line for the respective day/days will be highlighted in red.

Double room - Single use - Superior (1, 0) (Pack-Sunhotels Bongolosch Package no italy) (Invoice) (freesale)											FIT Net rates
	Date	SPO	Allot	Sold	Avail.	Contr. price (EUR)	Rel. days	Rel. hour	Min. days	Max. days	Board
☐	2023-08-15	✓	1	0	1	181.60	0	0	1		Breakfast
☐	2023-08-16	✓	1	0	1	181.60	0	0	1		Breakfast
☐	2023-08-17	✓	1	0	1	193.60	0	0	1		Breakfast
☐	2023-08-18	✓	1	0	1	193.60	0	0	1		Breakfast

☐	2023-08-21	✓	1	0	1	181.60	0	0	1		Breakfast
☐	2023-08-22	✓	1	0	1	193.60	0	0	1		Breakfast
☐	2023-08-23	✓	1	0	1	205.60	0	0	1		Breakfast
☐	2023-08-24	✓	1	0	1	205.60	0	0	1		Breakfast
☐	2023-08-25	✓	1	0	1	213.60	0	0	1		Breakfast
☐	2023-08-26	✓	0	0	0	213.60	0	0	2		Breakfast
☐	2023-08-27	✓	0	0	0	213.60	0	0	1		Breakfast
☐	2023-08-28	✓	0	0	0	209.60	0	0	2		Breakfast
☐	2023-08-29	✓	1	0	1	181.60	0	0	1		Breakfast

One disadvantage here is that while we can see on which days the stop sales has been applied, we cannot see who applied the stop sales or when.

Here can also check information regarding the number of rooms we have allocated based on the contract (**Allot**), how many we have sold (**Sold**) and how many are still available (**Avail.**).

Here we can also see the nightly rates for this particular room type (**Contr. price**), together with the currency and at the end of the table the system will also indicate if there is any meal plan (**Board**) included in this rate.

Important to note that the prices shown do not always include the meal plan price, or extra bed additions. Usually, the prices for these will be shown in separate columns.

3.4. Hotel general information

If we need to find general information regarding a hotel (hotel amenities, headline description or the general description) we will have to pull up the hotel, similar to how we did when searching for a specific contract.

Once we have the list of contracts for that hotel, we can select any of the available contracts with a left click.

GLOSARY OF TERMS

Allotment - The term Allotment is used in the Hotel industry to designate a certain block of pre-negotiated rooms which have been bought out and held by a third party (such as a travel organizer, wholesaler, tour operator, hotel consolidator, travel agent, OTA)

Buying price - the price that we obtain as a company from hotels and suppliers for a product.

LPO – local purchase order

Retail agency – travel agency who books directly through our point of sale (POS)

Selling price – the price that we offer as a company to our clients (travel agencies). This price has a mark-up included.

Transfer - It is a car service where a driver from a private company (our transfer supplier) goes to the airport or to the hotel to pick the client up and to drop them off to their destination.

VCC – payment method we use to pay by providing the hotel/ supplier with a virtual credit card that they can charge.

Wholesale agency – travel agency who books through their own system, which is linked to our system via XML connectivity.

XML (Extensible Markup Language) - is a markup language and file format for storing, transmitting, and reconstructing arbitrary data. It defines a set of rules for encoding documents in a format that is both human-readable and machine-readable.
